Domestic Politics and International Relations: How They Shape Our World

domestic politics and international relations are inseparably linked, influencing how nations interact on the global stage and how policies are shaped within borders. Understanding this dynamic interplay is crucial to grasping the complexities of modern governance and diplomacy. While domestic politics focuses on internal governance, public opinion, and policy-making, international relations deal with how countries engage with one another in trade, security, alliances, and global issues. Together, they form a delicate balance that impacts everything from economic stability to peace and security worldwide.

The Interconnection Between Domestic Politics and International Relations

At first glance, domestic politics and international relations might seem like two distinct arenas. However, they are deeply intertwined. A government's internal political landscape often dictates its foreign policy decisions. Similarly, international pressures and global events can significantly influence domestic political debates and electoral outcomes.

How Domestic Politics Shape Foreign Policy

Domestic considerations such as public opinion, political party agendas, and interest groups play a significant role in shaping a country's stance on international matters. Politicians often tailor foreign policies to align with the priorities and values of their constituents to ensure political survival. For example:

- **Electoral pressures**: Politicians may adopt nationalist rhetoric or tough foreign policies during election cycles to gain public support.
- **Economic interests**: Domestic industries and labor groups influence trade agreements and international economic policies.
- **Ideological beliefs**: Governments led by different political ideologies pursue distinct foreign policy approaches, such as interventionism or isolationism.

This dynamic means that foreign policy is rarely a purely strategic endeavor; it is often a reflection of domestic political realities.

International Relations Impacting Domestic Politics

Conversely, global events and international relationships frequently affect domestic political landscapes. International crises, trade disputes, or diplomatic successes can sway public opinion and shift political power at home. A few notable examples include:

- **Economic sanctions** imposed by other countries can lead to domestic economic hardship, sparking political unrest.
- **International alliances** such as NATO or regional trade blocs can become contentious issues within domestic politics.
- **Global challenges** like climate change or pandemics require governments to adjust internal policies, often leading to political debates.

Thus, the world beyond a country's borders is a constant factor in shaping its internal political dynamics.

Key Factors Linking Domestic Politics and International Relations

Several mechanisms connect a country's internal political environment to its external diplomatic actions.

National Identity and Public Opinion

National identity is a powerful force in both domestic and international politics. The way citizens perceive their country influences foreign policy preferences. Leaders often appeal to shared cultural values or historical narratives to justify international decisions. Public opinion polls can constrain or empower governments regarding their international commitments.

Political Institutions and Leadership

The structure of political institutions—whether a democracy, authoritarian regime, or hybrid—affects how foreign policy decisions are made. Democracies may be more responsive to public sentiment and opposition parties, while autocratic regimes might pursue long-term strategic goals with less domestic interference. Leadership style and personality also play a significant role in navigating the complex interface between domestic demands and international pressures.

Economic Conditions and Globalization

Global economic integration means that domestic economies are highly sensitive to international developments. Trade policies, foreign investment, and economic diplomacy are areas where internal economic priorities meet external realities. Politicians need to balance protecting domestic industries with embracing globalization to maintain economic growth and political legitimacy.

Case Studies: Domestic Politics Influencing International Relations

Examining real-world examples helps illustrate the practical implications of the domestic-international nexus.

United States and Trade Policies

In recent years, shifts in U.S. domestic politics, including rising populism and concerns about job losses, have significantly influenced international trade relations. Policies such as renegotiating trade agreements and imposing tariffs on key trading partners reflect domestic political demands for protecting American workers. This has led to tensions with allies and trading partners, illustrating how domestic political pressures can reshape global economic relations.

Brexit and the United Kingdom

The United Kingdom's decision to leave the European Union was largely driven by domestic political debates over sovereignty, immigration, and economic control. This momentous choice has had profound implications for international relations, affecting trade, security cooperation, and diplomatic ties across Europe and beyond. It serves as a vivid example of how domestic political movements can redefine a country's place in the world.

Tips for Analyzing the Domestic-International Political Relationship

For students, analysts, or anyone interested in understanding global affairs, considering the following points can provide deeper insight:

- **Look beyond official foreign policy statements:** Examine domestic political debates, media coverage, and public opinion to understand the motivations behind international actions.
- **Consider the role of political institutions:** Different governance systems handle the domestic-international interface uniquely, impacting policy coherence and implementation.
- **Track economic indicators and social trends:** These often signal domestic pressures that may influence foreign relations.
- **Follow leadership changes:** New administrations or political shifts can lead to abrupt changes in international engagement strategies.

The Future of Domestic Politics and International Relations

As the world becomes more interconnected, the relationship between domestic politics and international relations grows even more complex. Issues such as climate change, cybersecurity, migration, and pandemics transcend national borders and require coordinated responses. At the same time, rising nationalism and political polarization within countries challenge traditional diplomatic frameworks.

The growing influence of social media and real-time information sharing means that domestic public opinion can rapidly respond to international events, pressuring governments to act swiftly. Additionally, non-state actors and multinational corporations increasingly shape the nexus between domestic and international spheres.

In this evolving landscape, understanding the interplay between domestic politics and international relations is more critical than ever for policymakers, scholars, and global citizens alike. It encourages a holistic view that appreciates how internal political currents and external diplomatic tides continuously shape each other, crafting the world's geopolitical future.

Frequently Asked Questions

How do domestic political changes influence a country's foreign policy?

Domestic political changes, such as shifts in government leadership or public opinion, can significantly influence a country's foreign policy by altering priorities, strategies, and diplomatic approaches to international relations.

What role do political parties play in shaping international relations?

Political parties shape international relations by promoting specific foreign policy agendas, influencing legislative decisions on international agreements, and impacting diplomatic relations based on their ideological perspectives.

How can international relations impact domestic politics?

International relations can impact domestic politics by affecting national security, economic conditions, and public opinion, which in turn influence government policies, election outcomes, and political stability.

What is the significance of public opinion in domestic politics regarding international treaties?

Public opinion plays a crucial role in domestic politics regarding international treaties, as widespread support or opposition can pressure governments to negotiate, ratify, or withdraw from agreements, shaping the country's global commitments.

How do domestic political institutions affect a country's ability to engage in international cooperation?

Domestic political institutions, such as legislatures, courts, and executive agencies, affect a country's ability to engage in international cooperation by determining how foreign policy decisions are made, implemented, and checked within the political system.

In what ways do international conflicts influence domestic political agendas?

International conflicts influence domestic political agendas by heightening security concerns, impacting economic conditions, and fostering nationalist sentiment, which politicians may leverage to prioritize defense spending, enact policies, or rally public support.

How does globalization challenge traditional domestic political sovereignty in international relations?

Globalization challenges traditional domestic political sovereignty by increasing interdependence among nations, limiting unilateral policy-making, and requiring domestic governments to coordinate with international bodies and comply with global norms and agreements.

Domestic Politics and International Relations: An Interwoven Dynamic

domestic politics and international relations are intricately linked fields that shape the global landscape in profound ways. Understanding the intersection of a country's internal political environment and its external diplomatic engagements is essential for comprehending the complexities of global governance, conflict resolution, and economic cooperation. The interplay between domestic agendas and international strategies forms the backbone of modern statecraft, influencing everything from trade policies to security alliances.

The Interdependence of Domestic Politics and International Relations

Domestic politics, encompassing governance structures, political parties, public opinion, and policy priorities, directly affects how a nation interacts on the international stage. Conversely, international relations—characterized by diplomacy, treaties, conflict management, and multilateral cooperation—often feed back into domestic political debates and decision-making processes. This bidirectional influence means that shifts within a country's internal political landscape can have ripple effects globally, while international pressures and opportunities can reshape domestic agendas.

For example, in democracies, electoral cycles and public sentiment can constrain or propel foreign policy decisions. Leaders may adopt hawkish or conciliatory stances abroad depending on domestic approval ratings or the political leverage of opposition parties. In authoritarian regimes, centralized power often allows for more unilateral foreign policy moves, but these may be vulnerable to internal dissent or elite power struggles.

Domestic Political Stability and Foreign Policy Consistency

One critical factor affecting international relations is the degree of domestic political stability. Countries with stable political systems tend to project more predictable foreign policies, which facilitates trust and long-term cooperation among international partners. Conversely, nations experiencing political upheaval, such as coups, revolutions, or contentious elections, often face challenges in maintaining coherent foreign relations.

Political instability can lead to abrupt changes in foreign policy priorities, undermining diplomatic agreements and international commitments. For instance, the frequent leadership changes in certain countries can make it difficult for foreign governments and multinational corporations to engage in sustained partnerships, increasing geopolitical risks.

Public Opinion and Its Impact on International Engagement

Public opinion within a country plays a pivotal role in shaping international relations. Democratically elected officials are accountable to their constituencies and may adjust foreign policy to align with popular views. Issues like immigration, international trade, military interventions, and climate agreements often evoke strong public responses that influence government actions.

Polling data from various countries consistently shows that citizens' attitudes toward globalization, alliances like NATO, or economic agreements such as the Trans-Pacific Partnership can sway policymakers. Leaders must balance domestic demands with international obligations, sometimes leading to compromises or policy reversals.

Key Dimensions Influencing the Relationship Between Domestic Politics and International Relations

Economic Policy and Global Trade

Domestic economic policies, including taxation, labor laws, and industrial regulations, affect a nation's competitiveness in global markets. Trade agreements and tariffs are often negotiated with domestic stakeholders in mind, reflecting the interests of industries and workers. Political debates about globalization, protectionism, and economic sovereignty frequently dominate domestic discourse and influence international negotiations.

For example, the United States' shifts toward protectionist policies in recent years were driven by domestic concerns over job losses and industrial decline, leading to renegotiations of trade agreements and tariffs that reverberated globally. Similarly, the European Union's internal political dynamics shape its collective trade stance and diplomatic posture.

Security and Defense Policy

National security concerns are central to both domestic politics and international relations. Governments allocate resources toward defense, counterterrorism, and intelligence, decisions that are heavily influenced by internal political debates and public perceptions of threats. International security alliances, such as NATO or regional defense pacts, depend on the political will of member states, which can fluctuate based on domestic political changes.

The post-9/11 era demonstrated how domestic security imperatives led to expanded international

cooperation on counterterrorism but also sparked debates over civil liberties at home. Similarly, shifts in political leadership can recalibrate defense priorities and alliance commitments, impacting global security architectures.

Human Rights and Foreign Policy

Domestic political values and institutions shape how countries approach human rights in their foreign relations. Democracies may emphasize human rights promotion as part of their diplomatic agenda, while authoritarian regimes might prioritize sovereignty and non-interference. However, domestic human rights records can complicate a country's international standing and influence bilateral and multilateral relations.

The tension between promoting universal human rights and respecting national sovereignty remains a persistent challenge in international diplomacy. Domestic political pressures can either propel governments to take a moral stance abroad or to downplay human rights issues in favor of strategic interests.

Challenges at the Intersection of Domestic Politics and International Relations

Navigating the nexus between internal political demands and external diplomatic imperatives presents several challenges:

- **Policy Coherence:** Aligning domestic priorities with international commitments without compromising either can be difficult, especially in polarized political environments.
- **Populism and Nationalism:** The rise of populist movements often emphasizes "putting the nation first," which can disrupt established international agreements and alliances.
- **Information and Misinformation:** Domestic political narratives heavily influence public understanding of international issues, sometimes leading to misinformation that complicates diplomacy.
- **Global Crises Response:** Coordinating international responses to pandemics, climate change, or economic shocks requires transcending domestic political divides, a task easier said than done.

Comparative Perspectives: How Different Political Systems Manage Foreign Policy

Different political systems exhibit varying approaches to integrating domestic politics with international relations:

1. **Democracies:** Tend to have transparent foreign policy debates with multiple actors influencing decisions. Electoral accountability ensures responsiveness to public opinion but can lead to policy volatility.
2. **Authoritarian Regimes:** Often pursue foreign policy with fewer internal constraints, enabling swift decisions but risking international isolation or unpredictability if domestic power struggles emerge.
3. **Hybrid Systems:** Countries with mixed political features may experience a combination of rigidity and flexibility in their international engagements, depending on elite consensus and public pressure.

The Future Trajectory of Domestic Politics and International Relations

As globalization deepens and technological advances reshape communication, the entanglement between domestic politics and international relations is likely to intensify. Social media platforms enable rapid dissemination of information and mobilization of public opinion, adding new layers of complexity to foreign policy formulation.

Moreover, emerging global challenges such as climate change, cyber warfare, and transnational migration require coordinated international responses that must be reconciled with diverse domestic political realities. The increasing multipolarity of the world order also means that domestic political shifts in one country can have amplified effects across regions.

Understanding the nuanced and evolving relationship between domestic politics and international relations is therefore essential for policymakers, analysts, and citizens alike. It requires a continuous balancing act—one that navigates internal democratic processes, diverse political systems, and the ever-changing dynamics of global affairs.

domestic politics and international relations: DOMESTIC POLITICS AND INTERNATIONAL RELATIONS. , 2002

domestic politics and international relations: *The Domestic Politics of International Relations* Roderic Alley, 2018-02-06 This title was first published in 2000. An important comparative study, which considers the domestic/international interface. The book covers climate change in Australia; New Zealand and the abolition of nuclear weapons; the Bougainville conflict and settlement in Papua New Guinea; Decolonization (New Caledonia, East Timor, West Papua); Indigenous Rights (Australia, New Zealand, and Fiji); Governance Reform and Environmental Management challenges in the Pacific Island states. The conclusion evaluates propositions advanced in the introductory chapter regarding the distinctive domestic/international issues raised and argues that, in order to comprehend foreign relations in an increasingly complex world, there is no substitute for a thorough knowledge of distinctive local, social and political dynamics shaping international orientations. The theme of the book is the way that these interactions have operated in the cases examined.

domestic politics and international relations: Foreign Policy, Domestic Politics and International Relations Elisabetta Brighi, 2013-10-01 This book offers a re-examination of foreign policy, in its relation with domestic politics and international relations (IR). Bringing together a vast body of literature from IR, foreign policy analysis, comparative politics and public policy, this book systematically reconceptualises foreign policy as a dialectic, produced by the interplay of context, strategy and discourse. It argues that foreign policy defies easy understandings and necessitates a complex framework of analysis, introducing the 'Strategic-Relational Model', as conceptualised in critical realism, for the first time to the field of foreign policy analysis. Combining a comprehensive investigation of the last century of Italian foreign policy with an exploration of a key theoretical issue within the field of foreign policy analysis and IR, this book analyses key episodes within Italian foreign policy, including Italy's Cold War alliance politics, colonial interventions, fascist foreign policy and Italy's participation in the wars of Kosovo, Iraq and Afghanistan. It provides a comprehensive and up-to-date account of the long-term historical trajectory of Italian foreign policy, from the Liberal age to the 'Second Republic', including all four governments of Silvio Berlusconi. Foreign Policy, Domestic Politics and International Relations will be of interest to students and scholars of International Relations, Foreign Policy Analysis and Italian politics.

domestic politics and international relations: Domestic Politics and International Narcotics Control Victor J. Hinojosa, 2007-11-21 This book examines different levels of narcotics control cooperation between the United States, Mexico and Colombia. Victor J. Hinojosa finds that Mexico is consistently held to a very different standard than Colombia and that the US often satisfies domestic political pressures to be tough on drugs by punishing Colombia while allowing Mexico much more freedom to pursue different strategies. He also explores the role of domestic terrorism and presidential reputation in Colombia for the US-Colombia pair and the role of competing issues in the US-Mexican bilateral agenda for that country pair, finding that congressional pressure and electoral tests exert the most impact on US behavior but that Mexican and Colombian behavior is best explained in other ways. Together, these findings suggest both the promise of integrating the study of international relations and comparative politics and important limitations of the theoretical framework.

domestic politics and international relations: Domestic Politics and Norm Diffusion in International Relations Thomas Risse, 2016-10-14 This book collects Thomas Risse's most important articles together in a single volume. Covering a wide range of issues – the end of the Cold War, transatlantic relations, the democratic peace, human rights, governance in areas of limited statehood, Europeanization, European identity and public spheres, most recently comparative regionalism – it is testament to the breadth and excellence of this highly respected International Relations scholar's work. The collection is organized thematically – domestic politics and international relations, international sources of domestic change, and the diffusion of ideas and institutions – and a brand new introductory essay provides additional coherence. This text will be of key interest to scholars and students of International Relations, European Politics, and Comparative Politics. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

domestic politics and international relations: Domestic Politics and International Human Rights Tribunals Courtney Hillebrecht, 2014-02-10 International politics has become increasingly legalized over the past fifty years, restructuring the way states interact with each other, international institutions, and their own constituents. The international legalization of human rights now makes it possible for individuals to take human rights claims against their governments at international courts such as the European and Inter-American Courts of Human Rights. This book brings together theories from international law, human rights and international relations to explain the increasingly important phenomenon of states' compliance with human rights tribunals' rulings. It argues that this is an inherently domestic affair. It posits three overarching questions: why do states comply with human rights tribunals' rulings? How does the compliance process unfold and what are the domestic political considerations around compliance? What effect does compliance have on the protection of human rights? The book answers these through a combination of quantitative analyses and in-depth case studies from Argentina, Brazil, Colombia, Italy, Portugal, Russia and the United Kingdom.

domestic politics and international relations: Double-edged Diplomacy Peter B. Evans, Harold Karan Jacobson, Robert D. Putnam, 1993 This original look at the dynamics of international relations untangles the vigorous interaction of domestic and international politics on subjects as diverse as nuclear disarmament, human rights, and trade. An eminent group of political scientists demonstrates how international bargaining that reflects domestic political agendas can be undone when it ignores the influence of domestic constituencies. The eleven studies in Double-Edged Diplomacy provide a major step in furthering a more complete understanding of how politics between nations affects politics within nations and vice versa. The result is a striking new paradigm for comprehending world events at a time when the global and the domestic are becoming ever more linked.

domestic politics and international relations: International Trade Negotiations and Domestic Politics Oluf Langhelle, 2013-08-29 In spite of many years of negotiation on trade liberalization, progress seems to have stalled. This book explores why resistance to further market liberalization seems so strong, given that the benefits are seen to outweigh the costs. This volume argues that in order to understand the slow progress of World Trade Organization negotiations, we need to take into consideration the 'intermestic' character of trade politics, that is, the way in which international and domestic aspects of politics and policies have been woven together and become inextricably related to each other. This is a general trend in our globalizing world, and one that is most pronounced in the case of trade politics and policy. International Trade Negotiations and Domestic Politics therefore presents an in-depth analysis of institutions, ideas, interests and actors in the interplay between international trade negotiations and national negotiating positions. At the international level the authors focus on the multilateral negotiations within the World Trade Organization, together with the plurilateral and bilateral negotiations on free trade agreements. At the regional and domestic level they analyze the trade politics and policies of two established powers, the European Union and the USA; two rising powers, China and India; and a small

industrialized country with an open economy, Norway.

domestic politics and international relations: Domestic Political Change and Grand Strategy National Bureau of Asian Research (U.S.), 2007 Based upon work supported by the Department of Energy (National Nuclear Security Administration) under Award Number DE-FG52-03SF22724.

domestic politics and international relations: Domestic Politics, International Bargaining and China's Territorial Disputes Chien-peng Chung, 2004-07-15 This is a groundbreaking analysis of China's territorial disputes, exploring the successes and failures of negotiations that have taken place between its three neighbours, namely India, Japan and Russia. By using Roberts Putnam's two level game framework, Chung relates the outcome of these disputes to the actions of domestic nationalist groups who

domestic politics and international relations: The Domestic Politics of Negotiating International Trade Johanna von Braun, 2012-03-29 The Domestic Politics of International Trade considers the issues surrounding intellectual property rights in international trade negotiations in order to examine the challenges posed to domestic policy-makers by the increasingly broad nature of Free Trade Agreements (FTAs). Throughout the book the author demonstrates the importance of domestic politics in understanding the nature and outcome of international negotiations, particularly as they relate to international economic diplomacy. The book looks in detail at the intellectual property negotiations which formed part of the US-Peru and US-Colombia Free Trade Agreements and analyses the extent to which public health authorities and other parties affected by the increased levels of intellectual property protection were integrated into the negotiation process. The book then juxtaposes these findings with an analysis of the domestic origins of US negotiation objectives in the field of intellectual property, paying particular attention to the role of the private sector in the development of these objectives. Based on a substantial amount of empirical research, including approximately 100 interviews with negotiators, capital based policy-makers, private sector representatives, and civil society organisations in Lima, Bogotá and Washington, DC, this book offers a rare account of different stakeholders' perceptions of the FTA negotiation process. Ultimately, the book succeeds in integrating the study of domestic politics with that of international negotiations. This book will be of particular interest to academics as well as practitioners and students in the fields of international law, economic law, intellectual property, political economy, international relations, comparative politics and government.

domestic politics and international relations: Interests, Institutions, and Information Helen V. Milner, 2020-06-30 Increasingly scholars of international relations are rallying around the idea that domestic politics matters. Few, however, have articulated precisely how or why it matters. In this significant book, Helen Milner lays out the first fully developed theory of domestic politics, showing exactly how domestic politics affects international outcomes. In developing this rational-choice theory, Milner argues that any explanation that treats states as unitary actors is ultimately misleading. She describes all states as polyarchic, where decision-making power is shared between two or more actors (such as a legislature and an executive). Milner constructs a new model based on two-level game theory, reflecting the political activity at both the domestic and international levels. She illustrates this model by taking up the critical question of cooperation among nations. Milner examines the central factors that influence the strategic game of domestic politics. She shows that it is the outcome of this internal game--not fears of other countries' relative gains or the likelihood of cheating--that ultimately shapes how the international game is played out and therefore the extent of cooperative endeavors. The interaction of the domestic actors' preferences, given their political institutions and levels of information, defines when international cooperation is possible and what its terms will be. Several test cases examine how this argument explains the phases of a cooperative attempt: the initiation, the negotiations at the international level, and the eventual domestic ratification. The book reaches the surprising conclusion that theorists--neo-Institutionalists and Realists alike--have overestimated the likelihood of cooperation among states.

domestic politics and international relations: *International Migration and the Globalization of Domestic Politics* Rey Koslowski, 2006 This book considers the impact of migrant communities on the politics of their home nations, with case studies from Israel, Turkey, Kurdistan, the Dominican Republic, Mexico and Sri Lanka.

domestic politics and international relations: The Domestic Politics of International Relations Roderic Alley, 2019-11-11 This title was first published in 2000. An important comparative study, which considers the domestic/international interface. By examining a diverse range of issues Roderic Alley argues that, in order to comprehend foreign relations in an increasingly complex world, there is no substitute for a thorough knowledge of distinctive local, social and political dynamics shaping international orientations.

domestic politics and international relations: **Handbook of International Relations** Walter Carlsnaes, Thomas Risse-Kappen, Thomas Risse, Beth A Simmons, 2002-03-13 NEW IN PAPERBACK FEBRUARY 2005! 'The most systematic and wide-ranging survey of the multi-faceted field of International Relations yet produced. It is sure to become a standard reference work and teaching text, and is unlikely to be superseded at any time in the near future. It should be considered as essential reading' - International Affairs The Handbook of International Relations, published 2002 in hardback, quickly established itself as the benchmark volume, providing a state-of-the-art review and indispensable guide to the study of international relations. It is now released in paperback, in order to be accessible to students in classroom use. Divided into three parts, the volume reviews both the historical, philosophical, analytical and normative roots to the discipline and the key contemporary topics of research and debate today. The first part introduces the major approaches within the field and unpacks many of the on-going debates within the discipline including those between rationalist and constructivist approaches. The second part moves on to explore the key concepts and contextual factors important to the subject from concepts like the state and power, to international and transnational actors, debates around globalization, and contending feminist perspectives. The final part reviews a number of the key substantive issues in international relations and is designed to complement the analytical tools and perspectives presented in Parts I and II. Examples of the many topics included are: foreign policy; war and peace; security; nationalism and ethnicity; finance; trade; development; the environment; and human rights.

domestic politics and international relations: *China-US Competition* Simona A. Grano, David Wei Feng Huang, 2023-01-01 This open access edited book brings together a closer examination of European and Asian responses to the escalating rivalry between the US and China. As the new Cold War has surfaced as a perceivable reality in the post-COVID era, the topic itself is of great importance to policymakers, academic researchers, and the interested public. Furthermore, this manuscript makes a valuable contribution to an under-studied and increasingly important phenomenon in international relations: the impact of the growing strategic competition between the United States and China on third parties, such as small and middle powers in the two arguably most affected regions of the world: Europe and East Asia. The European side has been under-studied and explicitly comparative work on Europe and East Asia is extremely rare. Given that the manuscript focuses heavily on recent developments—and because many of these developments have been quite dramatic—there are very few publications that cover the same topics.

domestic politics and international relations: **Domestic Sources of Global Change** Zeev Maoz, 1996 Examines the relationship between domestic politics and international politics.

domestic politics and international relations: The Oxford Handbook of International Political Economy, 2025-01-17 The field of International Political Economy (IPE) has rapidly developed into a central pillar in the study of International Relations, and its interdisciplinary roots make it a rich and productive area of scholarly interest. This Oxford Handbook analyses and evaluates the state of the art in IPE research. Bringing together leading experts from a wide geographical and theoretical spectrum, the Handbook provides accessible and comprehensive surveys on topics central to the study of International Political Economy. As IPE scholarship evolves to explore global events such as financial crises and trade wars, examining how politics is both a

cause and a consequence of economics, it highlights the practical and problem-driven nature of the field. The Handbook considers the purported European-North American divide and the impact of the surrounding debate on the approach taken to the field. The chapters review the scholarly literature, outline future research opportunities, and consider the ways in which world events have contributed to new research in the field. The Handbook covers both the theoretical and methodological foundations of the field as well as substantive topics within it, including regulation, foreign aid, migration, NGOs, capital, political-military relations, and many others. The Oxford Handbooks of International Relations is a twelve-volume set of reference books offering authoritative and innovative engagements with the principal sub-fields of International Relations. The series as a whole is under the General Editorship of Christian Reus-Smit of the University of Melbourne and Duncan Snidal of the University of Oxford, with each volume edited by specialists in the field. The series both surveys the broad terrain of International Relations scholarship and reshapes it, pushing each sub-field in challenging new directions. Following the example of Reus-Smit and Snidal's original Oxford Handbook of International Relations, each volume is organized around a strong central thematic by scholars drawn from different perspectives, reading its sub-field in an entirely new way, and pushing scholarship in challenging new directions.

domestic politics and international relations: Canada, Nation Branding and Domestic Politics Richard Nimijean, David Carment, 2020-06-29 After his Liberal Party's surprise victory in the 2015 federal Canadian election, Justin Trudeau declared that Canada was back on the world stage. This comprehensive volume highlights issues in the relationship between articulated visions of Canada as a global actor, nation branding and domestic politics, noting the dangers of the politicization of the branding of Canada. It also provides the political context for thinking about 'Brand Canada' in the Trudeau era. The authors explore the Trudeau government's embrace of political branding and how it plays out in key areas central to the brand, including: Canada's relations with Indigenous peoples; social media and digital diplomacy; and the importance of the Arctic region for Canada's brand, even though it is often ignored by politicians and policymakers. The book asks whether the Trudeau government has lived up to its claim that Canada is back, and highlights the challenges that emerge when governments provide optimistic visions for meaningful transformation, but then do not end up leading meaningful change. This book will be of great interest to students and scholars of political science, particularly those with a focus on Canada. It was originally published as a special issue of Canadian Foreign Policy Journal.
