rime of the ancient mariner illustrations: Poet of the Medieval Modern Francesca Brooks, 2021 The early Middle Ages provided twentieth-century poets with the material to re-imagine and rework local, religious, and national identities in their writing. *Poet of the Medieval Modern* focuses on a key figure within this tradition, the Anglo-Welsh poet and artist David Jones (1895-1974): representing the first extended study of the influence of early medieval English culture and history on Jones and his novel-length late modernist poem *The Anathemata* (1952). Jones's second major poetic project after *In Parenthesis* (1937), *The Anathemata* fuses Jones's visual and verbal arts to write a Catholic history of Britain as told through the history of man-as-artist. Drawing on unpublished archival material including manuscripts, sketches, correspondence, and, most significantly, the marginalia from David Jones's Library, this volume reads with Jones in order to

trouble the distinction between poetry and scholarship. Placing this underappreciated figure firmly at the centre of new developments in Modernist and Medieval Studies, *Poet of the Medieval Modern* brings the two fields into dialogue and argues that Jones uses the textual and material culture of the early Middle Ages--including Old English prose and poetry, Anglo-Latin hagiography, early medieval stone sculpture, manuscripts, and historiography--to re-envision British Catholic identity in the twentieth-century long poem. Jones returned to the English record to seek out those moments where the histories of the Welsh had been elided or erased. At a time when the Middle Ages are increasingly weaponised in far-right and nationalist political discourse, the book offers a timely discussion of how the early medieval past has been resourced to both shore-up and challenge English hegemonies across modern British culture. --

The key issues discussed include the difficulties of making illustrations visible online, the mechanisms for searching the content of illustrations, and the politics of crowdsourced image tagging. Analyzing a range of online resources, the book offers a conceptual and critical model for engaging with and understanding nineteenth-century illustration through its interplay with the digital. In its exploration of the intersections between historic illustrations and the digital, the book is of interest to those working in illustration studies, digital humanities, word and image, nineteenth-century studies, and visual culture.
