world history textbook 6th grade mcgraw hill: Asian/American Curricular Epistemicide Nicholas D. Hartlep, Daniel P. Scott, 2016-08-18 In this important book, Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans. As Hartlep and Scott write. Asian Americans have once again been constructed as the "good minority" that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality. Over and over again, the media has been telling "a single story" about Asian Americans to the public for the past fifty years. The consequence of this fabricated story is that it "discourages others—even Asian-Americans themselves—from believing in the validity of their struggles" (Linshi, 2014, p. 1).

world history textbook 6th grade mcgraw hill: California in a Time of Excellence James Andrew LaSpina, 2009-02-26 California in a Time of Excellence follows the Golden State's efforts to reform its public school system from 1983 to the present. Beginning with progressive curriculum reform initiatives that were launched even before the National Commission on Excellence in Education (NCEE) issued A Nation at Risk in 1983, James Andrew LaSpina traces these reform efforts through recurring culture wars, major clashes of personality, and a conflict between the state's tradition of progressive educational policy and a culture of conservatism that colored much of the so-called Left Coast's history since the sixties. While the battles over curriculum reform in California reflect those at the national level, the political world surrounding this conflict reveals the enormous significance of the conflict and its implications for our national future.

world history textbook 6th grade mcgraw hill: *Contested Curriculum* Don Romesburg, 2025-04-15 Today, many states have proposed so-called "Don't Say Gay" bills that prohibit public school teachers from mentioning LGBTQ topics in the classroom. But a few states, like California, have taken decisive steps in the other direction. They mandate inclusive education that treats LGBTQ history as essential to the curriculum. At once a history of an evolving movement and an activist handbook, *Contested Curriculum* navigates the rocky path to LGBTQ-inclusive K-12 history education in the United States and recounts the fight for a curriculum that recognizes the value of queer and trans lives. What began in fits and starts in activism and educational materials across the late twentieth century led to the passage of California's landmark FAIR Education Act in 2011, ensuring that LGBTQ history has a place in the K-12 classroom. Historian Don Romesburg, the lead

scholar who worked with advocacy organizations to pass the act, recounts the decades-long struggle to integrate LGBTQ content into history education policy, textbooks, and classrooms. Looking at California and states that followed its lead, he assesses the challenges and opportunities presented by this new way of teaching history. Romesburg's powerful case for LGBTQ-inclusive education is all the more urgent in this era of anti-gay book bans, regressive legislation, and attempts to diminish the vital role that inclusive and honest history education should play in a democratic nation.

world history textbook 6th grade mcgraw hill: Citizens and the State in Authoritarian Regimes Karrie J. Koesel, Valerie Bunce, Jessica Chen Weiss, 2020 The revival of authoritarianism is one of the most important forces reshaping world politics today. However, not all authoritarians are the same. To examine both resurgence and variation in authoritarian rule, Karrie J. Koesel, Valerie J. Bunce, and Jessica Chen Weiss gather a leading cast of scholars to compare the most powerful autocracies in global politics today: Russia and China. The essays in *Citizens and the State in Authoritarian Regimes* focus on three issues that currently animate debates about these two countries and, more generally, authoritarian political systems. First, how do authoritarian regimes differ from one another, and how do these differences affect regime-society relations? Second, what do citizens think about the authoritarian governments that rule them, and what do they want from their governments? Third, what strategies do authoritarian leaders use to keep citizens and public officials in line and how successful are those strategies in sustaining both the regime and the leader's hold on power? Integrating the most important findings from a now-immense body of research into a coherent comparative analysis of Russia and China, this book will be essential for anyone studying the foundations of contemporary authoritarianism.
