Masters in Public History Online: Unlocking the Past in the Digital Age

Masters in public history online programs are becoming increasingly popular among students and professionals who want to deepen their understanding of history while gaining practical skills for careers outside the traditional academic track. If you're passionate about preserving and interpreting history for the public—whether through museums, archives, historic sites, or digital platforms—earning a degree online offers flexibility and access to quality education without relocating or pausing your career.

In this article, we'll explore what a masters in public history online entails, how these programs are structured, the benefits of studying history in a digital format, and the career opportunities that can open up when you combine historical knowledge with public engagement skills.

What Is Public History?

Before diving into online programs, it's helpful to understand what public history actually means. Unlike academic history, which focuses on research and teaching at universities, public history centers on bringing history to broader audiences. This can include working in museums, historic preservation, government agencies, cultural resource management, or creating digital exhibits and archives.

Public historians interpret historical events and artifacts in ways that are accessible and meaningful to the general public. They might curate museum exhibitions, manage archival collections, develop educational programs, or use new media to tell stories that connect past and present.

Why Choose a Masters in Public History Online?

Online learning has transformed higher education, making it easier for busy professionals and distant learners to acquire advanced degrees. Here are some compelling reasons to consider a masters in public history online:

Flexibility and Convenience

One of the biggest advantages of online programs is the ability to study from anywhere and often on your own schedule. This flexibility allows students to maintain jobs, family commitments, or internships while progressing through their degree.

Access to Diverse Programs

Not every university offers a public history graduate program, and those that do may be geographically distant. Online courses provide access to top-ranked schools and expert faculty without the need to relocate.

Integration of Digital Tools

Public history today increasingly involves digital archives, virtual exhibitions, and multimedia storytelling. Many online masters programs incorporate training in digital history techniques, preparing students for modern public history careers.

Core Components of Masters in Public History Online Programs

While programs vary, most online masters in public history include a blend of theoretical knowledge and practical skills. Here's what you can typically expect:

Historical Methods and Theory

Understanding historiography, research methods, and critical theory remains foundational. Students learn how to analyze sources, interpret historical narratives, and engage with different perspectives.

Public History Practice

Courses often cover topics like museum studies, archival administration, historic preservation, and oral history. These classes focus on real-world applications of history outside academia.

Digital History and Technology

Many programs emphasize digital literacy, teaching tools like GIS mapping, digital archiving, web design, and multimedia production to engage contemporary audiences.

Capstone Projects or Internships

Hands-on experience is crucial. Students may complete internships at museums, historical societies, or government agencies, or undertake capstone projects that demonstrate their ability to apply skills in public history contexts.

Choosing the Right Online Program

Selecting the best masters in public history online program depends on your goals, budget, and preferred learning style. Consider these factors:

- **Accreditation:** Ensure the institution is regionally accredited for quality education.
- **Faculty Expertise:** Look for programs with professors experienced in public history and active in the field.

Careers with a Masters in Public History

Graduates of public history programs have diverse career paths. The demand for professionals who can communicate history in engaging ways continues to grow in multiple sectors.

Museum and Curatorial Roles

Many public historians work as curators, exhibit designers, or education coordinators in museums and cultural institutions. They develop exhibitions, lead tours, and create educational content that connects visitors to history.

Archival and Library Science

Managing collections of historical documents, photographs, and artifacts is another common path. Archivists and librarians help preserve important records and make them accessible to researchers and the public.

Historic Preservation and Cultural Resource Management

Some public historians focus on protecting and maintaining historic sites and landmarks. They may work with government agencies or nonprofit organizations to balance development with preservation.

Digital and Media History

With the rise of digital storytelling, public historians are increasingly involved in creating online exhibits, podcasts, virtual reality experiences, and social media campaigns that bring history to life.

masters in public history online: The Oxford Handbook of Public History , 2017-09-20

The Oxford Handbook of Public History introduces the major debates within public history; the methods and sources that comprise a public historian's tool kit; and exemplary examples of practice. It views public history as a dynamic process combining historical research and a wide range of work

with and for the public, informed by a conceptual context. The editors acknowledge the imprecision bedeviling attempts to define public history, and use this book as an opportunity to shape the field by taking a deliberately broad view. They include professional historians who work outside the academy in a range of institutions and sites, and those who are politically committed to communicating history to the wide range of audiences. This volume provides the information and inspiration needed by a practitioner to succeed in the wide range of workplaces that characterizes public history today, for university teachers of public history to assist their students, and for working public historians to keep up to date with recent research. This handbook locates public history as a professional practice within an intellectual framework that is increasingly transnational, technological, and democratic. While the nation state remains the primary means of identification, increased mobility and the digital revolution have occasioned a much broader outlook and awareness of the world beyond national borders. It addresses squarely the tech-savvy, media-literate citizens of the world, the digital natives of the twenty-first century, in a way that recognizes the revolution in shared authority that has swept museum work, oral history, and much of public history practice. This volume also provides both currently practicing historians and those entering the field a map for understanding the historical landscape of the future: not just to the historiographical debates of the academy but also the boom in commemoration and history outside the academy evident in many countries since the 1990s, which now constitutes the historical culture in each country. Public historians need to understand both contexts, and to negotiate their implications for questions of historical authority and the public historian's work. The boom in popular history is characterized by a significant increase in both making and consuming history in a range of historical activities such as genealogy, family history, and popular collecting; cultural tourism, historic sites, and memorial museums; increased memorialization, both formal and informal, from roadside memorials to state funded shrines and memorial Internet sites; increased publication of historical novels, biographies, and movies and TV series set in the past. Much of this, as well as a vast array of new community cultural projects, has been facilitated by the digital technologies that have increased the accessibility of historical information, the democratization of practice, and the demand for sharing authority.

masters in public history online: *Slavery and Public History* James Oliver Horton, Lois E. Horton, 2014-03-25 "A fascinating collection of essays" by eminent historians exploring how we teach, remember, and confront the history and legacy of American slavery (Booklist Online). In recent years, the culture wars have called into question the way America's history of slavery is depicted in books, films, television programs, historical sites, and museums. In the first attempt to examine the historiography of slavery, this unique collection of essays looks at recent controversies that have played out in the public arena, with contributions by such noted historians as Ira Berlin, David W. Blight, and Gary B. Nash. From the cancellation of the Library of Congress's "Back of the Big House" slavery exhibit at the request of the institution's African American employees, who found the visual images of slavery too distressing, to the public reaction to DNA findings confirming Thomas Jefferson's relationship with his slave Sally Hemings, *Slavery and Public History* takes on contemporary reactions to the fundamental contradiction of American history—the existence of slavery in a country dedicated to freedom—and offers a bracing analysis of how Americans choose to remember the past, and how those choices influence our politics and culture. "Americans seem perpetually surprised by slavery—its extent (North as well as South), its span (over half of our four centuries of Anglo settlement), and its continuing influence. The wide-ranging yet connected essays in [this book] will help us all to remember and understand." —James W. Loewen, author of *Sundown Towns*

masters in public history online: *Motivation and Momentum in Adult Online Education* Lyn, Amy E., Broderick, Maggie, 2023-04-25 Online education has created an ever-expanding number of programs. Adult online learners are diverse and have varied talents, challenges, and motivations. They choose online learning for its convenience and accessibility, but the online learning environment can be flat and two-dimensional. Adult online learners can then become disengaged and disconnected—especially if the online learning experience does not support their social-emotional needs. More research on supporting the whole learner in adult online classrooms is required. *Motivation and Momentum in Adult Online Education* highlights unique and varied approaches to adult learners' motivation and momentum in online education. It provides examples of strategies, tools, and practices educators and educational institutions use to encourage and support adult learners' motivation and momentum across a variety of online educational programs. Covering topics such as academic coaching, faculty-student interaction, and student engagement, this premier reference source is an excellent resource for higher education leaders, professors, course instructors, advisors, curriculum developers, instructional designers, lifelong learning application developers, professionals in student support services, librarians, researchers, and academicians.

masters in public history online: *The Hispanic-Anglosphere from the Eighteenth to the Twentieth Century* Graciela Iglesias-Rogers, 2021-04-26 The Hispanic and Anglo worlds are often portrayed as the Cain and Abel of Western culture, antagonistic and alien to each other. This book challenges such view with a new critical conceptual framework - the 'Hispanic-Anglosphere' - to

open a window into the often surprising interactions of individuals, transnational networks and global communities that, it argues, made of the British Isles (England, Ireland, Scotland, Wales, the Channel Islands and the Isle of Man) a crucial hub for the global Hispanic world, a launching-pad and a bridge between Spanish Europe, Africa, America and Asia in the late eighteenth to the early twentieth centuries. Perhaps not unlike today, that was a time marked by social uncertainty, pandemics, the dislocation of global polities and the rise of radicalisms. The volume offers insights on many themes including trade, the arts, education, language, politics, the press, religion, biodiversity, philanthropy, anti-slavery and imperialism. Established academics and rising stars from different continents and disciplines combined original, primary research with a wide range of secondary sources to produce a rich collection of ten case-studies, 25 biographies and seven samples of interpreted material culture, all presented in an accessible style appealing to scholars, students and the general reader alike. Chapters Introduction; Chapter 1 (Section 1); Chapter 5 (Section 1); Section II; Afterword) of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons [Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND)] 4.0 license.

masters in public history online: *The Kansas Journey* Jennie A. Chinn, 2005

masters in public history online: Preservation Education Barry L. Stiefel, Jeremy C. Wells, 2014-09-02 Over the past twenty years, there has been a fundamental shift in the institutional organization of historic preservation education. Historic preservation is the most recent arrival in the collection of built environment disciplines and therefore lacks the pedagogical depth and breadth found in allied endeavors such as architecture and planning. As the first degree programs in preservation only date to the 1970s and the first doctoral programs to the 1990s, new faculty are confronted with pedagogical challenges that are unique to this relatively nascent field. Based on a conference that included educators from around the world, Barry L. Stiefel and Jeremy C. Wells now present a collection that seeks to address fundamental issues of preservation pedagogy, outcome-based education and assessment, and global issues of authenticity and significance in historic preservation. The editors argue that the subject of the analysis has shifted from, What is the best way to fix a historic building? to, What are the best ways for teaching people how to preserve historic properties (and why) according to the various standards that have been established? This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines.

masters in public history online: Sites of Popular Music Heritage Sara Cohen, Robert Knifton, Marion Leonard, Les Roberts, 2014-08-27 This volume examines the location of memories and histories of popular music and its multiple pasts, exploring the different 'places' in which popular music can be situated, including the local physical site, the museum storeroom and exhibition space, and the digitized archive and display space made possible by the internet. Contributors from a broad range of disciplines such as archive studies, popular music studies, media and cultural studies, leisure and tourism, sociology, museum studies, communication studies, cultural geography, and social anthropology visit the specialized locus of popular music histories and heritage, offering diverse set of approaches. Popular music studies has increasingly engaged with popular music histories, exploring memory processes and considering identity, collective and cultural memory, and notions of popular culture's heritage values, yet few accounts have spatially located such trends to focus on the spaces and places where we encounter and engender our relationship with popular music's history and legacies. This book offers a timely re-evaluation of such sites, reinserting them into the narratives of popular music and offering new perspectives on their function and significance within the production of popular music heritage. Bringing together recent research based on extensive fieldwork from scholars of popular music studies, cultural sociology, and museum studies, alongside the new insights of practice-based considerations of current practitioners within the field of popular music heritage, this is the first collection to address the interdisciplinary interest in situating popular music histories, heritages, and pasts. The book will therefore appeal to a wide and growing academic readership focused on issues of heritage, cultural

memory, and popular music, and provide a timely intervention in a field of study that is engaging scholars from across a broad spectrum of disciplinary backgrounds and theoretical perspectives.

masters in public history online: *Preserving Popular Music Heritage* Sarah Baker, 2015-05-01
There is a growing awareness around the world of the pressing need to archive the material remnants of popular music so as to safeguard the national and local histories of this cultural form. Current research suggests that in the past 20 or so years there has been an expansion of DIY heritage practice, with the founding of numerous DIY popular music institutions, archives and museums around the world. This edited collection seeks to explore the role of DIY or Pro-Am (Professional-Amateur) practitioners of popular music archiving and preservation. It looks critically at ideas around DIY preservationism, self-authorised and unauthorised heritage practice and the DIY institution, while also unpacking the potentialities of bottom-up, community-based interventions into the archiving and preservation of popular music's material history. With an international scope and an interdisciplinary approach, this is an important reference for scholars of popular music, heritage studies and cultural studies.

masters in public history online: *Reframing the Past* Mia E. M. Treacey, 2016-02-26
Reframing the Past traces what historians have written about film and television from 1898 until the early 2000s. Mia Treacey argues that historical engagement with film and television should be reconceptualised as Screened History: an interdisciplinary, international field of research to incorporate and replace what has been known as 'History and Film'. It draws from the fields of Film, Television and Cultural Studies to critically analyse key works and connect past scholarship with contemporary research. Reconsidered as Screened History, the works of Pierre Sorlin, Marc Ferro, John O'Connor, Robert Rosenstone and Robert Toplin are explored alongside lesser known but equally important contributions. This book identifies a number of common themes and ideas that have been explored by historians for decades: the use of history on film and television as a way to teach the past; the challenge of filmic and televisual history to more traditional historiography; and an ongoing battle to find an 'appropriate' historical way to engage with Film Studies and Theory. Screened History offers an approach to exploring History, Film and Television that allows room for future developments, while connecting them to a rich and diverse body of past scholarship. Combining a narrative of historical research on film and television over the past century with a reconceptualisation of the field as Screened History, Reframing the Past is essential reading both for established scholars of History and Film, Film History and other related disciplines, and to students new to the field.

masters in public history online: *Collections Care and Stewardship* Juilee Decker, 2015-07-15 *Collections Care and Stewardship: Innovative Approaches for Museums* considers best practices and innovations related to documenting collections with regard to movement and safe handling of items for transport, display, photography, and treatment; collections storage; and information-sharing within and beyond the museum. The case studies in this volume examine best practices and innovations related to collections with regard to display, interpretation, engagement, storage, conservation treatment, and preservation. Several chapters address undergraduate and graduate coursework and internship experiences in a variety of contexts to offer best practices as well as evaluation of such training opportunities. All of these case studies ask us to think about the responsibilities that we have, as museum professionals, to be stewards—a challenge for all of us in terms of the obligations and responsibilities therein, but also in terms of the challenge to frame our collections as having the capacity to reflect as well as inspire. The *Innovative Approaches for Museums* series offers case studies, written by scholars and practitioners from museums, galleries, and other institutions, that showcase the original, transformative, and sometimes wholly re-invented methods, techniques, systems, theories, and actions that demonstrate innovative work being done in the museum and cultural sector throughout the world. The authors come from a variety of institutions—in size, type, budget, audience, mission, and collection scope. Each volume offers ideas and support to those working in museums while serving as a resource and primer, as much as inspiration, for students and the museum staff and faculty training future professionals who will further develop future innovative approaches. masters in public history online: *Routledge Handbook of University-Community Partnerships in Planning Education* Megan E. Heim LaFrombois, Jay Mittal, 2023-10-11 This handbook explores two guiding questions – how can university-community partnerships in planning education work, and how can they be transformative? University-community partnerships – often referred to as service-learning or community-engaged teaching and learning – are traditionally based on a collaborative relationship between an academic partner and a community-based partner, in which students from the academic partner work within the community on a project. Transformational approaches to university-community partnerships are approaches that develop and sustain mutually beneficial collaborations where knowledge is co-created and new ways of knowing and doing are discovered. This edited volume examines a variety of university-community partnerships in planning education, from a number of different perspectives, with a focus on transformative models. The

authors explore broader theoretical issues, including topics relating to pedagogy, planning theory, and curriculum; along with more practical topics relating to best practices, logistics, institutional support, outcome measures, and the various forms these partnerships can take – all through an array of case studies. The authors, which include academics, professional practitioners, academic practitioners, and students, bring an incredible depth and breadth of knowledge and experience from across the globe – Australia, Canada, Chile, Europe (including Germany, Spain, Slovakia, and Sweden), India, Jamaica, South Korea, and the United States.

masters in public history online: A Cultural History of Furniture in the Modern Age Claire I. R. O'Mahony, 2022-02-24 Furniture is a unique witness to the transformations of private and public experience amidst the upheavals of the 20th century: how we work, rest, and play are determined by the embodied encounter with furniture, defining and projecting a sense of identity and status, responding to and exemplifying contrasting social conditions, political and economic motivations, aesthetic predilections, and debates. Assessing physical and archival evidence drawn from a spectrum of iconic and under-represented case studies, an international team of design historians collaborate in this volume to explore key methodological questions about how the production, consumption, and mediation of furniture reveal shifting cultural habits and histories across diverse contexts amidst modernity. Drawing upon a wealth of visual and textual sources, this volume of A Cultural History of Furniture presents essays that examine key characteristics of the furniture of the modern period on the themes of design and motifs; makers, making, and materials; types and uses; the domestic setting; the public setting; exhibition and display; furniture and architecture; visual representations; and verbal representations.
