Recreational Therapy Goals and Objectives: Enhancing Well-Being Through Purposeful Leisure

recreational therapy goals and objectives form the foundational framework guiding therapists in using leisure activities as a powerful tool for improving the physical, emotional, cognitive, and social well-being of individuals. Whether working with people recovering from injury, managing chronic illness, or facing mental health challenges, recreational therapy aims to restore function, boost confidence, and encourage meaningful participation in everyday life. By understanding these goals and objectives, both practitioners and clients can better appreciate how recreational therapy transforms lives through intentional, enjoyable experiences.

Understanding Recreational Therapy and Its Purpose

Recreational therapy, often referred to as therapeutic recreation, is a specialized form of treatment that employs recreational activities to address various health conditions. Unlike casual leisure, recreational therapy is goal-oriented and tailored to meet the unique needs of each individual. The ultimate aim is to improve quality of life by fostering independence, enhancing coping skills, and encouraging social interaction.

At its core, recreational therapy blends creativity with clinical practices. Therapists might use activities such as sports, arts and crafts, music, gardening, or community outings to engage clients in meaningful ways. Each activity is purposefully selected and adapted to promote healing, increase function, and support mental health.

Key Recreational Therapy Goals and Objectives Explained

Setting clear and measurable goals is essential in recreational therapy to ensure progress and effectiveness. These objectives are typically personalized, based on the client's diagnosis, interests, and abilities, but several common themes run through most treatment plans.

1. Enhancing Physical Health and Mobility

For many clients, improving physical capabilities is a central goal. Recreational therapy can help increase strength, coordination, endurance, and flexibility. Activities such as swimming, hiking, or adaptive sports are often incorporated to encourage movement in a fun and motivating context.

Objectives related to physical health might include:

- Increasing range of motion in affected limbs
- Improving cardiovascular fitness through aerobic activities
- Enhancing balance and coordination to reduce fall risk
- Promoting fine motor skills via crafts or games

By working towards these targets, clients often experience better overall physical health and greater independence in daily tasks.

2. Promoting Emotional and Psychological Well-Being

Emotional health is a vital focus of recreational therapy, especially for individuals coping with depression, anxiety, PTSD, or chronic pain. Recreational activities can serve as an outlet for self-expression, stress relief, and building self-esteem.

Common goals include:

- Reducing feelings of isolation and loneliness through group involvement
- Improving mood and decreasing symptoms of anxiety or depression
- Enhancing coping strategies for dealing with stress or trauma
- Encouraging positive self-identity through mastery of new skills

Therapeutic recreation provides a safe and supportive environment where clients can process emotions and build resilience through enjoyable experiences.

3. Developing Cognitive Skills and Mental Function

Cognitive rehabilitation is another important aspect of recreational therapy, particularly for individuals recovering from brain injuries, strokes, or neurological disorders. Activities designed to stimulate the mind can help improve memory, attention, problem-solving, and executive functioning.

Objectives often focus on:

- Enhancing concentration and sustained attention
- Improving memory recall and information processing
- Strengthening decision-making and planning abilities
- Encouraging creativity and critical thinking through arts or games

These cognitive gains can translate into better performance in everyday activities and increased

independence.

4. Fostering Social Interaction and Community Integration

Social isolation can significantly impact mental and physical health. Recreational therapy places strong emphasis on building social skills and encouraging participation in community life. Group activities and outings help clients develop meaningful relationships and feel connected.

Goals in this area might include:

- Increasing social engagement through group sports or clubs
- Teaching communication and interpersonal skills
- Encouraging teamwork and cooperation
- Facilitating community involvement and volunteerism

By achieving these objectives, clients often experience improved self-confidence and a greater sense of belonging.

How Recreational Therapy Goals Are Set and Measured

Setting recreational therapy goals involves collaboration between the therapist, client, and sometimes family members or caregivers. This client-centered approach ensures that objectives align with the individual's desires and realistic capabilities.

Assessment and Personalized Planning

The process begins with a thorough assessment of the client's physical, emotional, cognitive, and social needs. Therapists utilize standardized tools and personal interviews to identify strengths, challenges, and interests. Together, they develop specific, measurable, achievable, relevant, and time-bound (SMART) goals that guide treatment.

Tracking Progress and Adapting Goals

Progress is regularly evaluated through observation, client feedback, and formal assessments. If goals are met or obstacles arise, therapists adjust the objectives or activities to maintain motivation and maximize benefits. This dynamic approach ensures that recreational therapy remains effective and relevant

throughout the recovery or maintenance process.

Examples of Recreational Therapy Objectives in Different Settings

Recreational therapy spans a wide range of environments, from hospitals and rehabilitation centers to community programs and nursing homes. The goals and objectives naturally differ depending on the setting and population served.

In Rehabilitation Centers

Patients recovering from surgery or injury might focus on regaining mobility, endurance, and confidence to return home and resume daily activities. Objectives could include increasing walking distance, improving hand dexterity, or participating in group exercises.

In Mental Health Facilities

Clients dealing with mood disorders or substance abuse often work on building coping mechanisms, reducing isolation, and enhancing self-esteem. Objectives might involve engaging in mindfulness activities, participating in group art therapy, or developing a routine of leisure activities to manage cravings.

In Senior Living Communities

Older adults may concentrate on maintaining cognitive function, preventing loneliness, and staying physically active. Goals here might include joining social clubs, practicing memory games, or engaging in gentle exercise classes.

Tips for Maximizing the Impact of Recreational Therapy Goals

To get the most out of recreational therapy, it's important to approach the goals and objectives thoughtfully:

- **Be Person-Centered:** Tailor activities and goals to the client's preferences and cultural background to boost engagement.

- **Set Realistic Milestones:** Break down larger goals into smaller, achievable steps to maintain motivation and track progress.
- **Encourage Consistency:** Regular participation enhances skill development and emotional benefits.
- **Include Family and Caregivers:** Their support can reinforce progress and encourage community integration.
- **Celebrate Successes:** Recognizing achievements, no matter how small, fosters confidence and continued effort.

The Role of Technology in Recreational Therapy Goals

Advances in technology have opened new possibilities for recreational therapy. Virtual reality, video games, and mobile apps are increasingly used to engage clients in stimulating and accessible ways. These tools can offer customized exercises, cognitive challenges, and social interaction opportunities, expanding the scope and flexibility of therapeutic recreation.

Integrating technology can make goal-setting more interactive and track progress with precision, particularly for younger clients or those with limited mobility.

Exploring recreational therapy goals and objectives reveals a holistic and dynamic approach to health and healing. By focusing on purposeful leisure activities, recreational therapists empower individuals to overcome challenges, rediscover joy, and build skills that enhance their lives every day. Whether through physical rehabilitation, emotional support, cognitive stimulation, or social connection, the thoughtful application of these goals ensures recreational therapy remains a vital and transformative field.

Frequently Asked Questions

What are the primary goals of recreational therapy?

The primary goals of recreational therapy are to improve a person's physical, emotional, cognitive, and social functioning through recreational activities, enhancing their overall quality of life and promoting independence.

How do recreational therapy objectives differ from goals?

Goals are broad, long-term outcomes that recreational therapy aims to achieve, such as improving social

skills or physical fitness, while objectives are specific, measurable steps taken to reach those goals within a set timeframe.

What are common objectives used in recreational therapy for mental health?

Common objectives include reducing anxiety and depression symptoms, improving coping skills, increasing social interaction, and enhancing self-esteem through structured recreational activities.

How are recreational therapy goals tailored to individual clients?

Goals are tailored based on a comprehensive assessment of the client's physical abilities, interests, needs, and therapeutic outcomes desired, ensuring activities are personalized to maximize engagement and benefit.

Why is setting measurable objectives important in recreational therapy?

Measurable objectives provide clear criteria to track progress, evaluate effectiveness of interventions, and make necessary adjustments to ensure that therapeutic goals are being met successfully.

Recreational Therapy Goals and Objectives: Enhancing Well-being Through Purposeful Activity

Recreational therapy goals and objectives form the cornerstone of a structured approach to improving individuals' physical, emotional, cognitive, and social well-being through leisure activities. As a professional discipline, recreational therapy utilizes planned recreational interventions tailored to meet the diverse needs of populations ranging from children with developmental disabilities to older adults recovering from illness or injury. Understanding the goals and objectives inherent in recreational therapy not only clarifies its therapeutic value but also guides practitioners in designing effective treatment plans that foster holistic recovery and sustained quality of life.

Understanding Recreational Therapy: Purpose and Practice

Recreational therapy, also known as therapeutic recreation, is a clinical and evidence-based practice that employs leisure activities as a medium for rehabilitation, health promotion, and community integration. Its primary aim is to enable individuals with illnesses, disabilities, or psychological challenges to develop skills, foster social connections, and regain independence. Unlike general leisure or entertainment, recreational therapy is intentionally structured with specific therapeutic goals and objectives that align with clients' physical, emotional, cognitive, and social needs.

The goals and objectives in recreational therapy serve multiple functions. They provide measurable benchmarks for client progress, inform treatment strategies, and ensure that interventions remain client-centered and outcome-focused. These therapeutic aims are often integrated within interdisciplinary healthcare teams, emphasizing collaboration among physical therapists, occupational therapists, psychologists, and recreational therapists to deliver comprehensive care.

Core Recreational Therapy Goals and Their Significance

At the heart of recreational therapy lies a set of broad goals designed to improve functional abilities and enhance overall quality of life. These goals typically include:

1. Physical Rehabilitation and Enhancement

One fundamental goal is to improve physical functioning through activities that promote strength, endurance, coordination, and flexibility. For example, adapting sports or exercise programs to suit clients' capabilities can aid in recovery from injuries or chronic conditions like arthritis. The physical aspect of recreational therapy not only supports bodily health but also contributes to increased independence and mobility.

2. Cognitive and Emotional Development

Recreational therapy objectives frequently target cognitive functions such as memory, attention, problem-solving, and decision-making. Activities like puzzles, strategy games, or creative arts are used to stimulate mental processes and enhance emotional regulation. These interventions are particularly beneficial for individuals with brain injuries, dementia, or mental health disorders, helping to reduce anxiety, depression, and cognitive decline.

3. Social Integration and Relationship Building

Socialization is a vital component of human well-being. Recreational therapy aims to cultivate social skills, encourage teamwork, and reduce feelings of isolation through group activities and community outings. Whether it's participating in group sports, clubs, or volunteer projects, these objectives support clients in developing meaningful relationships and improving communication.

4. Leisure Education and Lifestyle Management

Teaching clients how to engage in leisure activities independently is another essential goal. Recreational therapy encourages the development of hobbies and interests that can be sustained beyond clinical settings, promoting lifelong wellness. Leisure education empowers individuals to manage stress, maintain a balanced lifestyle, and improve overall life satisfaction.

Establishing Specific Objectives: Tailoring Therapy to Client Needs

While overarching goals provide direction, recreational therapy objectives are often highly individualized and measurable to track progress effectively. These objectives are aligned with clients' unique conditions, preferences, and rehabilitation stages. A well-crafted objective typically follows the SMART criteria—Specific, Measurable, Achievable, Relevant, and Time-bound.

Examples of Common Recreational Therapy Objectives

- **Enhance physical endurance:** Client will increase walking distance from 100 to 300 meters within six weeks through structured walking programs.
- **Improve social interaction:** Client will participate in weekly group activities, demonstrating the ability to initiate and maintain conversations.
- **Develop coping strategies:** Client will utilize at least two relaxation techniques during leisure activities to manage anxiety symptoms by the end of a four-week period.
- **Increase cognitive function:** Client will complete memory and attention exercises with 80% accuracy within eight weeks.

These objectives not only provide clarity for therapists but also motivate clients by setting attainable milestones that reflect tangible improvements.

Integrating Recreational Therapy Goals and Objectives in Various Settings

Recreational therapy is employed across a wide spectrum of settings, each requiring tailored goals and objectives based on the population served. These settings include hospitals, rehabilitation centers, nursing homes, schools, and community programs.

Rehabilitation Centers and Hospitals

In medical environments, recreational therapy goals often emphasize physical recovery and functional independence. Objectives might focus on regaining motor skills or coping with chronic pain through adaptive sports and relaxation techniques. The integration with medical care ensures that recreational therapy complements physical and occupational therapies for holistic rehabilitation.

Long-Term Care and Assisted Living Facilities

For elderly populations, recreational therapy aims to maintain cognitive function, prevent social isolation, and promote emotional well-being. Activities such as reminiscence therapy, arts and crafts, and gentle exercise are tailored to preserve autonomy and foster community engagement among residents.

Educational Institutions

In schools, recreational therapy supports children with developmental, behavioral, or emotional challenges. Goals emphasize social skill development, self-esteem enhancement, and academic engagement through structured play and leisure activities.

Challenges and Considerations in Setting Effective Recreational Therapy Goals

While recreational therapy goals and objectives provide critical structure, setting them involves nuanced considerations. Therapists must balance ambitious targets with realistic expectations, accounting for clients' motivation levels, medical limitations, and environmental factors. Moreover, cultural sensitivity and personal preferences play a significant role in selecting meaningful activities that resonate with clients.

One challenge lies in quantifying subjective outcomes such as improved mood or social satisfaction. To address this, therapists often use standardized assessment tools alongside client self-reports to evaluate progress comprehensively. Additionally, maintaining client engagement requires flexibility; goals and objectives should be revisited and adjusted to reflect changing needs and circumstances.

The Impact of Recreational Therapy Goals on Client Outcomes

The strategic formulation of recreational therapy goals and objectives has been linked to improved clinical outcomes and enhanced client satisfaction. Research indicates that goal-oriented recreational therapy can reduce hospital stays, decrease reliance on medications for mood disorders, and improve functional independence. Furthermore, clients involved in goal-setting processes tend to demonstrate higher motivation and adherence to treatment plans.

By targeting multifaceted aspects of health—physical, cognitive, emotional, and social—recreational therapy fosters a holistic approach that aligns with modern healthcare paradigms emphasizing patient-centered care and quality of life.

Recreational therapy goals and objectives ultimately serve as a roadmap for transforming leisure into purposeful, therapeutic experiences. As the field continues to evolve with emerging evidence and innovative practices, the precision and personalization of these goals will remain central to maximizing the potential benefits of recreational therapy across diverse populations.

recreational therapy goals and objectives: Introduction to Writing Goals and Objectives

Suzanne Melcher, 1999 Since length of stay in hospitals continues to decrease, and insurance companies focus on documentation for reimbursement, it is vital for recreation professionals to master documentation issues -- especially those of writing goals and objectives with their patients and clients. Well-written goals and objectives keep treatment on target and measurable, and assist with justification of services. This manual offers basic techniques that students, interns, and entry-level professionals need to gain confidence when developing and writing goals and objectives with their clients and patients. The exercises and case studies in this manual offer scenarios to help users build confidence by practicing the fundamentals of better documentation which will serve patients and clients, recreation therapists, hospitals, community settings, and outside reviewing organizations.

recreational therapy goals and objectives: Recreation Therapy , 1985

recreational therapy goals and objectives: Reference Manual for Writing Effective Goals and Objectives in Recreational Therapy Jenn Taylor, Lori Ann Eldridge, Tara Delong, 2023 Creating individualized recreational therapy treatment plans that contain long-term goals, measurable objectives, and interventions is made easier with the Reference Manual for Writing Effective Goals and Objectives in Recreational Therapy. Target areas in the manual are organized by the six dimensions of well-being: leisure, psychological/emotional, cognitive, social, physical, and spiritual. The three authors then present an efficient method of writing appropriate goals and objectives while providing hundreds of examples for RTs to individualize based on client needs. RTs working with children in preschool through older adults can develop individualized treatment plans quickly and systematically by selecting from the book's numerous examples appropriate for common recreational therapy settings. Qualifiers provide endless combinations of tasks and challenges to document client progress. This valuable resource also includes: Discussion of the Flourishing through Leisure service-delivery model, A review of the International Classification of Functioning, Disability and Health (ICF), including common ICF codes used in RT, Easy-to-follow directions for writing your own goals and objectives, Reproducible worksheets for creating individualized goals and objectives. This material is based on the authors' diverse backgrounds of more than 50 years of experience as RT practitioners in the field and 25 years as faculty members in university RT programs. This is the book we have been waiting for!

recreational therapy goals and objectives: Adapted Physical Education and Sport Joseph P. Winnick, 2011 This new edition is updated to keep you current with today's trends in adapted physical education and sport and new chapters, major chapters, revisions and an increased emphasis on best practise

recreational therapy goals and objectives: Therapeutic Recreation Marcia Jean Carter, Glen E. Van Andel, 2011-02-17 A long-standing tradition of excellence is extended in the Fourth Edition of this authoritative introduction to the field of therapeutic recreation. The authors effectively combine a broad orientation to the profession with the practical information necessary for students to become successful practitioners. Part I contains a comprehensive discussion of the field's history and theoretical underpinnings, providing students with the perspective they need to evaluate the social, cultural, demographic, economic, and technical forces that have shaped and are continuing to impact health and human services in general, and therapeutic recreation in particular. Part II introduces students to the client populations served by therapeutic recreation specialists and describes specific approaches and activities employed by TR professionals to help clients achieve meaningful improvements in health status, functional capacities, and quality of life. The authors have retained the practical, student-oriented approach that makes this an ideal text for introductory courses. They address all content areas included in the NCTRC certification exam, are compatible with the American Psychiatric Association on psychological classifications, and incorporate the World Health Organization's international classification of functioning, disability, and health. The latest edition contains updated information on baby boomers, the obesity epidemic, and evidence-based practices; field-based photographs and illustrations; and study questions and exercises designed to engage students.

recreational therapy goals and objectives: *Foundations of Therapeutic Recreation* Terry Long, Terry Robertson, 2020 Foundations of Therapeutic Recreation, Second Edition, provides students with evidence-based information on fundamental concepts in therapeutic recreation to help them explore the various career possibilities in the field.

recreational therapy goals and objectives: Horticultural Therapy Methods Rebecca L. Haller, Christine L. Capra, 2025-04-29 Horticultural Therapy Methods: Connecting People and Plants in Health Care, Human Services, and Therapeutic Programs was the first text to describe the processes and techniques used to provide horticultural therapy interventions, and the rationale for their use. The first edition was written to positively impact the professional practice of horticultural therapy and provide an array of strategies for horticultural therapy treatment. Prior to its publication, the topics had only been addressed by other allied professions but had not been specifically tailored for

horticultural therapy. The second edition updated the material, added essential information on planning treatment sessions, and provided techniques to address treatment issues for mental health, physical health, vocational skills, and wellness. This third edition revises all chapter content, improves and expands appendices, adds a chapter on building relationships, provides new photos, and includes additional case examples, in addition to providing discussion questions, references, further reading, and key concepts. Horticultural Therapy Methods is a clear instructive manual that explains: The process of treatment planning in horticultural therapy Session development, including activity or task selections to meet treatment objectives Therapeutic use of self and relationship building Motivation and behavior management techniques Adaptations and modifications to enable and challenge program participants How to maximize active engagement in horticulture and cultivation of plants Treatment documentation guidelines Practical approaches for mental health and other areas of practice Horticultural Therapy Methods: Connecting People and Plants in Health Care, Human Services, and Therapeutic Programs, Third Edition, is a reference and guide for students, educators, and those using horticulture for therapeutic purposes to help construct effective treatment programs. Health care and human service professionals can use this reference in the therapy, treatment, and education of inmates, residents, patients, trainees, students and others. The aim of this book is to guide novice and experienced horticultural therapists to use accepted human service practices that are aligned with allied professions.

recreational therapy goals and objectives: Therapeutic Recreation Journal , 1992

recreational therapy goals and objectives: Essentials of Treatment Planning Mark E. Maruish, 2019-11-12 Essentials of Treatment Planning, Second Edition is an updated and easy-to-use guide to the development and use of treatment plans for behavioral health care patients. The book incorporates current research and developments in treatment planning that have occurred since the publication of the first edition. Designed as a nuts-and-bolts guide, the book covers essential material such as the role and benefits of treatment planning in a clinical setting, approaches for conducting comprehensive patient assessments, the use of assessment information to develop individual treatment plans, and strategies for ongoing evaluations and revisions of treatment plans. Essentials of Treatment Planning, Second Edition explores how to develop and use treatment plans to strengthen the entire treatment process. An important component in documentation, accurate treatment plans provide myriad benefits, including: meeting the accountability criteria of insurers and behavioral health care organizations, enhancing efficient coordination of care with other health care professionals, and facilitating better communication with outside reviewers. In addition, behavioral health professionals—psychologists, psychiatrists, clinical social workers, mental health and substance use counselors, and others—may gain the added security of protection from certain

types of litigation. As part of the Essentials of Mental Health Practice series, the second edition of Essentials of Treatment Planning contains the information busy behavioral health professionals need to practice knowledgeably, efficiently, and ethically in today's behavioral health care environment. Each chapter features numerous callout boxes highlighting key concepts, bulleted points, and extensive illustrative material, as well as Test Yourself questions that help gauge and reinforce your grasp of the information covered.

recreational therapy goals and objectives: Community-Based Integrated Care for Older Adults Matthew K. McNabney, 2022-08-16 Community-based integrated care (CBIC) is designed to keep older adults where they want to be - at home and out of hospitals and nursing homes. The Program of All-Inclusive Care for the Elderly (PACE) is an example of successful CBIC, established in 1985 as an innovative solution to pervasive issue: how to provide integrated care to a high-risk population of older adults that promotes community living (not a nursing home) in a cost-effective manner. This unique guide provides readers with a concise yet informative base of understanding of PACE as well as a "deep dive" into the components and job roles that will serve as a reference for existing PACE providers and will inform those who are considering the possibility of developing a new PACE program. Chapters are organized into five thematic sections. Part one presents both domestic and international perspectives on CBIC, with part two delving deeper into the US PACE model, including its history, policy evolution and effectiveness. Specifics regarding the organization and management of PACE and the essential roles and positions comprise parts three and four, respectively, from leadership and the involvement of the state to the roles of the social worker, nurse, nutritionist, rehabilitation specialist, and more. Care planning, coordination and end of life care round out part five. In addition to geriatricians and other clinical practitioners involved with the care of older patients, Community-Based Integrated Care for Older Adults is also a resource for scholars, policy makers and the general public who are interested in innovations in long-term care that provide older adults with alternatives to nursing homes.

recreational therapy goals and objectives: The Co-Occurring Disorders Treatment Planner, with DSM-5 Updates David J. Berghuis, Jack Klott, 2015-07-31 This timesaving resource features: Treatment plan components for 25 behaviorally based presenting problems Over 1,000 prewritten treatment goals, objectives, and interventions plus space to record your own treatment plan options A step-by-step guide to writing treatment plans that meet the requirements of most insurance companies and third-party payors The Co-Occurring Disorders Treatment Planner provides all the elements necessary to quickly and easily develop formal treatment plans that satisfy the demands of HMOs, managed care companies, third-party payors, and state and federal review agencies. A critical tool for mental health professionals treating patients coping simultaneously with mental illness and serious substance abuse Saves you hours of time-consuming paperwork, yet offers the freedom to develop customized treatment plans Organized around 25 main presenting problems with a focus on treating adults and adolescents with alcohol, drug, or nicotine addictions, and co-occurring disorders including depression, PTSD, eating disorders, and ADHD Over 1,000 well-crafted, clear statements describe the behavioral manifestations of each relational problem, long-term goals, short-term objectives, and clinically tested treatment options Easy-to-use reference format helps locate treatment plan components by behavioral problem Includes a sample treatment plan that conforms to the requirements of most third-party payors and accrediting agencies (including HCFA, JCAHO, and NCQA)

recreational therapy goals and objectives: Social Workers' Desk Reference Albert R. Roberts, Gilbert J. Greene, 2002 Following in the groundbreaking path of its predecessor, the second edition of the 'Social Workers' Desk Reference' provides reliable and highly accessible information about effective services and treatment approaches across the full spectrum of social work practice.

recreational therapy goals and objectives: Glossary of Recreation Therapy and Occupational Therapy David R. Austin, 2001 The Glossary of Recreation Therapy and Occupational Therapy will serve as a study guide for students and reference book for practitioners. From AA (Alcoholics Anonymous) to yoga, readers will find an eclectic listing encompassing a full range of approaches and a wide variety of activities. This glossary will be extremely beneficial for those preparing for national certification examinations or graduate school comprehensive exams. In addition to defining and/or describing almost 1,000 terms, this publication also includes approximately 300 abbreviations and symbols common to recreation therapy and occupational therapy professionals. This practical handbook will be sure to function as a valuable reference for years to come.

recreational therapy goals and objectives: Home Health Care Provider Emily Prieto, 2008-06-09 This book is designed to foster quality care to home care recipients. It is written for companions, home health aides, and other care givers who deliver non-medical home care. Prieto provides information, tips, and techniques on personal care routines as well as additional responsibilities that are often necessary in this work, including home safety and maintenance, meal planning, errand running, caring for couples, and making use of recreational time. Going beyond standard nurses' aide training manuals, the book focuses on the psycho-social needs of home care recipients, stressing the need to maintain the house as a home and sustaining the recipient's way of life throughout caregiving situations. Prieto stresses interpersonal skills that benefit recipient and caregiver, creating a systematic, easy-to-follow plan for delivering quality service and maintaining, or improving, quality of life.
