We Bought a Zoo: Where Is It Located?

WE BOUGHT A ZOO WHERE IS IT LOCATED is a question that frequently arises among fans of the 2011 film "We Bought a Zoo," as well as readers of the memoir by Benjamin Mee on which the movie is based. The story, which chronicles the incredible journey of a family purchasing and renovating a struggling zoo, has captivated audiences worldwide. However, the exact location of the zoo and the real-life backdrop of this heartwarming tale often remain unclear to many. This article delves into the geographical and historical context of the zoo, examining its significance, features, and how location influenced the narrative's development.

THE REAL-LIFE LOCATION OF THE ZOO

The zoo featured in "We Bought a Zoo" is the Dartmoor Wildlife Park, situated in Devon, England. This park is the actual place Benjamin Mee and his family purchased, and it provides the authentic setting for both the memoir and the film adaptation. Dartmoor Wildlife Park lies near the town of Bovey Tracey, on the edge of Dartmoor National Park, an area known for its rugged moorland and scenic beauty.

The park itself was established in the 1960s and had gained a modest reputation as a local attraction before falling into financial difficulties. When Benjamin Mee acquired it, the zoo was facing closure due to funding shortages and regulatory challenges. The location's rural nature, coupled with its proximity to natural landscapes, presented both opportunities and obstacles in reviving the facility.

SIGNIFICANCE OF THE LOCATION IN THE STORY

The Dartmoor Wildlife Park's location in Devon plays a crucial role in the narrative. The rural setting

UNDERScores the family's commitment to preserving a community treasure and highlights the logistical challenges of operating a zoo outside a major urban center. The remoteness adds a layer of complexity to animal care, visitor access, and infrastructure development, all of which are central themes in the memoir.

Moreover, the proximity to Dartmoor National Park enriches the story with a backdrop of natural beauty and ecological awareness. This setting allows for a narrative that intertwines human determination with environmental stewardship, reflecting the broader context of wildlife conservation in the UK.

FEATURES OF DARTMOOR WILDLIFE PARK

Understanding the characteristics of the Dartmoor Wildlife Park helps shed light on the scope of the project Benjamin Mee undertook. The park is relatively small compared to major zoological institutions, covering an area of approximately 30 acres. Despite its size, it houses a diverse collection of animals, ranging from exotic species to local wildlife.

ANIMAL COLLECTION AND CONSERVATION EFFORTS

At the time of purchase, the zoo was home to various species, including big cats, birds, primates, and reptiles. The diversity presented both challenges and opportunities for the Mee family. Maintaining suitable habitats and meeting the animals' complex needs required significant renovations and expertise.

Conservation efforts at Dartmoor Wildlife Park, while modest in scale compared to larger zoos, align with broader wildlife preservation goals. The location's natural environment allows for educational programs and breeding initiatives aimed at raising awareness about endangered species and habitat protection.

RENOVATION AND OPERATIONAL CHALLENGES

The rural location of Dartmoor Wildlife Park meant that infrastructure improvements were essential. Upgrading enclosures, ensuring compliance with animal welfare regulations, and attracting visitors in a less populated area demanded strategic planning and substantial investment.

Benjamin Mee's story highlights these challenges vividly, illustrating the difficulties of balancing financial constraints with ethical responsibilities. The family's experience underscores the broader realities faced by small zoos worldwide, particularly those situated outside metropolitan areas.

WHY LOCATION MATTERS: COMPARING WITH OTHER ZOOS

The location of Dartmoor Wildlife Park contrasts with many well-known zoological parks situated in or near large cities. Urban zoos benefit from higher foot traffic, diverse funding sources, and easier access to veterinary services and specialists. In contrast, rural zoos like Dartmoor Wildlife Park often rely heavily on community support and face logistical hurdles.

This contrast is evident when comparing Dartmoor with zoos such as London Zoo or Chester Zoo, both of which are larger and more centrally located. These institutions have greater resources to invest in research, conservation, and visitor amenities. However, smaller rural zoos play a vital role in local education and conservation efforts, often fostering close-knit community relationships.

PROS AND CONS OF A RURAL ZOO LOCATION

- **Pros:** Proximity to natural habitats can enhance animal welfare and educational programs; lower land costs; potential for unique visitor experiences in scenic surroundings.
- **Cons:** Limited visitor numbers due to accessibility issues; challenges in attracting skilled staff; higher costs for transportation of supplies and animals; difficulty in marketing and fundraising.

These factors contextualize the story of "We Bought a Zoo" and explain some of the hurdles the Mee family overcame.

IMPACT OF LOCATION ON PUBLIC PERCEPTION AND MEDIA

The location of Dartmoor Wildlife Park has also influenced public perception and media portrayal of the story. The British countryside setting adds a layer of charm and authenticity that resonates with audiences seeking a genuine connection to nature and animal welfare.

The film adaptation, although shot primarily in the United States, retains references to the English origins of the story, which serves to highlight the universal themes of family resilience and community spirit. The zoo's English location enriches the narrative, providing a tangible sense of place that grounds the story in reality.

TOURISM AND ECONOMIC IMPLICATIONS

Following the notoriety gained from the book and film, Dartmoor Wildlife Park experienced increased interest from tourists and animal enthusiasts. This surge has potential economic benefits for the local community, including job creation and heightened awareness of regional attractions.

However, sustaining this interest requires ongoing investment and strategic outreach, especially given the park's relatively remote location. The story of "We Bought a Zoo" serves as both inspiration and a case study for rural zoological parks seeking revitalization.

In summary, the answer to the question "We Bought a Zoo Where is it Located" is that the zoo is located at Dartmoor Wildlife Park in Devon, England. This location is integral to the story's emotional and logistical fabric, shaping the challenges and triumphs experienced by Benjamin Mee and his family. The rural setting underscores the unique nature of their endeavor, illustrating the intersection of family dedication, wildlife conservation, and community engagement.

we bought a zoo where is it located: We Bought a Zoo Benjamin Mee, 2011-04-20 NOW A MAJOR MOTION PICTURE The remarkable true story of a family who move into a rundown zoo—already a BBC documentary miniseries and excerpted in *The Guardian*. In the market for a house and an adventure, Benjamin Mee moved his family to an unlikely new home: a dilapidated zoo in the English countryside. Mee had a dream to refurbish the zoo and run it as a family business. His friends and colleagues thought he was crazy. But in 2006, Mee and his wife with their two children, his brother, and his 76-year-old mother moved into the Dartmoor Wildlife Park. Their extended family now included: Solomon, an African lion and scourge of the local golf course; Zak, the rickety Alpha wolf, a broadly benevolent dictator clinging to power; Ronnie, a Brazilian tapir, easily capable of killing a man, but hopelessly soppy; and Sovereign, a jaguar and would-be ninja, who has devised a long term escape plan and implemented it. Nothing was easy, given the family's lack of experience as zookeepers, and what follows is a magical exploration of the mysteries of the animal kingdom, the power of family, and the triumph of hope over tragedy. *We Bought a Zoo* is a profoundly moving portrait of an unforgettable family living in the most extraordinary circumstances.

The first two sections—*Evolutionary Myths Under the City* and *Urban Eco-trauma*—take more traditional ecocinema approaches and emphasize the city as a dangerous constructed space. The last two sections—*Urban Nature and Interdependence* and *The Sustainable City*—however, bring to life the vibrant relationships between human and nonhuman nature. *Ecocinema in the City* provides a space to explore these relationships, revealing how ecocinema shows that both human and nonhuman nature can interact sustainably and thrive.

How have we looked at animals in the past, and how do we look at them today? How have zoos presented themselves, and their purpose, over time? In response to the emergence of environmental and animal studies, anthropologists, sociologists, philosophers, theorists, literature scholars, and historians around the world have begun to explore the significance of zoological parks, past and present. *Zoo Studies* considers the modern zoo from a range of approaches and disciplines, united in a desire to blur the boundaries between human and nonhuman animals. The volume begins with an account of the first modern mental hospital, La Salpêtrière, established in 1656, and the first panoptical zoo, the menagerie at Versailles, created in 1662 by the same royal architect; the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies. From beginning to end, through interdisciplinary collaboration, this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants. This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals. An original and groundbreaking work, *Zoo Studies* will change the way readers see nonhuman animals and themselves.
