Marian Meyers interrogates the complex and often contradictory images of African American women in news media through detailed studies of national and local news, the mainstream and Black press, and traditional news outlets as well as newer digital platforms. She argues that previous studies of African Americans and the news have largely ignored the representations of women as distinct from men, and the ways in which socioeconomic class can be a determining factor in how Black women are portrayed in the news. Meyers also proposes that a pattern of paternalistic racism, as distinct from the modern racism found in previous studies of news coverage of African Americans, is more likely to characterize the media's treatment of African American women. Drawing on critical cultural studies and black feminist theory concerning representation and the intersectionality of gender, race and class, Meyers goes beyond the cultural myths and stereotypes of African American women to provide an updated portrayal of Black women today. African American Women in the News is ideal for courses on African American studies, American studies, journalism studies, media studies, sociology studies, women's studies and for professional journalists and students of journalism who seek to improve the diversity and sensitivity of their journalistic practice.

youtube where the wild things are: Hollywood Math and Aftermath J.D. Connor, 2018-08-23 Money is Hollywood's great theme-but money laundered into something else, something more. Money can be given a particular occasion and career, as box office receipts, casino winnings, tax credits, stock prices, lotteries, inheritances. Or money can become number, and numbers can be anything: pixels, batting averages, votes, likes. Through explorations of all these and more, J.D. Connor's Hollywood Math and Aftermath provides a stimulating and original take on "the equation of pictures," the relationship between Hollywood and economics since the 1970s. Touched off by an engagement with the work of Gilles Deleuze, Connor demonstrates the centrality of the economic image to Hollywood narrative. More than just a thematic study, this is a conceptual history of the industry that stretches from the dawn of the neoclassical era through the Great Recession and beyond. Along the way, Connor explores new concepts for cinema studies: precession and recession, pervasion and staking, ostension and deritualization. Enlivened by a wealth of case studies-from The Big Short and The Wolf of Wall Street to Equity and Blackhat, from Moneyball to 12 Years a Slave, Titanic to Lost, The Exorcist to WALLE, Déjà Vu to Upstream Color, Contagion to The Untouchables, Ferris Bueller to Pacific Rim, The Avengers to The Village-Hollywood Math and Aftermath is a bravura portrait of the industry coming to terms with its own numerical underpinnings.

youtube where the wild things are: *Building Character* Amy Cook, 2018-02-28 What can we learn about how we understand each other and ourselves by examining the casting we find on stage and film—the casting we find perfect and the casting we find wrong? *Building Character* examines how the process of “casting” an actor in a part creates a character and how this can be usefully understood through deploying theories from the cognitive sciences. A casting director may match the perceived qualities of an actor with the perceived qualities of the character, but the combination is also synergistic; casting a character creates qualities. While casting directors do this professionally, all of us do this when we make sense of the people around us. This book argues that we build the characters of others from a sea of stimuli and that the process of watching actors take on roles improves our ability to “cast” those roles in our daily lives. Amy Cook examines the visible celebrity casting, such as Robert Downey Jr. as Ironman or Judi Dench as Bond’s M, the political casting of one candidate as “presidential” and another as “weak,” the miscasting of racial profiling and sexual assault, and the counter casting that results when actors and characters are not where or who we expect.

Each work, though disparate in style, advocates for the empowerment of the Alaska Native people by connecting not only with diverse perspectives but with the lived realities in the geographical spaces that have formed them. In analyzing how these authors have succeeded in depicting the realities of alterities, and where they have perhaps fallen short by more recent standards, we may begin to carve out a system of ethics. This is important as fresh waves of travel writers search for their own place in the environmental conversations surrounding the ever-evolving, 21st century Arctic and its place on the front lines of a changing climate.

Conroy, 2014-02-18 *Food and Everyday Life* provides a qualitative, interpretive, and interdisciplinary examination of food and food practices and their meanings in the modern world. These studies highlight aspects of food production, distribution, and consumption, as well as the discourse on food. Chapters discuss examples ranging from the cultural meanings of food as represented on television, to the practices of food budgeting, to the cultural politics of such practices as sustainable brewing and developing new forms of urban agriculture. A number of the studies focus on the relationships between food, eating practices, and the body. Each chapter examines a particular (and in many instances, highly unique) food practice, and each includes some key details of that practice. Taken together, the chapters show us how the everyday practices of food are both familiar and, yet at the same time, ripe for further discovery.

She analyzes music videos by Beyoncé, Lady Gaga, Janelle Monáe, Kendrick Lamar, Anderson .Paak, and others to outline how sound and image enhance each other

Responding to today's political-media landscape through discussions of Fox News and Presidential inaugurations, Vernallis shows how a media literacy that exceeds newscasts and campaign advertising is central to engaging with the democratic commons. Forays into industry studies, neuroscience, and ethics also inform her readings. By creating our own content and knowing what corporations, the wealthy, and the government do through media, Vernallis contends, we can create a more just world.

youtube where the wild things are: *The Well-Read Game* Tracy Fullerton, Matthew Farber, 2025-03-25 How players evoke personal and subjective meanings through a new theory of player response. In *The Well-Read Game*, Tracy Fullerton and Matthew Farber explore the experiences we have when we play games: not the outcomes of play or the aesthetics of formal game structures but the ephemeral and emotional experiences of being in play. These are the private stories we tell ourselves as we play, the questions we ask, and our reactions to the game's intent. These experiences are called "readings" because they involve so many of the aspects of engaging with literary, cinematic, and other expressive texts. A game that is experienced in such a way can be called "well-read," rather than, or as well as, "well-played," because of the personal, interpretive nature of that experience and the way in which it relates to our reading of texts of all kinds. The concept of the "well-read game" exists at the convergence of literary, media, and play theories—specifically, the works of Louise Rosenblatt's reader-response theory, Brian Upton's situational game theory, Tracy Fullerton's playcentric design theory, and Bernie DeKoven's well-played game philosophy. Each of these theories, from their own perspective, challenges notions of a separate, objective, or authorial meaning in a text and underscores the richness that arises from the varied responses of readers, who coauthor the meaning of each text through their active engagement with it. When taken together, these theories point to a richer understanding of what a game is and how we might better value our experiences with games to become more thoughtful readers of their essential meanings.

At the threshold of in/articulacy, language can be said to 'thicken' and obscure the usual conditions of legibility or lexical meaning, becoming unfamiliar, flexible, incomplete, even absent. These 'thickening' moments alter and enrich literary processes and texts to initiate a paradigm shift in composition, translation and reading experiences. Interrogating this shift from the viewpoints of writers, translators and readers, Judy Kendall draws on translation studies, literary theory, anthropology, philosophy and physics and more to examine the practices of Semantic Poetry Translation, code-switching, made-up English, visual text, vital materiality and the material-discursive. Breaking new ground with her enactment of the ways in which creative writing can take an active and productive lead in research enquiries, Kendall looks at works including Old English riddles, Nigerian novels, J R. R. Tolkien's and Ursula K. Le Guin's narratives, Caroline Bergvall's hybrid works, Caryl Churchill's *The Skriker*, Patrick Chamoiseau's novels, *Zong!* and several other visual texts.

youtube where the wild things are: *Translating Children's Literature* Gillian Lathey, 2015-07-24 *Translating Children's Literature* is an exploration of the many developmental and linguistic issues related to writing and translating for children, an audience that spans a period of enormous intellectual progress and affective change from birth to adolescence. Lathey looks at a broad range of children's literature, from prose fiction to poetry and picture books. Each of the seven chapters addresses a different aspect of translation for children, covering: · Narrative style and the challenges of translating the child's voice; · The translation of cultural markers for young readers; · Translation of the modern picture book; · Dialogue, dialect and street language in modern children's literature; · Read-aloud qualities, wordplay, onomatopoeia and the translation of children's poetry; · Retranslation, retelling and reworking; · The role of translation for children

within the global publishing and translation industries. This is the first practical guide to address all aspects of translating children's literature, featuring extracts from commentaries and interviews with published translators of children's literature, as well as examples and case studies across a range of languages and texts. Each chapter includes a set of questions and exercises for students. Translating Children's Literature is essential reading for professional translators, researchers and students on courses in translation studies or children's literature.
