See what Wisconsinites first read about Abraham Lincoln's election and assassination, Custer's last stand against the Sioux, the first votes by women, Henry Ford's $5 daily wage, the Saint Valentine's Day mob massacre in Chicago, the disappearance of Amelia Earhart as she attempted to fly around the world . . . and the wars, elections, crimes, and social revolutions that have defined the past century and a half. Each front page, reproduced from the original, is readable down to the smallest type. In 2002 the Wisconsin State Journal celebrates its Sesquicentennial, marking one hundred and fifty years of service to the people of Madison and the State of Wisconsin. The newspaper had an earlier inception as the Madison Express in 1839, when Madison was a territorial town on the frontier and statehood was still nine years away. Readers will notice the newspaper's appearance has changed nearly as much as have the methods of gathering the news and producing the paper. But readers' fascination with and hunger for the news of each day remain strong.

    40 years ago today in history: *A History of History* Alun Munslow, 2012-12-20 In a provocative analysis of European and American historical thinking and practice since the early 18th century, A History of History confronts several basic assumptions about the nature of history. Among these are the concept of historical realism, the belief in representationalism and the idea that the past possesses its own narrative. What is offered in this book is a far-reaching and fundamental rethinking of realist and representationalist 'history of a particular kind' by addressing and explaining the ideas of major philosophers of history over the past three hundred years and those of the key theorists of today. In pursuing this radical analysis, the understanding of history as a narrative is evaluated along with contemporary notions such as the continuing presence of the past and the idea of 'its lessons'. Written by one of the leading thinkers on the subject, A History of History provides an accessible and radical history of history while offering new insights into the pressing questions of the nature, purpose and function of history. This book is an essential text for all students, teachers and consumers of history.

    40 years ago today in history: Stars at War Marvin D. Pipher, 2022-11-30 This book outlines the lives and achievements of one hundred entertainers and athletes, mostly Americans, who served their nations well, both in times of war and in times of peace. It spans the period from the Spanish American War, 1898, up to 2020, but concentrates most heavily on World War II. The book was initiated in response to an apparent difference noted between the reactions of entertainers and athletes to the events of September 11, 2001, and those following the attack on Pearl Harbor on

December 7, 1941. It began as an effort to understand who those earlier people were, what they did, and why; to identify the one hundred who did the most during World War II; and to rank them in accordance with their achievements. This proved to be an impossible task since there was no way to identify the one hundred, and there was no common basis for comparison: some were truly heroic, some were wounded and some killed, while others simply served to the best of their abilities. The best that could be done was to categorize the men and women selected and subjectively rank them with their peers. Over time, this effort expanded to be more inclusive: touching lightly upon the Spanish American War, World War I, the Korean War, Vietnam, the war on terror, and upon more recent events. Some of those presented herein served before becoming famous, some after; some volunteered and some were drafted, while others served as civilians in their chosen fields. Two became presidents of the United States. Three won the Congressional Medal of Honor. Aside from their service, however, these were truly remarkable men and women whose stories deserve to be told if for no other reason than to give us a glimpse into the kinds of people who made the United States the greatest nation in the history of the world.

Tichenor, 2009-12-23 This reference resource combines unique historical analysis, scholarly essays, and primary source documents to explore the evolution of ideas and institutions that have shaped American government and Americans' political behavior. A History of the U.S. Political System: Ideas, Interests, and Institutions is the first comprehensive resource that uses this approach to explore the evolution of the American political system from the adoption of the Constitution to the present. A History of the U.S. Political System is a three-volume collection of original essays and primary documents that examines the ideas, institutions, and policies that have shaped American government and politics throughout its history. The first volume is issues-oriented, covering governmental and nongovernmental institutions as well as key policy areas. The second volume examines America's political development historically, surveying its dynamic government era by era. Volume three is a collection of documentary materials that supplement and enhance the reader's experience with the other volumes.

This two-volume work includes nearly two hundred primary documents and images that narrate many aspects of United States history from the period before European contact and colonization through the twenty-first century. The sources assembled capture the voices of Americans of varied age, race, ethnicity, and gender, historical actors who represent not only diverse subject positions but also a wide variety of belief systems and varied circumstances. Combined with interpretive headnotes and discussion questions, the layered approaches of the contributors deliver an unusually complex and rich portrait of the American past while also offering readers glimpses of the many dimensions of the historians' craft.
