essentials of business communication 8th edition: *Collaborative Learning in a Global World* Miri Shonfeld, David Gibson, 2018-11-01 The 21st century has brought about changes in every aspect of life through ubiquitous technology and Internet-based social media. The distances between cultures and continents have narrowed, the world has become flat, and multicultural work-teams composed of members from different countries have become a daily reality in global businesses. However, in many ways these global changes in work practices have only just begun to have an impact on education. To better prepare students for the information age, researchers and policy makers largely agree about the skills needed for shared knowledge construction. Indeed, the education systems in several different countries have begun to integrate these skills into teaching and learning and are placing a strong emphasis on their implementation (Melamed et al, 2010; Resta et al, 2011). In 2015 the OECD PISA exam for the first time, included assessment of collaborative problem-solving in its country-by-country comparison. Collaborative learning is not a trivial challenge nor is it intuitive for all teachers and learners. One must acquire and practice the essential skills in order to successfully work in a team. Consequently it is essential to train teachers in collaborative teamwork, as they must serve as role models for students. In addition, new tools and practices become available at a rate that outpaces the abilities of many higher education institutions to adopt and implement. This book surveys the current state of the field and provides theoretical

essentials of business communication 8th edition: Grateful Nation Ellen Moore, 2017-10-26 In today's volunteer military many recruits enlist for the educational benefits, yet a significant number of veterans struggle in the classroom, and many drop out. The difficulties faced by student veterans have been attributed to various factors: poor academic preparation, PTSD and other postwar ailments, and allegedly antimilitary sentiments on college campuses. In *Grateful Nation* Ellen Moore challenges these narratives by tracing the experiences of Iraq and Afghanistan war veterans at two California college campuses. Drawing on interviews with dozens of veterans, classroom observations, and assessments of the work of veteran support organizations, Moore finds that veterans' academic struggles result from their military training and combat experience, which complicate their ability to function in civilian schools. While there is little evidence of antimilitary bias on college campuses, Moore demonstrates the ways in which college programs that conflate support for veterans with support for the institutional military lead to suppression of campus debate about the wars, discourage antiwar activism, and encourage a growing militarization.
