the shortest way to hades sarah caudwell: Fatal Fictions Alison L. LaCroix, Richard H. McAdams, Martha Craven Nussbaum, 2017 Writers of fiction have always confronted topics of crime and punishment. This age-old fascination with crime on the part of both authors and readers is not surprising, given that criminal justice touches on so many political and psychological themes essential to literature, and comes equipped with a trial process that contains its own dramatic structure. This volume explores this profound and enduring literary engagement with crime, investigation, and criminal justice. The collected essays explore three themes that connect the world of law with that of fiction. First, defining and punishing crime is one of the fundamental purposes of government, along with the protection of victims by the prevention of crime. And yet criminal punishment remains one of the most abused and terrifying forms of political power. Second, crime is intensely psychological and therefore an important subject by which a writer can develop and explore character. A third connection between criminal justice and fiction involves the inherently dramatic nature of the legal system itself, particularly the trial. Moreover, the ongoing public conversation about crime and punishment suggests that the time is ripe for collaboration between law and literature in this troubled domain. The essays in this collection span a wide array of genres, including tragic drama, science fiction, lyric poetry, autobiography, and mystery novels. The works discussed include works as old as fifth-century BCE Greek tragedy and as recent as contemporary novels, memoirs, and mystery novels. The cumulative result is arresting: there are killer wives and crimes against trees; a government bureaucrat who sends political adversaries to their death for treason before falling to the same fate himself; a convicted murderer who doesn't die when hanged; a psychopathological collector whose quite sane kidnapping victim nevertheless also collects; Justice Thomas' reading and misreading of *Bigger* Thomas; a man who forgives his son's murderer and one who cannot forgive his wife's non-existent adultery; fictional detectives who draw on historical analysis to solve murders. These essays begin a conversation, and they illustrate the great depth and power of crime in literature.

the shortest way to hades sarah caudwell: Pronoun Envy Anna Livia, 2001 Controversy over gendered pronouns, for example using the generic he, has been a staple of feminist arguments about patriarchal language over the last 30 years, and is certainly the most contested political issue in Western feminist linguistics. Most accounts do not extend beyond policy issues like the official institution of non-sexist language. In this volume, Anna Livia reveals continuities both before and after the sexist language reform movement and shows how the creative practices of pronoun use on the part of feminist writers had both aesthetic and political ends. Livia uses the term pronoun envy ironically to show that rather being a case of misguided envy, battles over gendered language are central to feminist concerns. Livia examines a broad corpus of written texts in English and French, concentrating on those texts which problematize the traditional functioning of the linguistic gender system. They range from novels and prose poems to film scripts and personal testimonies, and in time from the 19th century to the present. Some withhold any indication of gender; others have non-gendered characters. Livia's goal is two-fold; to help bridge the divide between linguistic and literary analysis, and to show how careful study of the manipulation of linguistic gender in these texts informs larger concerns. This fresh and highly interdisciplinary work lies at the intersection of several vital areas, including language and gender, sociolinguistics, and feminist literary analysis.

Primarily a bibliography of novels, it also annotates plays, scripts for film and television, novelizations, and short-story collections about lawyers and the law. The idea behind the principal of selection is to disdain labels that reduce the variety of the legal thriller to a subgenre of mystery fiction. Novels that range from suspense thrillers through science fiction to the philosophical novel are included if justice is thematically important. Its biographical and scholarly information about authors, major and minor, and their novels or works is traditionally encyclopedic and objective regardless of whether the work has been genre-defined, or worse—deified as a classic or denigrated as a bestseller. Many novels included are long out of print, but historically interesting for their contribution to the lineage of the courtroom drama, showing that the history of the legal thriller is one of the major branches of modern literature since the Age of Reason. The criterion of justice denoted moves beyond the fact of lawyers and courtrooms to select seminal novels like Robert Travers' *Anatomy of a Murder* as well as the romantic potboiler. the shortest way to hades sarah caudwell: Homer's "Iliad" and "Odyssey" Alberto Manguel, 2024-10-15 A worldwide exploration of the history, purpose, and inescapable influence of the Iliad and the Odyssey that will inspire readers to think anew about Homer's work No one knows whether Homer was a real person, but there is no doubt that the epic poems assembled under his name are foundations of Western literature. The Iliad and the Odyssey—with their tales of the Trojan War, Achilles, Odysseus and Penelope, the Cyclops, the beautiful Helen of Troy, and the petulant gods—have inspired us for over two and a half millennia and influenced writers from Plato to Virgil,

Pope to Joyce, and Dante to Margaret Atwood. In this graceful and sweeping book, Alberto Manguel traces the lineage of Homer's poems. He examines their original purpose, either as allegory or record of history; surveys the challenges the pagan poems presented to the early Christian world; and looks at their reception after the Reformation through the present day. In this revised and expanded edition, Manguel ignites new ways of thinking about these classic works.

the shortest way to hades sarah caudwell: *History, Fiction, and Germany* Brent Orlyn Peterson, 2005 A study of the content, development, and transmission of German identity during the nineteenth century as Germany's national narrative took shape in historical fiction and in both popular and academic history. The German-speaking inhabitants of central Europe did not automatically think of themselves as Germans--not before 1871 and not always after unification. In fact, they spoke mutually incomprehensible dialects, owed allegiance to different leaders, worshiped in different churches, and would not have recognized each other's customs. If asked about their identity, these prospective Germans might have answered Austrian, Bavarian, or Prussian, and they could as easily have used more local labels or resorted to occupational markers. For this disparate population to think of itself as German, that word had to acquire content--people had to learn a whole set of stories they could tell themselves and to others in answer to the question of identity. *History, Fiction, and Germany* chronicles how German nationalism developed simultaneously with the historical novel and the field of history, both at universities and in middlebrow reading material. The book examines Germany's emerging national narrative as nineteenth-century writers adapted it to their own visions and to changing circumstances. These writers found and popularized the nation's heroes and heroines, demonized its villains and enemies, and projected the nation's hopes and dreams for the future. Author Brent O. Peterson argues that it was the production and consumption of national history--the writing and reading of the nation--that filled Germany with Germans. Although the task of national narration was never complete and never produced a single, universally accepted version of German national identity, tales from Germans' gradually shared history did more to create Germany than any statesman, general, or philosopher. *History, Fiction, and Germany* provides a valuable resource for scholars and students of German studies, as well as anyone interested in history and the articulation of national identity.
