woodward clyde consultants history: *Indian River Lagoon* Osborn, Nathaniel, 2016-03-01
Florida Historical Society Stetson Kennedy Book Award Stretching along 156 miles of Florida's East Coast, the Indian River Lagoon contains the St. Lucie estuary, the Mosquito Lagoon, Banana River Lagoon, and the Indian River. It is a delicate ecosystem of shifting barrier islands and varying salinity levels due to its many inlets that open and close onto the ocean. The long, ribbon-like lagoon spans both temperate and subtropical climates, resulting in the most biologically diverse estuarine system in the United States. Nineteen canals and five man-made inlets have dramatically reshaped the region in the past two centuries, intensifying its natural instability and challenging its diversity. Indian River Lagoon traces the winding story of the waterway, showing how humans have altered the area to fit their needs and also how the lagoon has influenced the cultures along its shores. Now stuck in transition between a place of labor and a place of recreation, the lagoon has become a chief focus of public concern. This book provides a much-needed bigger picture as debates continue over how best to restore this natural resource.

woodward clyde consultants history: *The Archaeology, History and Heritage of WWII Karst Defenses in the Pacific* Julie Mushynsky, 2021-03-12
This book is an archaeological study of the cultures of conflict through an examination of caves and tunnels used during the Pacific War. Referred to here as "karst defenses," WWII caves and tunnels can be found throughout the karst landscapes of the Pacific. Karst defenses have been hidden, literally by the jungle and figuratively by history, for over 70 years. Based on a study of karst defenses and their related artifacts and oral histories in Saipan, Commonwealth of the Northern Mariana Islands, this book uses karst defenses to investigate the varied human experiences before, during and after the Pacific War. Historically, the book reveals new knowledge about the overall defense strategies used in the Pacific. Karst defenses were a central component of Pacific War defense and were constructed and used by

civilians, the Japanese military and U.S. troops as early as 1942. Karst defenses also functioned as command posts, hospitals, shelters, storage units and combat positions. The book sheds light on the social aspects that influenced the construction and use of karst defenses, including the fragmented relationship between the Imperial Japanese Navy and the Imperial Japanese Army, the social status of civilians under Japanese rule and the clandestine plans of the U.S. in Micronesia. The book also discusses the complex contemporary meanings of this dark, shared heritage.
