

# sub 4 hour marathon training plan

**\*\*Sub 4 Hour Marathon Training Plan: Your Path to Breaking the 4-Hour Barrier\*\***

**sub 4 hour marathon training plan** is a goal many runners aspire to, representing a significant milestone in endurance running. Finishing a marathon in under four hours requires not only physical fitness but also smart, structured training, mental resilience, and proper pacing strategies. Whether you're a seasoned runner aiming to improve your personal best or a beginner with a solid fitness base, understanding how to approach this challenge can transform your marathon experience.

In this article, we'll explore effective training methods, pacing tips, and essential components of a sub 4 hour marathon training plan that can help you cross that finish line with confidence and strength.

## Understanding the Sub 4 Hour Marathon Goal

Running a marathon in under four hours means maintaining an average pace of about 9 minutes and 9 seconds per mile (or roughly 5 minutes and 41 seconds per kilometer) for the entire 26.2 miles. This pace is achievable for many runners but does require consistent training, proper nutrition, and injury prevention strategies.

## Why Aim for a Sub 4 Hour Marathon?

Breaking the 4-hour barrier is often seen as a rite of passage for recreational marathoners. It reflects a solid level of endurance and speed and often opens the door to more advanced races or personal goals. Additionally, training for a sub 4 hour marathon improves cardiovascular health, builds mental toughness, and enhances overall fitness.

## Key Components of a Sub 4 Hour Marathon Training Plan

To successfully train for a sub 4 hour marathon, your plan should balance various types of workouts that target endurance, speed, and recovery. Here are the fundamental components:

### 1. Base Mileage Building

Building a strong aerobic base is critical. This involves gradually increasing your weekly mileage to improve cardiovascular efficiency and muscular endurance without risking injury.

- Aim for 30-40 miles per week during peak training.
- Increase mileage gradually, following the 10% rule (don't increase weekly mileage by more than 10% per week).
- Include easy runs that help build endurance without stressing your body excessively.

## **2. Long Runs**

Long runs are the backbone of marathon training, teaching your body to sustain effort over extended periods.

- Schedule one long run per week, progressively increasing distance up to 20-22 miles.
- Practice your race day nutrition and hydration strategies during these runs.
- Incorporate some long runs at or slightly below marathon pace to get your body accustomed to the target speed.

## **3. Tempo Runs**

Tempo runs help improve your lactate threshold, enabling you to run faster for longer without fatigue.

- Typically, tempo runs involve running at a "comfortably hard" pace, about 25 to 30 seconds slower than your 10K race pace.
- Start with 20-minute tempo efforts and build up to 40 minutes.
- These sessions train your body to clear lactic acid more efficiently, key for maintaining a sub 4 hour pace.

## **4. Interval Training**

Incorporating speed work sharpens your running economy and leg turnover.

- Examples include 400m, 800m, or 1-mile repeats at a pace faster than marathon pace.
- Intervals should be performed with recovery jogs or rests in between.
- This training improves your VO2 max and overall speed, which helps on race day when you need to push through tough miles.

## **5. Recovery Runs and Rest Days**

Rest and recovery runs are just as important as intense workouts to avoid burnout and injury.

- Easy recovery runs promote blood flow and muscle repair.
- Take at least one full rest day per week.
- Listen to your body and adjust your training if you feel persistent fatigue or pain.

# Sample Weekly Training Schedule for a Sub 4 Hour Marathon

Here is a sample week to give you an idea of how to structure your training:

- **Monday:** Rest or easy recovery run (3-5 miles)
- **Tuesday:** Intervals (e.g., 6 x 800m at 10K pace with 400m jog recovery)
- **Wednesday:** Easy run (5-7 miles)
- **Thursday:** Tempo run (start with 3 miles at tempo pace, building up to 6 miles)
- **Friday:** Rest or cross-training (cycling, swimming, or yoga)
- **Saturday:** Long run (starting at 10 miles, building up to 20+ miles)
- **Sunday:** Easy recovery run (4-6 miles)

Adjust mileage and intensity based on your experience level and how your body responds.

## Nutrition and Hydration Tips for Sub 4 Hour Marathon Training

Fueling your body properly is essential throughout your training and on race day.

### Daily Nutrition

- Focus on a balanced diet rich in complex carbohydrates, lean proteins, and healthy fats.
- Carbohydrates are your primary fuel source for endurance running; include whole grains, fruits, and vegetables.
- Stay hydrated throughout the day, aiming for at least 8 cups of water.

### During Training Runs and Marathon Day

- Practice your race day fueling during long runs to find what works best — gels, sports drinks, or real food like bananas.
- Aim to consume 30-60 grams of carbohydrates per hour during runs longer than 90 minutes.
- Don't forget electrolyte replenishment, especially in hot weather.

## Importance of Pacing in Achieving a Sub 4 Hour Marathon

Many runners find that their biggest challenge is pacing consistently throughout the race.

# **How to Pace Your Sub 4 Hour Marathon**

- Use a GPS watch or running app to monitor your pace.
- Start slightly slower than your goal pace for the first few miles to conserve energy.
- Aim for even splits, maintaining a steady pace close to 9:09 per mile.
- Avoid the temptation to go out too fast, which can lead to burnout in the later stages.

## **Practice Pacing in Training**

- Include marathon pace segments in your long runs.
- Use tempo runs to get comfortable with running at or near your target pace.
- Simulate race conditions during some training sessions to build confidence.

## **Additional Tips to Maximize Your Training**

### **Cross-Training and Strength Work**

Integrating strength training and cross-training can improve running efficiency and reduce injury risk.

- Include exercises focusing on core strength, leg muscles, and balance.
- Activities like cycling, swimming, or elliptical workouts can enhance cardiovascular fitness without added impact.

### **Mental Preparation**

Running a sub 4 hour marathon is as much a mental challenge as it is physical.

- Use visualization techniques to prepare for race day.
- Break the race into manageable segments mentally.
- Develop mantras or positive affirmations to stay motivated during tough miles.

### **Listen to Your Body**

Injury prevention is crucial for consistent training.

- Pay attention to aches and pains.
- Don't push through sharp pain; rest or seek professional advice.
- Incorporate stretching, foam rolling, and mobility exercises regularly.

Embarking on a sub 4 hour marathon training plan is an exciting and rewarding journey. With dedication, smart training, and attention to detail, you'll find yourself well-prepared to tackle the marathon distance with confidence and potentially achieve that coveted finish time. Every runner's path is unique, so adapt the plan based on your progress and enjoy the process of becoming a stronger, faster endurance athlete.

## **Frequently Asked Questions**

### **What is a sub 4 hour marathon training plan?**

A sub 4 hour marathon training plan is a structured running schedule designed to help runners complete a marathon in under 4 hours, typically involving a mix of long runs, speed workouts, tempo runs, and rest days to build endurance and speed.

### **How many miles per week should I run to achieve a sub 4 hour marathon?**

To aim for a sub 4 hour marathon, most training plans recommend running between 30 to 50 miles per week, gradually increasing mileage to build endurance while incorporating recovery to prevent injury.

### **What key workouts are included in a sub 4 hour marathon training plan?**

Key workouts often include long runs to build endurance, tempo runs to increase lactate threshold, interval training for speed, and easy recovery runs to maintain fitness without overtraining.

### **How long does it typically take to train for a sub 4 hour marathon?**

Most sub 4 hour marathon training plans span 16 to 20 weeks, allowing ample time to build mileage progressively, improve speed, and recover properly before race day.

### **Can beginners run a sub 4 hour marathon with the right training plan?**

Yes, with consistent training, proper pacing, and dedication to a structured sub 4 hour marathon plan, many beginner runners can achieve this goal, though it requires commitment and gradual progression in training intensity and volume.

## **Additional Resources**

Sub 4 Hour Marathon Training Plan: Strategies for Breaking the Four-Hour Barrier

**sub 4 hour marathon training plan** has become a coveted milestone for many amateur and seasoned runners alike. Achieving a marathon finish time under four hours not only demands physical endurance but also precise preparation, discipline, and strategic pacing. In this article, we delve into the components of an effective sub 4 hour marathon training plan, analyzing its structure, key training elements, and common challenges faced by runners striving to conquer this goal.

## **Understanding the Sub 4 Hour Marathon Goal**

Running a marathon in under four hours requires maintaining an average pace of approximately 9 minutes and 9 seconds per mile (or about 5 minutes 41 seconds per kilometer). While this pace may seem accessible to many recreational runners, sustaining it across 26.2 miles presents a formidable challenge. Thus, the sub 4 hour marathon training plan is designed to develop not only cardiovascular endurance but also muscular strength, mental resilience, and efficient running mechanics.

The significance of this goal is underscored by its popularity. A sub-4 finish time often serves as a benchmark for marathoners aiming to improve their performance or qualify for more competitive races. Understanding the physiological demands behind this pace helps in crafting a training regimen that balances intensity and recovery.

## **Key Components of a Sub 4 Hour Marathon Training Plan**

A successful sub 4 hour marathon training plan integrates several critical elements, including weekly mileage progression, speed workouts, long runs, cross-training, and recovery protocols. Each component plays a distinct role in preparing the body and mind for race day.

### **Weekly Mileage and Progression**

Building an adequate weekly mileage base is fundamental. Most plans targeting the sub 4 hour mark recommend gradually increasing weekly mileage to between 30 to 50 miles, depending on the runner's experience level. This progression helps enhance aerobic capacity without overtraining.

The principle of gradual overload is essential here: increasing mileage by no more than 10% per week mitigates injury risk. Additionally, incorporating “cutback” weeks where mileage is reduced allows for physiological adaptation and reduces fatigue accumulation.

### **Long Runs: Building Endurance**

Long runs are the cornerstone of marathon preparation. Typically scheduled once a week, these runs progressively increase in distance, peaking at 18 to 22 miles several weeks before race day. These sessions simulate race conditions and improve glycogen storage and fat metabolism, crucial for sustaining energy over marathon distances.

In a sub 4 hour marathon training plan, long runs are often performed at a “conversational pace” slightly slower than race pace to optimize endurance development while minimizing fatigue.

## **Speed Workouts and Tempo Runs**

Speedwork and tempo runs enhance lactate threshold and running economy, enabling athletes to maintain faster paces for longer durations. Tempo runs, often conducted at or slightly slower than marathon pace, sharpen the body’s ability to process lactic acid efficiently.

Intervals and fartlek sessions introduce bursts of faster running interspersed with recovery, improving VO2 max and neuromuscular coordination. Incorporating two to three speed sessions per week, balanced with easy runs, is typical in structured sub 4 hour marathon plans.

## **Cross-Training and Strength Conditioning**

Complementary cross-training activities such as cycling, swimming, or elliptical workouts provide cardiovascular benefits while reducing impact stress. Strength training focusing on core stability, hip mobility, and leg strength supports running form and injury prevention.

These sessions are often scheduled once or twice weekly, especially during recovery phases, to maintain fitness and promote muscular balance.

## **Recovery Strategies**

Recognizing the importance of recovery is pivotal in any marathon training plan. Adequate sleep, nutrition, hydration, and rest days facilitate muscle repair and prevent burnout. Incorporating active recovery days with low-intensity activities aids circulation and reduces stiffness.

Many sub 4 hour marathon training plans recommend at least one full rest day weekly, coupled with strategic tapering during the final two to three weeks before race day to optimize performance.

# Sample Weekly Structure of a Sub 4 Hour Marathon Training Plan

Below is an example of a balanced weekly schedule designed to prepare runners for a sub 4 hour marathon finish:

1. **Monday:** Rest or active recovery (easy cycling or swimming)
2. **Tuesday:** Speed workout (intervals or fartlek, e.g., 6 x 800m at 10K pace)
3. **Wednesday:** Easy run (4-6 miles at conversational pace) + strength training
4. **Thursday:** Tempo run (4-7 miles at marathon pace)
5. **Friday:** Rest or cross-training
6. **Saturday:** Long run (10-20 miles at easy pace, increasing distance weekly)
7. **Sunday:** Recovery run (3-5 miles very easy pace)

This framework allows for sufficient intensity and volume while promoting recovery, essential to sustain progress and minimize injury.

## Common Challenges in Sub 4 Hour Marathon Training

Achieving a sub 4 hour marathon is not without hurdles. Several factors can impede progress, including injury, inconsistent training, and nutritional deficiencies.

## Injury Prevention and Management

High mileage and intense workouts increase the risk of common running injuries such as plantar fasciitis, IT band syndrome, and stress fractures. Runners should prioritize proper footwear, incorporate dynamic warm-ups, and listen to their bodies' signals to prevent overuse injuries.

Regularly integrating mobility exercises and strength training can also mitigate biomechanical imbalances contributing to injury.

# Training Consistency

Maintaining a consistent training schedule amidst life's demands is often a significant barrier. The structured nature of a sub 4 hour marathon training plan requires commitment and time management. Utilizing training logs or digital apps can help track progress and foster accountability.

# Nutrition and Hydration

Fueling strategies during training and on race day critically influence performance. Runners aiming for sub 4 hours must balance carbohydrate intake to sustain energy reserves without gastrointestinal distress. Hydration plans tailored to individual sweat rates and environmental conditions are equally important.

Experimenting with gels, electrolyte drinks, and meal timing during training runs helps refine race-day nutrition.

# Comparing Popular Sub 4 Hour Marathon Training Plans

Several well-regarded training plans cater to runners targeting the sub 4 hour goal, including Hal Higdon's Intermediate Marathon Plan, Jeff Galloway's Run-Walk method, and the Hanson Marathon Method.

- **Hal Higdon's Intermediate Plan:** Focuses on gradual mileage build-up with a balance of speedwork and long runs, suitable for runners with some marathon experience.
- **Jeff Galloway's Run-Walk Method:** Incorporates planned walking intervals to reduce fatigue, helping many runners achieve sub 4 hours while minimizing injury risk.
- **Hanson Marathon Method:** Emphasizes cumulative fatigue training with higher intensity and mileage, targeting runners with solid endurance bases.

Each method has its pros and cons, and the choice depends on individual fitness levels, injury history, and personal preferences.

# Psychological Aspects of Training for a Sub 4

# Hour Marathon

Beyond physical conditioning, the mental dimension of marathon training is crucial. Setting realistic goals, visualizing race success, and developing coping strategies for “the wall” are integral for maintaining motivation and focus.

Many runners benefit from mindfulness practices, goal tracking, and support groups to navigate the psychological challenges of marathon preparation.

---

A sub 4 hour marathon training plan demands a multifaceted approach, blending endurance, speed, strength, and recovery. While the journey requires dedication, the payoff of crossing the finish line under four hours is a testament to disciplined preparation and resilience. Whether following established programs or tailoring plans to individual needs, runners aiming for this milestone should prioritize balanced training, injury prevention, and consistent effort to optimize their chances of success.

**sub 4 hour marathon training plan: The 4-Hour Marathon: The Bulletproof Guide to Running a Sub 4-HR Marathon** Thomas Watson, 2017-11-25 The book that has now helped thousands of runners run a sub 4-hr marathon - \*Revised and Expanded January 2019\* '4-hour Marathon' gives you a focussed framework to prepare, train and complete a marathon in under four hours. Whether it's your first marathon or your fiftieth, the '4-hr marathon' method is designed to get you comfortably over the finish line in your target time. □Comprehensive 20-week training plan. Includes distances, paces and detailed instructions on every workout to perform. Links are provided to download digital versions of the plan. □Detailed chapters on the importance of pace, what your marathon pace strategy will be, and how to increase your current running speed using the Block Method □Expert advice on gear - how to choose marathon shoes, packs, clothing, accessories - as well as nutrition and hydration. □Detailed marathon preparation guide to ensure you get to the start line ready to kill it! The 20-week training programme included has been reverse-engineered from that 4-hr goal. No more nebulous goals, no more vague advice. This book presents one concentrated, proven method to achieve your marathon goals. Thomas Watson ran his first marathon in 3hrs and 58mins and has gone on to run dozens of sub-4hr marathons since. He also runs a website, [www.marathonhandbook.com](http://www.marathonhandbook.com), through which he has helped thousands of runners achieve their goals.

**sub 4 hour marathon training plan: Four Months to a Four-Hour Marathon** Dave Kuehls, 2006-06-27 Let Four Months to a Four-Hour Marathon be your personal trainer. Whether you're a competitive veteran or a recreational beginner, this essential guide will tell you exactly what to eat, what to wear, what to expect, and how to train. When race day arrives, author Dave Kuehls,

contributing editor at Runner's World and a marathoner himself, will have you in the best shape of your life—physically and mentally. All you have to do is take the first step. Four Months to a Four-Hour Marathon includes: • Day-by-day training schedules for 4-hour and 5-hour marathoners • Detailed diet plans • The marathoner's mind-set • Right and wrong things to wear • How to pick the right sneakers • Pain vs. performance—how far to go • Common pitfalls to avoid—in training and during the race • A list of the 36 marathons in North America where you can run the fastest times

**sub 4 hour marathon training plan: *Runner's World Train Smart, Run Forever*** Bill Pierce, Scott Murr, Editors of Runner's World Maga, 2017-04-04 From the experts at the Furman Institute of Running and Scientific Training (FIRST), Runner's World Train Smart, Run Forever goes beyond traditional training programs and addresses the issues that prevent runners from reaching their full potential. This book will teach you how to become a fit, fast, and healthy lifelong runner by following the authors' innovative 7-hour workout week. In this new approach, Bill Pierce and Scott Murr show how overall fitness and total body health are the secret to longevity as a runner. Runner's World Train Smart, Run Forever is appropriate for all runners, but is especially helpful if you're frustrated by injuries or looking to maintain your healthy lifestyle as you age. This book addresses the controversies surrounding the dangers of overtraining and the stress associated with the constant craving for faster race times. Complete with a comprehensive program to enhance overall fitness, improve race times, and support healthy aging, this book will show you how to achieve your fitness goals at any stage.

**sub 4 hour marathon training plan: *4 Hour Marathon Training Plan*** Elite R N, 2019-04-29 This plan is written for an experienced runner who's looking to break 4 hrs for the marathon or improve their time below 4 hrs towards 3 hrs 45mins. A 4:00 hour marathon is approximately 9:00 per mile. To break 4:00, you should eventually be capable of a sub-1:50 half-marathon (8:20 per mile) and sub-50:00 10K (8:00 per mile). Right now, you should be running at least 20 miles per week, and be able to run for an hour non-stop.

**sub 4 hour marathon training plan: *Daniels' Running Formula-3rd Edition*** Jack Daniels, 2013-12-31 Get in the best shape of your running career! Daniels provides a results-proven formula to guide you through training at the right intensity to run stronger, longer, and faster. Each program incorporates training intensities to help you build endurance, strength, and speed.

**sub 4 hour marathon training plan: *Runner's World Complete Book of Women's Running*** Dagny Scott, Dagny Scott Barrios, 2000 A guide specifically aimed at the growing population of women runners considers the unique challenges and problems faced by women when running, from clothing, injuries, safety, and nutrition to running during pregnancy and menopause.

**sub 4 hour marathon training plan: *Marathon Training For Dummies*** Tere Stouffer Drenth, 2011-05-04 In today's modern world, there's no need for anyone to run twenty-five miles to deliver a message, as Pheidippides did from Marathon to Athens around 500 B.C. However, hundreds of runners each year run 26.2 miles at hundreds of marathons worldwide. To conquer this mountainous challenge, you must know how to properly eat, stretch, identify and treat injuries, and develop a running program that hones your mind and body into a running machine. Marathon Training For Dummies is for everyone who has always thought about running a marathon or half-marathon (13.1 miles) and for seasoned runners who want to tackle the challenge safely and successfully. This quick-read reference helps all runners: Add strength and speed Weight train Improve your technique Eat to maximize endurance Treat injuries Choose your races In just four to six months of dedicated training, any runner can be fully prepared to tackle a marathon. Map out an exercise program, choose shoes, and plan the race strategy that will get you across the finish line. Marathon Training For Dummies also covers the following topics and more: How far how fast? Blazing the best trail Stretching methods Doing LSD (Long, Slow Distance) Tempo-run training The last 24 hours The best tune-up races in North America The week after the marathon With several hundred thousand people finishing marathons each year, you'll meet plenty of interesting people running along with you. There are numerous rewards for conquering the mental and physical challenges of a marathon, and this fun and friendly guide is your road map to achieving them.

**sub 4 hour marathon training plan: IronFit's Marathons after 40** Don Fink, Melanie Fink, 2017-03-01 The only marathon training guide athletes forty and older will ever need Updated with full-color exercise photography; cutting-edge training, strength, core, and flexibility programs; and specific instruction for the most popular version of the marathon, the Half-Marathon, this book starts with a simple premise: training methods for younger athletes no longer work for athletes over forty. Melanie and Don Fink present step-by-step action plans for faster times, fewer injuries, and more enjoyment for the Master's marathoner. Including profiles of successful older athletes, this book also provides ways to avoid common training and racing mistakes, recovery methods unique to forty-plus athletes, secrets to staying injury-free, and much more.

**sub 4 hour marathon training plan: *All You Need is Rhythm & Grit*** Cory Wharton-Malcolm, 2024-05-07 An infectious positive and inclusive guide to running, from everyone's favourite Apple Fitness+ and Nike trainer, Coach Cory Wharton-Malcolm. Everything Wharton-Malcolm does has the aim of helping people achieve the best version of themselves.—Evening Standard Think running isn't for you? Cory Wharton-Malcolm challenges this idea head-on with this joyful love letter to running and motivational guide for everyone. Advocating running as an inclusive and community-focused activity, Cory shows us how to celebrate the incredible mind-body connection by getting your sneakers on and starting your running journey from the couch to the end of the road and beyond. Sharing stories of his own mental and physical health challenges and the way running—both alone and with track buddies—lifted him up, *All You Need is Rhythm and Grit* includes advice on gear, running routes, pacing, good beats, and the will to start . . . and keep going. Cory believes you don't have to be a tall and slim superhuman to run and feel good doing it! For anyone who thinks running isn't for them, here is a vibrant and inclusive guide to one of the most egalitarian sports for people of all genders, all bodies, all identities and every class and color.

**sub 4 hour marathon training plan: *Runner's World*** , 2006-03 *Runner's World* magazine aims to help runners achieve their personal health, fitness, and performance goals, and to inspire them with vivid, memorable storytelling.

**sub 4 hour marathon training plan: *Running Fitness - From 5K to Full Marathon*** David Ross, 2015-02-20 *Running Fitness* presents a structured and practical training guide aimed at a large portion of the running community, including beginners and those looking to improve in the sport. Author David Ross, a runner of many years experience, provides a training path that develops running capability from a simple 5K race up to full marathon, whilst making the sport easily accessible to those who wish to enjoy many years of fulfilment, success and longevity. Learn about warm-up and cool-down drills, speed and hill training, long runs, race pace, recovery and rest, plus cross training, core fitness, diet and energy supplements.

**sub 4 hour marathon training plan: *Running Times*** , 2008-01 *Running Times* magazine explores training, from the perspective of top athletes, coaches and scientists; rates and profiles elite runners; and provides stories and commentary reflecting the dedicated runner's worldview.

**sub 4 hour marathon training plan: *Run Your Best Marathon*** Sam Murphy, 2022-09-15 'Quite simply, it contains the tools to make you a better runner. Make space on your bookshelf for this timeless, classic marathon manual.' - Paul Tonkinson 'Drawing on decades of running and coaching experience, Murphy provides a current resource that long-distance runners are sure to return to time and again' - Booklist Learn how to run your best marathon and get the most out of your training. There's no shortage of advice out there on how to train for a marathon and yet it can be hard to know what will work best for you. Choose from six training plans, each pitched at a different level of mileage, intensity and experience. The plans are backed up by a wealth of essential information and advice on how to train, race, eat and recover. Learn how to: - assess yourself and set a realistic goal - adjust your diet to optimise training and recovery - get your brain onside to resist fatigue and overcome discomfort - stay healthy during training and respond to injuries - master the skill of racing. *Run Your Best Marathon* is here to change all that with the expertise of running coach Sam Murphy. Whether you're looking to step up to the marathon for the first time or to better previous performances over the distance, Sam's runner-centred approach will help you

prepare for and race your chosen marathon to the best of your ability.

**sub 4 hour marathon training plan: Making the Marathon Your Event** Richard Benyo, 2011-08-10 In easy-to-understand language, Benyo covers preliminaries, preparation, pacing and strategy, and much more. He helps runners tailor a general program to their own particular needs, and backs his recommendations with up-to-the minute research From the Trade Paperback edition.

**sub 4 hour marathon training plan: Running Over 40, 50, 60, 70...** Bruce Tulloh, 2015-10-19 The only book written specially for over-forty runners, including: starting from scratch, how to train properly, how to avoid injuries, diet and lifestyle advice, graded training schedules for all standard distances.

**sub 4 hour marathon training plan: Marathoning for Mortals** John Bingham, Jenny Hadfield, 2003-05-02 Once considered a feat for superhuman athletes, the marathon is now within every mortal's grasp. Former couch potato John Bingham has joined forces with coach Jenny Hadfield to create a winning plan that works for every mortal—even you. In *Marathoning for Mortals*, you'll find the courage to train, the willpower to persevere, and the tenacity to finish one mile after another. John and Jenny stick with you every step of the way, from your first insecure thoughts to your last-minute jitters to your supreme joy at the finish line. In *Marathoning for Mortals*, you'll find:

- 8 training programs to run, run-walk, walk-run, or walk the half-marathon and marathon
- The advice you need to physically, mentally, and spiritually reach your dreams
- Tips to help you customize your training, buy the right shoes and apparel, and eat the best foods
- Guidance for common motivational, physical, and emotional roadblocks

Join John and Jenny on an amazing transformative journey where the finish line is just the beginning.

**sub 4 hour marathon training plan: Be a Better Runner** Sally Edwards, Carl Foster, Roy Wallack, 2011-04-01 Written by marathoner and Triathlon Hall of Fame inductee, Sally Edwards, *Be A Better Runner* addresses every possible concern from posture and form to nutrition, footwear and race strategy. You'll learn how to adapt running mechanics such as stride and pacing to your body type and fitness level while specific training regimens prepare you for any type of running event including sprints, distance runs, and marathons. Co-authored with Carl Foster, the former President of the American College of Sports Medicine, *Be A Better Runner* Every features the latest research in the science of running. You'll learn the latest strategies to boost your performance, train more effectively, and aid post-workout recovery. The latest research on special concerns such as running after age 40, during pregnancy, overtraining in younger runners and preventing amenorrhoea in female distance runners is also highlighted.

**sub 4 hour marathon training plan: Boston Bound** David Venable, 2011-04

**sub 4 hour marathon training plan: The U.S. Navy Seal Guide to Fitness and Nutrition** Patricia A. Deuster, Pierre A. Pelletier, Anita Singh, 2007-05-17 Developed for Navy SEAL trainees to help them meet the rigorous demands of the Naval Special Warfare (NSW) community, this comprehensive guide covers all the basics of physical well being as well as advice for the specific challenges encountered in extreme conditions and mission-related activities. Topics covered include calculating energy expenditure; definitions, functions, and daily allowances of carbohydrates, fats, and protein; nutritional considerations for endurance and strength training activities; active recovery from injury; cardio-respiratory conditioning; appropriate gear for running and swimming for fitness; exercising in extreme and adverse weather; and more. Compiled by physicians and physiologists chosen for their knowledge of the NSW and SEAL community, this manual is a unique resource for anyone wanting to improve his or her health, strength, and endurance.

**sub 4 hour marathon training plan: The U.S. Navy SEAL Guide to Nutrition** Patricia A. Deuster, Pierre A. Pelletier, Anita Singh, 2013-05-22 Learn to control your food intake and care for your body like a U.S. Navy...
