world history myworld interactive: *This Is Not My World* Adair Rounthwaite, 2024-01-16 A close-up history of the Yugoslav artists who broke down the boundaries between public and private. In the decades leading up to the dissolution of socialist Yugoslavia, a collective of young artists based in Zagreb took to using the city's public spaces as a platform for radical individual expression. *This Is Not My World* presents a detailed account of the Group of Six Authors and their circle in the prolific and experimental period from 1975 to 1985, highlighting the friction between public and private that underlied their innovative practices. Looking to circumvent the rigid bureaucracy of official art institutions, this freewheeling group of conceptual artists and their peers brought artistic activities directly to an unwitting public by staging provocative performances, exhibiting artworks, and interacting with passersby on the streets. Exploring artworks such as Vlasta Delimar's act of tying herself to a tree in a busy pedestrian area, Željko Jerman's production of a giant banner declaring "Intimate Inscription" in the city's central square, and Vlado Martek's creation of an artwork on a seaside beach using women's underwear, Adair Rounthwaite examines the work of these artists as a site of tension between the intimacy of artistic expression and the political structure of the public sphere under state socialism. Whereas many histories of modern and contemporary art in formerly socialist countries tend to be dominated by discussions of ideology and resistance, *This Is Not My World* focuses its attention on the affective aspects of the group's activities, using artist interviews and extensive documentation to bring the reader closer to the felt experience of their public interventions. Situating the group's work within the context of broader developments in conceptualism and theories of the avant-garde, Rounthwaite provides a fresh consideration and newly detailed account of this marginalized episode in global art history.

world history myworld interactive: Interactive Political Leadership Eva Sørensen, 2020-01-09 Building on recent theories of interactive governance and political leadership, Interactive Political Leadership develops a concept of interactive political leadership and a theoretical framework for studying the role of elected politicians in the age of governance. The purpose of the theoretical framework is to inspire and guide empirical research into how elected politicians perform political leadership in a society where citizens and other stakeholders play an active role in making and implementing political decisions and what barriers, challenges, and dilemmas they encounter in relation to the performance of interactive political leadership. The research framework draws extensively on recent theories of interactive governance and political leadership and other new developments in political science and public administration research. Moreover, it finds inspiration in current tendencies and embryonic examples of interactive political leadership performed by elected politicians operating at different levels of governance in Western liberal democracies. The basic assumption is that political legitimacy is essential for the survival of a political system, and that interactive political leadership stands out as a promising way of securing what political scientists denote as input-, throughput-, output-, and outcome legitimacy in the age of governance. Hence, interactive political leadership aims to establish a bridge between representative democracy and emergent forms of political participation, to promote political learning and accountability, to strengthen the political entrepreneurship of elected politicians, and to advance the political system's implementation capacity through resource mobilization. The book develops 20 propositions that sets the agenda for a new and much needed field of empirical research into political leadership in the age of governance.
