big sur marathon training plan

Big Sur Marathon Training Plan: Your Guide to Conquering the Coastal Challenge

big sur marathon training plan is not just any ordinary running regimen. Preparing for one of the most scenic and demanding marathons on the West Coast requires a blend of endurance, hill training, and mental toughness. Whether you're a seasoned marathoner or tackling your first 26.2 miles, understanding the unique challenges of the Big Sur Marathon will help you craft a training plan that sets you up for success.

The Big Sur Marathon is famous for its breathtaking views along California's rugged coastline, but the course is also notorious for its challenging elevation changes. Unlike flat city marathons, this race features significant uphill stretches, rolling hills, and a few steep climbs that can test even the most experienced runners. Crafting a big sur marathon training plan means focusing on building strength and stamina in ways that prepare you specifically for these terrain demands.

Understanding the Unique Demands of the Big Sur Marathon

Before diving into your training schedule, it's important to appreciate what makes Big Sur different from other marathons. The course starts in the charming town of Big Sur and winds through a variety of landscapes, including forested areas and coastal cliffs. The elevation gain throughout the race totals around 1,500 feet, with some notable climbs between miles 9 and 13, and again in the final miles.

This means your big sur marathon training plan can't just be about racking up miles; it has to include strategic hill workouts and strength training to handle the inclines without burning out. Additionally, the often unpredictable weather—ranging from fog to sunshine to coastal winds—means you should prepare for variable conditions.

Key Elements to Incorporate in Your Training

- **Hill Training:** Incorporate both short hill sprints and longer sustained climbs to build leg strength and cardiovascular fitness.
- **Endurance Runs:** Long runs are essential to build stamina, but include route variations that mimic the rolling terrain of Big Sur.
- **Strength Training:** Focus on core, glutes, and lower body exercises to improve running economy and prevent injury on hills.
- **Cross-Training:** Activities like cycling or swimming can improve aerobic capacity without the joint stress of excessive running.

• **Mental Preparation:** Practice visualization and pacing strategies to tackle the challenging course with confidence.

Structuring Your Big Sur Marathon Training Plan

A solid big sur marathon training plan typically spans 16 to 20 weeks, allowing ample time to gradually increase mileage and intensity while minimizing injury risk. Here's a general framework that balances endurance, strength, and recovery.

Weeks 1-4: Building the Base

During the initial phase of your training, focus on establishing a consistent running routine. Aim for 3-4 runs per week, including easy-paced runs and a progressively longer weekend run. Incorporate one day of cross-training to enhance aerobic fitness while giving your legs a break.

Hill workouts can begin light here, with gentle slopes or short hill repeats of 30 to 60 seconds. Strength training twice a week will build foundational muscle support. This phase is crucial for developing aerobic capacity without overloading your body.

Weeks 5-10: Increasing Intensity and Mileage

As your fitness improves, increase your weekly mileage by about 10% each week, with your long runs extending to 12-16 miles. Introduce more challenging hill repeats—aim for inclines lasting 1-3 minutes—and consider tempo runs to improve your lactate threshold.

Strength sessions should focus more on targeted exercises such as lunges, step-ups, and planks to prepare for the course's climbs. Don't forget to practice hydration and nutrition strategies during your longer runs, as fueling properly is vital on race day.

Weeks 11-16: Peak Performance Phase

This phase is about peak mileage and race-specific preparation. Long runs should reach 18-20 miles, ideally on hilly terrain similar to Big Sur's course. Aim to complete at least one or two runs that mimic race day conditions, including elevation and pacing.

Hill workouts might evolve into longer sustained climbs to simulate the toughest parts of the course. Maintain strength training but reduce overall volume slightly to prevent burnout.

Final Weeks: Tapering and Recovery

The last two to three weeks before race day are for tapering, allowing your body to recover and store energy for the big effort. Cut back mileage by 40-60%, avoid intense hill sessions, and focus on stretching, foam rolling, and sleep.

Mental preparation becomes especially important now. Visualize the course, remind yourself of your training accomplishments, and plan your race day logistics carefully.

Nutrition and Hydration Tips for Big Sur Marathon Training

Fueling your body correctly throughout your big sur marathon training plan can make a huge difference in performance and recovery. Since Big Sur's course includes challenging climbs, your muscles need adequate glycogen stores and hydration.

During long runs, experiment with energy gels, chews, or sports drinks to find what works best without causing stomach discomfort. Staying hydrated in coastal climates can be tricky due to cool air masking dehydration signs, so pay close attention to thirst cues.

Post-run nutrition should focus on replenishing carbohydrates and proteins to aid muscle repair. Incorporate whole foods like bananas, yogurt, nuts, and lean proteins into your meals.

Essential Gear and Preparation for Big Sur

Running Big Sur means preparing not only your body but also your gear. The coastal weather can be unpredictable, so layering is key. Lightweight, moisture-wicking clothing paired with a light windbreaker can keep you comfortable.

Invest in trail-ready or cushioned running shoes with good grip to handle the varied terrain. Break them in during training to avoid blisters or discomfort on race day.

Don't forget practical items like a hydration belt or handheld bottle, sunscreen, and sunglasses to protect against sun exposure. Planning your race-day outfit during training runs will help you avoid surprises.

Training with a Community: The Big Sur Marathon Advantage

One of the best ways to stay motivated during your big sur marathon training plan is to connect with other runners. Many communities and running clubs offer group runs tailored to marathon training, which can provide encouragement, pacing support, and valuable tips.

Additionally, online forums and social media groups dedicated to Big Sur runners can be great places to share experiences, ask questions, and celebrate milestones. Training alongside others who understand the course's unique challenges can make your journey more enjoyable and less daunting.

Preparing for the Big Sur Marathon is as much about embracing the journey as it is about crossing the finish line. With a well-rounded big sur marathon training plan that respects the course's demands and nurtures your body and mind, you'll be ready to take in those stunning ocean views as you conquer one of the most beautiful and challenging races out there. Happy training!

Frequently Asked Questions

What is the best time frame to follow a Big Sur Marathon training plan?

Most Big Sur Marathon training plans recommend a 16 to 20-week period to adequately prepare for the challenging course, allowing gradual mileage buildup and sufficient recovery.

How should I incorporate hill training into my Big Sur Marathon preparation?

Since the Big Sur Marathon course includes significant elevation changes, incorporating hill repeats and long runs on hilly terrain at least once a week is essential to build strength and endurance.

What is a sample weekly mileage progression for a Big Sur Marathon training plan?

A typical weekly mileage progression starts around 20 miles per week and gradually increases by 10% each week, peaking around 40-45 miles, with a cutback week every 3-4 weeks to allow recovery.

How important is cross-training in a Big Sur Marathon training plan?

Cross-training, such as cycling, swimming, or yoga, is important to improve overall fitness, reduce injury risk, and aid recovery while giving running muscles a break during the Big Sur Marathon training.

What nutrition strategies should I follow during Big Sur Marathon training?

Focus on a balanced diet rich in carbohydrates for energy, adequate protein for muscle repair, and hydration. Practicing race-day fueling with gels or sports drinks during long runs will help optimize performance on race day.

Big Sur Marathon Training Plan: Preparing for One of the Most Scenic and Challenging Races

big sur marathon training plan is essential for runners aiming to conquer one of the most breathtaking yet demanding marathon courses in the United States. The Big Sur International Marathon, known for its spectacular views along California's rugged coastline, presents a unique set of challenges that require specialized preparation beyond typical marathon training routines. Understanding the nuances of the course and tailoring a training plan accordingly can significantly impact a runner's performance and overall race-day experience.

Understanding the Big Sur Marathon Course

The Big Sur Marathon is renowned for its picturesque route, stretching approximately 26.2 miles from Carmel-by-the-Sea to Big Sur Village. Runners navigate through winding roads, steep hills, and varying elevations, which distinguishes this race from flat-city marathons like New York or Chicago. The course features an elevation gain of roughly 1,500 feet, with significant climbs notably between miles 9 to 12 and a challenging ascent near mile 20. These elements make the Big Sur Marathon not only a test of endurance but also of strength and mental resilience.

This terrain requires a different preparation approach compared to traditional marathon training plans. A standard plan emphasizing consistent mileage and speed work may not suffice without incorporating hill training, strength conditioning, and recovery strategies tailored to the course profile.

Key Components of a Big Sur Marathon Training Plan

Incorporating Hill Training

Given the undulating nature of the Big Sur course, hill workouts are critical. Hill training improves muscular strength, cardiovascular capacity, and running economy on inclines. Runners should integrate hill repeats and sustained uphill runs into their weekly regimen. For example, a typical hill session might consist of 6 to 10 repeats on a 200-400 meter incline at a controlled pace, focusing on form and breathing.

Endurance and Long Runs

Long runs remain the backbone of marathon training, but for the Big Sur Marathon, these should mimic race conditions as closely as possible. This means performing long runs on hilly terrain or incorporating rolling hills into the route. Gradually increasing the mileage to peak at around 20 to 22 miles, with attention to pacing on ascents and descents, helps build endurance and prepares the body for race-day stresses.

Strength and Cross-Training

Strength training is particularly important to prevent injuries and improve running efficiency on challenging terrain. Core exercises, leg strengthening (such as squats and lunges), and stability work can enhance overall performance. Additionally, cross-training activities such as cycling or swimming can provide cardiovascular benefits while reducing impact stress.

Recovery and Nutrition

Due to the intensity of Big Sur marathon training, recovery protocols, including adequate sleep, stretching, and foam rolling, are vital. Proper nutrition tailored to support long-distance running and muscle repair should be emphasized. Hydration strategies also deserve attention, considering the variable coastal climate that can range from foggy and cool to sunny and warm.

Sample Big Sur Marathon Training Week

A balanced week might look like this:

• Monday: Rest or light cross-training

• **Tuesday:** Hill repeats (6-8 repeats of 200-400 meters)

• **Wednesday:** Easy run (5-7 miles) plus strength training

• **Thursday:** Tempo run (4-6 miles at marathon goal pace)

• **Friday:** Rest or active recovery (yoga or swimming)

Saturday: Long run incorporating hills (12-20 miles)

• Sunday: Easy recovery run or cross-training

This structure fosters gradual adaptation to elevation changes while maintaining overall mileage and intensity balance.

Comparing Big Sur Marathon Training to Other Marathon Plans

Training for Big Sur diverges significantly from flat marathon courses. For instance, a standard marathon training plan like Hal Higdon's Intermediate plan emphasizes progressive mileage and speed workouts but lacks hill specificity. Conversely, the Big Sur training plan demands a focus on hill

endurance and strength conditioning to accommodate the course's elevation profile.

Runners accustomed to flat terrain may underestimate the difficulty of the Big Sur course without tailored preparation, potentially leading to fatigue and injury. Therefore, integrating elevation-specific workouts is crucial to optimize performance and enjoyment.

Pros and Cons of a Specialized Big Sur Marathon Training Plan

• Pros:

- Improved strength and endurance on hills
- Reduced risk of injury through targeted conditioning
- Better pacing strategies for elevation changes

• Cons:

- Requires access to hilly terrain for effective training
- Potentially more physically demanding, increasing recovery time
- May require more planning and time commitment

Utilizing Technology and Resources

Modern runners have access to a variety of tools to enhance their Big Sur marathon training plan. GPS watches with elevation tracking allow athletes to monitor hill workouts and long runs accurately. Training apps and online platforms often offer customized plans that can be adapted for elevation challenges.

Additionally, virtual training groups and local running clubs in California provide community support and advice specific to the Big Sur course. Engaging with these resources can improve motivation and provide valuable insights into the race's demands.

Environmental and Weather Considerations

The coastal climate along the Big Sur route can be unpredictable. Training plans should accommodate

variability in temperature and humidity, preparing runners for cool mornings and potentially warmer midday conditions. Wearing appropriate gear during training and experimenting with hydration and nutrition strategies in similar environments can be advantageous.

Final Thoughts on Preparing for the Big Sur Marathon

A successful big sur marathon training plan balances endurance, strength, and tactical preparation for elevation. While the race's natural beauty might distract from its difficulty, runners who approach their training with specificity and discipline are best positioned to enjoy the experience and achieve personal goals. Investing time in hill training, strength work, and recovery not only prepares athletes for the course but also contributes to long-term running health.

For those drawn to scenic yet challenging marathon events, the Big Sur International Marathon offers a unique opportunity to push limits amidst one of America's most stunning landscapes. With a carefully crafted training plan, runners can navigate the course's undulations with confidence and savor the unforgettable journey along the Pacific coast.

big sur marathon training plan: Marathon Training Ava Thompson, AI, 2025-03-10 Marathon Training provides a comprehensive guide, emphasizing the importance of endurance, injury prevention, and mental preparation for marathon success. This book uniquely intertwines physiological adaptation with psychological strategies, acknowledging that both physical and mental readiness are crucial. Discover how strategic training affects your body's energy systems and cardiovascular health, while also understanding the historical context of marathon running, from ancient Greece to today. The book progresses through a phased training approach, beginning with base building to establish a solid aerobic foundation. It then moves into specific training modalities like interval training and tempo runs. A significant portion is dedicated to injury prevention, analyzing common running injuries and offering biomechanical assessments. Ultimately, it provides a comprehensive guide to race day preparation, covering nutrition, hydration, and mental techniques. This book differentiates itself by emphasizing individualized training plans, empowering runners to tailor their training to their specific needs and goals.

big sur marathon training plan: Boston Bound David Venable, 2011-04
big sur marathon training plan: The Art of Running Daisy Edzel, 2017-03-27 How an out of shape, exercise-hating beginner can transform to an impressive long distance runner within months Looking to go from couch potato to a physically fit and healthy runner -- heck even a FULL marathon finisher? This book has it all! It contains all the resources for a complete beginner (up to novice level), to succeed at this physically and mentally demanding sport! You will be armed with techniques (outergame) and psychological tools for motivation (innergame), to help you keep up with

the inner turmoils, motivation related issues and other hardships, especially in long distance runs where every part of your being just wants to give up! I will not waste your precious time with useless information you won't use. Instead, I'll provide practical and straight forward solutions, daily and weekly plans (resources section) and the best practices to help you succeed. YOu will be armed to the teeth with everything you could ever need to finish your first long distance races and beyond. Here's what you can expect to learn from this course: What it Takes to Run a Marathon Timeframe Beginner Stage Intermediate Level Advanced Level Mental Preparation Setting Goals Running Alone Versus Running with a Buddy How to Use Running Gadgets Get Enough Rest Distinguishing Between Good Pain and Bad Pain Having a Proper Form and Breathing Technique Which Part of Your Foot Should Strike The Ground First? big sur marathon training plan: The Runner's World Big Book of Marathon and Half-Marathon Training Jennifer Van Allen, Bart Yasso, Amby Burfoot, Pamela Nisevich Bede, Editors of Runner's World Maga, 2012-06-05 The first dedicated book on marathon and half marathon training from the renowned experts at Runner's World Runner's World Big Book of Marathon and Half-Marathon Training gives readers the core essentials of marathon training, nutrition, injury prevention, and more. The editors of Runner's World know marathon training better than anyone on the planet. They have spent the last few years inviting readers to share the long, sweaty journey to the starting line, putting themselves on call to personally answer readers' questions 24/7. This book includes testimonials from real runners, more than 25 training plans for every level and ability, workouts, a runner's dictionary, and sample meal plans. Runner's World Big Book of Marathon and Half-Marathon Training is a powerful and winning resource—the ultimate tool kit for anyone who wants to get from the starting line to the finish line.

big sur marathon training plan: Train Like a Mother Dimity McDowell, Sarah Bowen Shea, 2012-03-20 The authors of Run Like a Mother share a comprehensive guide to race training for busy runners of all experience levels. In Train Like a Mother, elite runners Dimitry McDowell and Sarah Bowen Shea offer inspiration and practical advice on how to run a race—from training plan to finish line. Covering four race distances (5K, 10K, half-marathon, and marathon), they discuss pre- and post-race nutrition; strength training; injury prevention (and rehab); the importance of recovery; and everything busy women need to know to add racing to their multitasking schedules. It is all presented with the same wit, empathy, and tone the avid fans connect and identify with.

big sur marathon training plan: Chi Marathon Danny Dreyer, Katherine Dreyer, 2012-03-13 Challenges common practices while outlining a technique-based program for pain- and injury-free high-performance half and full marathons.

big sur marathon training plan: The Running Life Michael Dove, Donald Buraglio, 2010-05-12 Writers like Donald and Mike work at the grassroots level to promote and support our sport. Their love of running shines through every page of what they write. They have a unique perspective on The Running Life and make us smile and gain insight at the same time. Whether you are an experienced runner, a novice, or even a non-runner this compilation of articles will inspire.

--Amby Burfoot, Editor at Large, Runners World Magazine and 1968 Boston Marathon winner As a resident of Pacific Grove, Im just like all the other runners on the Central Coast. We eagerly await the Thursday edition of the Monterey Herald so we can see what Donald and Mike are thinking and saying about The Running Life. Its great that this book will allow a wider audience the opportunity of reading these great columns.--Blake Russell, 2008 Womens Olympic Marathon Im out in Buraglio and Dove territory every year for the Big Sur Marathon. Its great to swap stories with Donald and Mike, run, and enjoy the magnificent Central Coast. They are both very knowledgeable and their articles cover every aspect of our sport. A fun read for sure.--Bart Yasso, Chief Runner, Runners World Magazine Ive always been an instinctive runner. I love to run and feel the flow. Donald and

Mike capture all I love about running in their articles. They know the spirit as well as the technical side of running. I recommend this series of articles for anyone. You will really capture and understand why we love The Running Life. --Nelly Wright, Pacific Grove, California, 1984 Womens Olympic Marathon

big sur marathon training plan: Logic and Information Keith J. Devlin, 1995-09-29 Intelligence can be characterised both as the ability to absorb and process information and as the ability to reason. Humans and other animals have both of these abilities to a greater or lesser degree, but the search for artificial intelligence has been hampered by our inability to create a theory that covers both of these characteristics. In this provocative and ground-breaking book, Professor Keith Devlin argues that to obtain a deeper understanding of the nature of intelligence and knowledge acquisition, we must broaden our concept of logic. For these purposes, Devlin introduces the concept of the infon, a quantum of information, and merges it with situations, a mathematical construction generalising the notion of sets developed by Barwise and Perry at Stanford University in order to study the meaning of natural languages. He develops and describes the theory here in general and intuitive terms, and discusses its relevance to a variety of concerns such as artificial intelligence, cognition, natural language and communication.

big sur marathon training plan: Boston Marathon Or Bust Scott S. Armstrong, 2007-10-01 In Boston Marathon or Bust, Scott Sharp Armstrong, success coach, entrepreneur and owner of Colorado's Boulder Coaching Academy (www.bouldercoachingacademy.com), shares his story of taking a big dream, qualifying for and running in the 100th Boston Marathon, and turning it into reality by showcasing his step-by-step plan for guaranteed success.

big sur marathon training plan: Runner's World, 2006

big sur marathon training plan: Marathon Jeff Galloway, 2001 Marathon running is a sport that many consider too daunting, better in the viewing than the doing. Olympian Jeff Galloway dispels such notions in a book that takes the mystery -- and misery -- out of distance running. Marathon! shows how just about anyone can run a marathon and, given the right attitude and training, finish the race. Galloway has designed a low-mileage marathon training program that has been used by over 10,000 people with a 98 percent success rate. The book includes the latest information on workouts, form innovations, pace charts, prediction tables, and motivation strategies.

big sur marathon training plan: Runner's World, 2006-10 Runner's World magazine aims to help runners achieve their personal health, fitness, and performance goals, and to inspire them with vivid, memorable storytelling.

big sur marathon training plan: Marathon Training For Dummies Tere Stouffer Drenth, 2003-03-07 In today's modern world, there's no need for anyone to run twenty-five miles to deliver a message, as Pheidippides did from Marathon to Athens around 500 B.C. However, hundreds of runners each year run 26.2 miles at hundreds of marathons worldwide. To conquer this mountainous challenge, you must know how to properly eat, stretch, identify and treat injuries, and develop a running program that hones your mind and body into a running machine. Marathon Training For Dummies is for everyone who has always thought about running a marathon or half-marathon (13.1 miles) and for seasoned runners who want to tackle the challenge safely and successfully. This quick-read reference helps all runners: Add strength and speed Weight train Improve your technique Eat to maximize endurance Treat injuries Choose your races In just four to six months of dedicated training, any runner can be full y prepared to tackle a marathon. Map out an exercise program, choose shoes, and plan the race strategy that will get you across the finish line. Marathon Training For Dummies also covers the following topics and more: How far how fast? Blazing the best trail Stretching methods Doing LSD (Long, Slow Distance) Tempo-run training The last 24 hours The best tune-up races in North America The week after the marathon With several hundred thousand people finishing marathons each year, you'll meet plenty of interesting people running along with you. There are numerous rewards for conquering the mental and physical challenges of a marathon, and this fun and friendly guide is your road map to achieving them.

big sur marathon training plan: From the Coast to the Keys: 50 Unforgettable U.S.

Marathons Pasquale De Marco, 2025-05-05 **From the Coast to the Keys: 50 Unforgettable U.S. Marathons** is the ultimate guide to running marathons in the United States. Whether you are a seasoned marathoner or a first-timer, this book will provide you with all the information you need to plan and execute your next marathon. In this book, you will find: * Detailed descriptions of 50 of the most unforgettable marathons in the United States, including the New York City Marathon, the Boston Marathon, the Chicago Marathon, and the Big Sur Marathon. * Tips on training, nutrition, and race day strategy. * Inspiring stories from runners who have completed marathons. * A comprehensive directory of marathons, with information on race dates, distances, and entry fees. Whether you are looking for a flat and fast course or a challenging mountain marathon, this book has something for everyone. With its in-depth coverage of the most popular marathons in the United States, this book is a must-have for any serious runner. So what are you waiting for? Start planning your next marathon today with **From the Coast to the Keys: 50 Unforgettable U.S. Marathons**! If you like this book, write a review on google books!

big sur marathon training plan: What the Most Successful People Do Before Breakfast Laura Vanderkam, 2013-09-05 What the Most Successful People Do Before Breakfast is a powerful book about high productivity from bestselling author Laura Vanderkam. We're all busy. But we all waste time. What are the secrets of using every hour productively? How do the most successful people spend their time? In this brilliant accessible book, Laura Vanderkam inspires you to rethink your morning routine and jump-start your day. If you use your mornings wisely, you can build habits that will lead to a happier, more productive life. She also helps you to rethink your weekends. She explains why doing nothing can be more exhausting than doing something, how to balance work and play, and why Sunday nights are crucial. Finally she challenges you to make the most of your time at the office. Focusing on matching your to-do list to your natural body clock, she shows you how to maximize your productivity so you can accomplish more in less time. By blending stories of fascinating people with cutting-edge scientific research, Vanderkam shows us how to maximize our valuable mornings, make the most of our working hours, and enjoy the results with deeply satisfying weekends. Laura Vanderkam is the author of 168 Hours and All the Money in the World. Her work has appeared in the Wall Street Journal, CBS MoneyWatch, USA Today, and Fortune, among others.

big sur marathon training plan: *Woman's Complete Guide to Running* Jeff Galloway, Barbara Galloway, 2011 Offers a step-by-step running program specifically designed for the needs and concerns of women, and includes tips on staying motivated, building endurance, and strengthening muscles.

big sur marathon training plan: What the Most Successful People Do on the Weekend Laura Vanderkam, 2013-01-17 Laura Vanderkam, the author of What the Most Successful People Do Before Breakfast, shows how we can take control of our weekends in What the Most Successful People Do on the Weekend. Many of us breathe a grateful TGIF when Friday rolls around, envisioning a weekend full of both productivity and refreshment. Yet too often our precious weekends seem to disappear, eaten up by unproductive work or leisure that fails to energize us. Monday morning comes too fast, finding us still unrested, with tasks still undone. Drawing on real-life stories and scientific research, Vanderkam explains why doing nothing can be more exhausting than doing something and why happy people make weekend plans in advance. She shares weekend tips gleaned from busy people such as politician and news host Mike Huckabee, former CEO Frank Baxter, and TV producer Aliza Rosen. She lists the kind of weekend activities that make people happiest, explains why it's important to unplug at least for a little while, and shares the

secret of why Sunday nights may be the most important hours. What the Most Successful People Do on the Weekend is a fun, practical guide that will inspire you to rethink your weekends and start your workweek refreshed, renewed, and on track. Laura Vanderkam is the author of 168 Hours: You Have More Time Than You Think and All the Money in the World: What the Happiest People Know About Getting and Spending. Her work has appeared in the Wall Street Journal, the Huffington Post, USA Today, Scientific American, and Reader's Digest, among other publications. She lives outside Philadelphia with her husband and their three children.

big sur marathon training plan: FEmpowerment Sandy Shepard, 2007-08-17 By using the Bond Girl (from the ever-popular James Bond movies and books) as her paradigm, fEmpowerment coach Sandy Shepard leads the reader to experience, then unleash, her inner authentic self. Ms. Shepard states that she aims to change the world, one Bond Girl at a time. A successful businesswoman and attorney, Ms. Shepard is particularly passionate about helping harried women weave sensual femininity into their daily routines, and this book uses a friendly best girlfriend style to help women empower their lives.
