The social lives of these students take place in cyberspace instead of the student pub. Their favorite narratives exist in video games, not books. How do teachers who grew up in a different world engage these students without watering down pedagogy? Clint Burnham and Paul Budra have assembled a group of specialists in visual poetry, graphic novels, digital humanities, role-playing games, television studies, and, yes, even the middle-brow novel, to address this question. Contributors give a brief description of their subject, investigate how it confronts traditional notions of the literary, and ask what contemporary literary theory can illuminate about their text before explaining how their subject can be taught in the 21st-century classroom.

dr quinn medicine woman dvd box set: The Aesthetics of Nostalgia TV Alex Bevan, 2019-02-07 The Aesthetics of Nostalgia TV explores the aesthetic politics of nostalgia for 1950s and 60s America on contemporary television. Specifically, it looks at how nostalgic TV production design shapes and is shaped by larger historical discourses on gender and technological change, and America's perceived decline as a global power. Alex Bevan argues that the aesthetics of nostalgic TV tell stories of their own about historical decline and progress, and the place of the baby boomer television suburb in American national memory. She contests theories on nostalgia that see it as stagnating, regressive, or a reversion to outdated gender and racial politics, and the technophobic longing for a bygone era; and, instead, argues nostalgia is an important form of historical memory and vehicle for negotiating periods of historical transition. The book addresses how and why the shows construct the boomer era as a placeholder for gender, racial, technological, and declensionist discourses of the present. The book uses Mad Men (AMC, 2007-2015), Ugly Betty (ABC, 2006-2010), Desperate Housewives (ABC, 2004-2012), and film remakes of 1950s and 60s family sitcoms as primary case studies.

dr quinn medicine woman dvd box set: Travelling Languages John O'Regan, Jane Wilkinson, Mike Robinson, 2024-11-01 Based on the commonly held assumption that we now live in a world that is 'on the move', with growing opportunities for both real and virtual travel and the blurring of boundaries between previously defined places, societies and cultures, the theme of this book is firmly grounded in the interdisciplinary field of 'Mobilities'. 'Mobilities' deals with the movement of people, objects, capital, information, ideas and cultures on varying scales, and across a variety of borders, from the local to the national to the global. It includes all forms of travel from

forced migration for economic or political reasons, to leisure travel and tourism, to virtual travel via the myriad of electronic channels now available to much of the world's population. Underpinning the choice of theme is a desire to consider the important role of languages and intercultural communication in travel and border crossings; an area which has tended to remain in the background of Mobilities research. The chapters included in this volume represent unique interdisciplinary understandings of the dual concepts of mobile language and border crossings, from crossings in 'virtual life' and 'real life', to crossings in literature and translation, and finally to crossings in the 'semioscape' of tourist guides and tourism signs. This book was originally published as a special issue of Language and Intercultural Communication.

Wildermuth, 2018-04-17 This book works to complicate and push against common arguments that the Western from its inception is an anti-feminist genre. By focusing on representations of women professionals in Westerns, it shows that women in cinematic and televisual Westerns sometimes do acquire agency and empowerment in the private and public realms, despite our culture's tendency to gender the former as feminine and the latter as solely masculine. The study reviews the relationship of these progressive Westerns to both explicit and latent feminist ideologies relevant to their times, as the films evolved from the 1930s to the twenty-first century.
