Delaney, 2023-09-01 In 1982 Johns-Manville, a major asbestos manufacturer, declares itself insolvent to avoid paying claims resulting from exposure to its products. A year later, Continental Airlines, one of the top ten carriers in the United States, claims a deficit when the union resists plans to cut labor costs. Later still, oil powerhouse Texaco cries broke rather than pay damages resulting from a courtroom defeat by archrival Pennzoil. Bankruptcy, once a term that sent shudders up a manager's spine, has now become a potent weapon in the corporate arsenal. In his timely and challenging study, Kevin Delaney explores this profound change in our legal landscape, where corporations with billions of dollars in assets employ bankruptcy to achieve specific political and organizational objectives. As a consequence, bankruptcy court is rapidly becoming an arena in which crucial social issues are resolved: How and when will people dying of asbestos poisoning be compensated? Can companies unilaterally break legally negotiated labor contracts? What are the ethical and legal rules of the corporate takeover game? In probing the Chapter 11 bankruptcies of Johns-Manville, Frank Lorenzo's Continental Airlines, and Texaco, Delaney shows not only that bankruptcy is pursued by managers more and more as a strategy, but that it is becoming accepted by the business community as a viable option, and not just a last-ditch solution. This searing exposé of current corporate practices will incite debate among corporate executives, lawyers, legislators, and policy makers. In 1982 Johns-Manville, a major asbestos manufacturer, declares itself insolvent to avoid paying claims resulting from exposure to its products. This book provides you with analyses that allow you to identify which of your selection procedures have adverse impact. The validation steps will help you decide whether to keep the selection procedure (because it's valid), change it, or stop using it altogether. The CD included in the back cover of the book includes tools (which may be used on a trial evaluation basis) describing several of the functions described in the book, including Adverse Impact Toolkit®, Test Validation and Analysis Program® (TVAP®), and Guidelines Oriented Job Analysis® (GOJA®) Manual. This guide goes beyond the concepts, theories and ideas behind adverse impact and test validation. It not only explains what to do but crucially, also shows you how to do it.

chang test bank chapter 11: The Strategy-focused Organization Robert S. Kaplan, David P.

Norton, 2001 In today's business environment, strategy has never been more important. Yet research shows that most companies fail to execute strategy successfully. Behind this abysmal track record lies an undeniable fact: many companies continue to use management processes-top-down, financially driven, and tactical-that were designed to run yesterday's organizations. Now, the creators of the revolutionary performance management tool called the Balanced Scorecard introduce a new approach that makes strategy a continuous process owned not just by top management, but by everyone. In The Strategy-Focused Organization, Robert Kaplan and David Norton share the results of ten years of learning and research into more than 200 companies that have implemented the Balanced Scorecard. Drawing from more than twenty in-depth case studies-including Mobil, CIGNA, Nova Scotia Power, and AT T Canada-Kaplan and Norton illustrate how Balanced Scorecard adopters have taken their groundbreaking tool to the next level. These organizations have used the scorecard to create an entirely new performance management framework that puts strategy at the center of key management processes and systems. Kaplan and Norton articulate the five key principles required for building Strategy-Focused Organizations: (1) translate the strategy to operational terms, (2) align the organization to the strategy, (3) make strategy everyone's everyday job, (4) make strategy a continual process, and (5) mobilize change through strong, effective leadership. The authors provide a detailed account of how a range of organizations in the private, public, and nonprofit sectors have deployed these principles to achieve breakthrough, sustainable performance improvements. Presenting a practical, proven framework steeped in rich case study experience, The Strategy-Focused Organization helps solve a universal management problem-not just how to formulate strategy, but how to make it work. Building on one of the most revolutionary business ideas of our time, this important book shows how today's leaders can shape their own companies to meet the challenges and reap the rewards of a new competitive era. Robert S. Kaplan is the Marvin Bower Professor of Leadership Development at Harvard Business School. David P. Norton is President of Balanced Scorecard Collaborative, Inc.
