

dev10 software developer training program

Dev10 Software Developer Training Program: Launching Careers in Tech with Confidence

dev10 software developer training program has been making waves as an innovative pathway for aspiring developers to break into the technology industry. Unlike traditional coding bootcamps or online courses, dev10 offers a structured, immersive experience that combines hands-on learning, real-world projects, and professional development. For those wondering how to bridge the gap between coding knowledge and employability, dev10 provides a comprehensive solution that prepares participants for the demands of a software development career.

What Sets the Dev10 Software Developer Training Program Apart?

The tech landscape is crowded with training programs promising to turn novices into job-ready developers, but dev10 distinguishes itself through its unique blend of mentorship, project-based learning, and career support. This program is designed not just to teach coding languages but to cultivate the problem-solving mindset and collaboration skills essential in a professional software development environment.

Immersive Curriculum Tailored to Industry Needs

The dev10 software developer training program focuses heavily on current market demands. Participants dive deep into programming languages such as Java, Python, and JavaScript, alongside frameworks and tools widely used in the industry. The curriculum is regularly updated to keep pace with evolving technologies, ensuring that graduates have relevant and practical knowledge.

Beyond syntax and theory, the program emphasizes software development methodologies like Agile and Scrum, version control with Git, and continuous integration practices. This holistic approach ensures learners are not only coders but effective team members who understand the full software development lifecycle.

Hands-On Projects for Real-World Experience

One of the most compelling features of the dev10 program is its focus on experiential learning. Students work on live projects that simulate real client requirements and constraints, allowing them to apply their skills in a context that mirrors professional settings. This project-based approach enhances retention and builds a portfolio that showcases their abilities to prospective employers.

Who Should Consider the Dev10 Software Developer Training Program?

Whether you're a recent graduate, a career changer, or someone looking to sharpen your coding skills, dev10 offers a pathway tailored to a variety of backgrounds.

Career Changers Seeking a Fresh Start

Many participants join dev10 with little to no prior coding experience but a strong desire to enter tech. The program's supportive environment and structured learning paths make it accessible for those transitioning from other industries. It builds foundational skills while simultaneously preparing learners for the realities of software development roles.

Recent Graduates Looking for Practical Skills

While college degrees provide theoretical knowledge, many graduates find themselves underprepared for the collaborative and fast-paced nature of software development teams. Dev10 fills this gap by providing practical training and mentorship that bridge academics with professional expectations.

Key Components of the Dev10 Training Experience

Understanding the structure and resources available within the dev10 software developer training program helps prospective students gauge how it can benefit their career trajectory.

Mentorship and Support

Mentorship is a cornerstone of the dev10 experience. Experienced software developers and industry professionals guide learners through technical challenges and offer career advice. This one-on-one support fosters confidence and accelerates skill acquisition.

Career Services and Job Placement

Completing technical training is only part of the journey. Dev10 invests heavily in career services, providing resume workshops, interview preparation, and networking opportunities. Graduates often benefit from connections to hiring partners and a track record of successful job placements.

Community and Collaboration

The program encourages collaboration through group projects and peer reviews, mirroring the cooperative nature of software development teams. This sense of community not only makes learning more engaging but also builds soft skills crucial for workplace success.

Tips to Maximize Success in the Dev10 Software Developer Training Program

Enrolling in dev10 is a significant step, but success depends on how participants engage with the training.

- **Commit Fully:** Treat the program like a full-time job. Consistent attendance and practice are key to mastering complex concepts.
- **Engage with Mentors:** Don't hesitate to ask questions or seek feedback. Mentors are there to help you grow.
- **Collaborate with Peers:** Learning from others' perspectives enriches your understanding and builds teamwork skills.
- **Build Your Portfolio:** Take every project seriously and document your work to showcase your abilities to future employers.
- **Prepare for Interviews:** Leverage the career services offered to polish your interviewing skills and understand employer expectations.

Why Dev10 is a Smart Choice for Aspiring Developers

The tech industry demands not only technical know-how but adaptability, communication, and a problem-solving mindset. The dev10 software developer training program is designed with these qualities in mind, blending technical rigor with personal development. By focusing on employability and real-world readiness, it reduces the uncertainty many face when entering tech careers.

Furthermore, dev10's reputation among employers as a source of well-prepared junior developers gives graduates an edge in competitive job markets. The program's comprehensive training, coupled with ongoing support, makes it a valuable investment for anyone serious about launching or advancing a career in software development.

In a world where technology continually evolves, having a strong foundation and the ability to learn quickly are invaluable. The dev10 software developer training program offers both, empowering individuals to step confidently into the tech workforce and thrive.

Frequently Asked Questions

What is the Dev10 Software Developer Training Program?

The Dev10 Software Developer Training Program is an intensive training initiative designed to equip aspiring software developers with in-demand technical skills and real-world project experience to accelerate their career launch in the tech industry.

Who is eligible to apply for the Dev10 Software Developer Training Program?

Eligibility typically includes recent graduates, career changers, and professionals with a passion for software development who want to gain practical coding skills and industry-relevant experience.

What programming languages and technologies are taught in the Dev10 program?

The Dev10 program covers a range of technologies including Java, JavaScript, HTML/CSS, SQL, cloud computing, and agile software development methodologies to prepare participants for diverse development roles.

How long does the Dev10 Software Developer Training Program last?

The program usually lasts about 12 to 14 weeks, combining classroom instruction with hands-on project work and real-world client engagements.

Is the Dev10 program paid or unpaid?

The Dev10 program is typically a paid training program, providing participants with a stipend during the training period, along with job placement assistance after graduation.

Does Dev10 provide job placement assistance after training?

Yes, Dev10 offers job placement support and connects graduates with partner companies and clients to help them secure full-time software development roles after completing the program.

Where is the Dev10 Software Developer Training Program offered?

Dev10 training is offered in multiple locations across the United States, including in-person and virtual options to accommodate diverse learner needs.

What makes Dev10 different from other software developer

bootcamps?

Dev10 differentiates itself through its focus on real-world client projects, personalized mentorship, and a strong emphasis on career readiness and placement support.

How can I apply to the Dev10 Software Developer Training Program?

You can apply by visiting the official Dev10 website, completing an online application form, and participating in an interview or assessment process to determine your fit for the program.

Additional Resources

Dev10 Software Developer Training Program: An In-Depth Professional Review

dev10 software developer training program has emerged as a noteworthy initiative aimed at bridging the gap between aspiring tech talent and the demands of the software development industry. As the technology landscape continues to evolve rapidly, organizations are actively seeking developers who not only possess theoretical knowledge but are also industry-ready with hands-on experience. Dev10 positions itself uniquely in this context by offering a structured, immersive training environment designed to accelerate career growth for participants. This review delves into the program's structure, value proposition, and how it compares to other coding bootcamps and developer training programs in today's competitive market.

Overview of the Dev10 Software Developer Training Program

The dev10 software developer training program is a full-time, immersive learning experience that targets individuals looking to transition into software development roles. Typically spanning 12 to 14 weeks, the program combines intensive classroom instruction with real-world project experience. Unlike traditional bootcamps that focus solely on coding languages, dev10 integrates soft skills development, agile methodologies, and professional workplace readiness, offering a holistic approach to developer training.

One of the defining features of the dev10 program is its cohort-based model. Participants join a group of peers, fostering a collaborative learning environment that mirrors actual software development teams. This peer interaction enhances problem-solving skills and promotes networking opportunities, which are often critical for career advancement.

Curriculum and Technical Focus

The curriculum of the dev10 software developer training program is carefully curated to cover foundational and advanced topics in software development. Key programming languages such as Java, C#, and JavaScript are emphasized, reflecting their market demand. Additionally, the program

integrates database management, web development frameworks, and cloud technologies to ensure participants are well-rounded developers.

Beyond coding skills, dev10 stresses understanding software development life cycles (SDLC), version control with Git, unit testing, and continuous integration/continuous deployment (CI/CD) pipelines. This comprehensive training prepares graduates for the multifaceted nature of modern software engineering roles.

Hands-on Experience and Real-world Projects

A salient aspect of the dev10 software developer training program is its commitment to experiential learning. Participants engage in team-based projects that simulate workplace scenarios, ranging from building web applications to deploying software in cloud environments. These projects are designed to replicate client requirements and deadlines, providing invaluable experience in managing scope, collaboration, and quality assurance.

This project-centric approach distinguishes dev10 from many coding bootcamps that prioritize individual assignments. By fostering teamwork and practical problem-solving, the program equips participants with skills that employers prioritize when hiring junior developers.

Comparative Analysis: Dev10 vs Other Developer Training Programs

In the crowded field of software developer training, dev10 competes with numerous bootcamps and apprenticeship models. When compared to popular bootcamps like General Assembly, Flatiron School, or Lambda School, dev10's unique selling points become apparent.

- **Industry Partnerships:** Dev10 often collaborates with established tech companies and government entities, offering participants potential pathways to employment post-completion.
- **Soft Skills Emphasis:** Many bootcamps focus heavily on technical skills alone. Dev10 integrates communication, teamwork, and client interaction training, reflecting real-world professional demands.
- **Cost and Accessibility:** While some bootcamps charge upwards of \$15,000, dev10's tuition model can be more flexible, occasionally supported by sponsorships or employer partnerships.
- **Duration and Intensity:** Dev10's 12-14 week timeline is comparable to other immersive programs but balances intensity with comprehensive coverage of both coding and workplace skills.

However, it is worth noting that some bootcamps offer more specialization tracks, such as data science or UX/UI design, which dev10 currently does not emphasize. For learners seeking hyper-

specialization, alternative programs might be more suitable.

Placement and Career Support

Career services are a critical factor when evaluating developer training programs. Dev10 provides dedicated career coaching, resume workshops, and interview preparation tailored to the tech industry. The program's network of hiring partners gives graduates a competitive edge in job searches.

Data from recent cohorts indicate a strong placement rate within six months post-graduation, with many alumni securing roles as software developers, QA engineers, or technical support specialists. The structured career support combined with project experience enables participants to present themselves as work-ready candidates.

Pros and Cons of the Dev10 Software Developer Training Program

Every training program has strengths and limitations. Here is a balanced look at dev10:

- **Pros:**

- Comprehensive curriculum blending technical and soft skills
- Collaborative, cohort-based learning environment
- Strong emphasis on real-world project experience
- Robust career services and industry connections
- Flexible tuition options and potential sponsorships

- **Cons:**

- Limited specialization tracks beyond core software development
- Program intensity may be challenging for learners balancing other commitments
- Availability may be geographically limited depending on partnerships

Who Should Consider the Dev10 Training Program?

The dev10 software developer training program is well-suited for career changers and early-career professionals who seek a structured, immersive experience to jumpstart a career in software development. Individuals who thrive in team environments and prefer hands-on learning will find the program's design particularly beneficial.

For those with some prior coding knowledge but lacking professional experience, dev10 provides an opportunity to polish both technical and workplace skills. Conversely, seasoned developers looking for advanced specialization might find other programs more aligned with their goals.

Industry Relevance and Future Outlook

As technology continues to permeate every sector, the demand for skilled developers remains robust. Programs like dev10 address a critical need by producing candidates who are not only technically competent but also adaptable and communicative.

The integration of cloud technologies, agile practices, and testing methodologies within the curriculum ensures graduates are prepared for evolving industry standards. Furthermore, dev10's commitment to continuous improvement and employer feedback positions it to remain relevant amid shifting market demands.

In an era where hiring managers value practical experience as much as coding proficiency, dev10's focus on real-world projects and teamwork offers a tangible advantage. As remote work and distributed teams become increasingly common, the soft skills honed during the program will also prove invaluable.

Overall, the dev10 software developer training program represents a comprehensive pathway for aspiring developers to enter the tech workforce with confidence and competence.

dev10 software developer training program: Agents and Multi-agent Systems: Technologies and Applications 2024 Gordan Jezic, Y.-H. Chen-Burger, Mario Kušek, Roman Šperka, Robert J. Howlett, Lakhmi C. Jain, 2025-03-01 This book highlights new trends and challenges in research on agents and the new digital and knowledge economy. It includes papers on business process management, agent-based modeling and simulation and anthropic-oriented computing that were originally presented at the 18th International KES Conference on Agents and Multi-Agent Systems: Technologies and Applications (KES-AMSTA 2024), held in Madeira, Portugal,

on June 19-21, 2024. The respective papers cover topics such as software agents, multi-agent systems, agent modeling, mobile and cloud computing, big data analysis, business intelligence, artificial intelligence, social systems, computer-embedded systems and nature-inspired manufacturing, all of which contribute to the modern digital economy.

dev10 software developer training program: *Proceedings of the International Conference on Cognitive and Intelligent Computing* Amit Kumar, Gheorghita Ghinea, Suresh Merugu, Takako Hashimoto, 2022-10-31 This book presents original, peer-reviewed select articles from the International Conference on Cognitive & Intelligent Computing (ICCIC - 2021), held on December 11-12, 2021, at Hyderabad, India. The proceedings has cutting edge Research outcome related to Machine learning in control applications, Soft computing, Pattern Recognition, Decision Support Systems, Text analytics and NLP, Statistical Learning, Neural Network Learning, Learning Through Fuzzy Logic, Learning Through Evolution (Evolutionary Algorithms), Reinforcement Learning, Multi-Strategy Learning, Cooperative Learning, Planning And Learning, Multi-Agent Learning, Online And Incremental Learning, Scalability Of Learning Algorithms, Inductive Learning, Inductive Logic Programming, Bayesian Networks, Support Vector Machines, Case-Based Reasoning, Multi-Agent Systems, Human-Computer Interaction, Data Mining and Knowledge Discovery, Knowledge Management and Networks, Data Intensive Computing Architecture, Medicine, Health, Bioinformatics, and Systems Biology, Industrial and Engineering Applications, Security Applications, Smart Cities, Game Playing and Problem Solving, Intelligent Virtual Environments, Economics, Business, And Forecasting Applications. Articles in the book are carefully selected on the basis of their application orientation. The content is expected to be especially useful for Professionals, Researchers, Research students working in the area of cognitive and intelligent computing.

dev10 software developer training program: *EDA Directory of Approved Projects* United States. Economic Development Administration,

dev10 software developer training program: *Towards a Synergistic Combination of Research and Practice in Software Engineering* Piotr Kosiuczenko, Lech Madeyski, 2017-08-04 This book reports on recent advances in software engineering research and practice. Divided into 15 chapters, it addresses: languages and tools; development processes; modelling, simulation and verification; and education. In the first category, the book includes chapters on domain-specific languages, software complexity, testing and tools. In the second, it reports on test-driven development, processing of business rules, and software management. In turn, subsequent chapters address modelling, simulation and verification of real-time systems, mobile systems and computer networks, and a scrum-based framework. The book was written by researchers and practitioners, the goal being to achieve a synergistic combination of research results achieved in academia and best practices used in the industry, and to provide a valuable reference guide for both groups.

dev10 software developer training program: *Network World* , 1993-11-01 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

dev10 software developer training program: *Engineering Education for Sustainability* João Paulo Davim, 2022-09-01 Understood to be a key issue in modern society, sustainability is characterized by its three essential pillars, namely: the environment, society and the economy. Education plays an important role in how people understand and accept sustainability. The integration of sustainability in engineering education is a relatively new phenomenon, and presenting information about engineering education for sustainability is of great interest to improve communication between professors, researchers and students at universities, institutes and research laboratories. Topics discussed in the book include: Experiences from 5 years of educating sustainability to computer science students Review of decision support methods in green and sustainable supply chains Analyzing the drivers of engineering education for sustainability using the

MCDM approach Visualization technologies in construction education: a comprehensive review of recent advances A legal framework and compliance with construction safety laws and regulations

dev10 software developer training program: Network World , 1994-07-25 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. Readers are responsible for designing, implementing and managing the voice, data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce.

dev10 software developer training program: Maritime Information Review , 1993

dev10 software developer training program: Computer Science and Education Wenxing Hong, Yang Weng, 2023-05-13 This three-volume set constitutes selected papers presented during the 17th International Conference on Computer Science and Education, ICCSE 2022, held in Ningbo, China, in August 2022. The 168 full papers and 43 short papers presented were thoroughly reviewed and selected from the 510 submissions. They focus on a wide range of computer science topics, especially AI, data science, and engineering, and technology-based education, by addressing frontier technical and business issues essential to the applications of data science in both higher education and advancing e-Society.

dev10 software developer training program: Technical Report Adriano, Christian, Bleifuß, Tobias, Cheng, Lung-Pan, Diba, Kiarash, Fricke, Andreas, Grapentin, Andreas, Kovacs, Robert, Krejca, Martin, Jiang, Lan, Mandal, Sankalita, Marwecki, Sebastian, Matthies, Christoph, Mattis, Toni, Meinel, Christoph, Niephaus, Fabio, Pirl, Lukas, Quinzan, Francesco, Ramson, Stefan, Rezaei, Mina, Risch, Julian, Rothenberger, Ralf, Roumen, Thijs, Stojanovic, Vladeta, Wolf, Johannes, 2019 Der Entwurf und die Realisierung dienstbasierender Architekturen wirft eine Vielzahl von Forschungsfragestellungen aus den Gebieten der Softwaretechnik, der Systemmodellierung und -analyse, sowie der Adaptierbarkeit und Integration von Applikationen auf.

Komponentenorientierung und WebServices sind zwei Ansätze für den effizienten Entwurf und die Realisierung komplexer Web-basierender Systeme. Sie ermöglichen die Reaktion auf wechselnde Anforderungen ebenso, wie die Integration großer komplexer Softwaresysteme. Heute übliche Technologien, wie J2EE und .NET, sind de facto Standards für die Entwicklung großer verteilter Systeme. Die Evolution solcher Komponentensysteme führt über WebServices zu dienstbasierenden Architekturen. Dies manifestiert sich in einer Vielzahl von Industriestandards und Initiativen wie XML, WSDL, UDDI, SOAP. All diese Schritte führen letztlich zu einem neuen, vielversprechenden Paradigma für IT Systeme, nach dem komplexe Softwarelösungen durch die Integration vertraglich vereinbarter Software-Dienste aufgebaut werden sollen. Service-Oriented Systems Engineering repräsentiert die Symbiose bewährter Praktiken aus den Gebieten der Objektorientierung, der Komponentenprogrammierung, des verteilten Rechnen sowie der Geschäftsprozesse und berücksichtigt auch die Integration von Geschäftsanliegen und Informationstechnologien. Die Klausurtagung des Forschungskollegs Service-oriented Systems Engineering findet einmal jährlich statt und bietet allen Kollegiaten die Möglichkeit den Stand ihrer aktuellen Forschung darzulegen. Bedingt durch die Querschnittstruktur des Kollegs deckt dieser Bericht ein weites Spektrum aktueller Forschungsthemen ab. Dazu zählen unter anderem Human Computer Interaction and Computer Vision as Service; Service-oriented Geovisualization Systems; Algorithm Engineering for Service-oriented Systems; Modeling and Verification of Self-adaptive Service-oriented Systems; Tools and Methods for Software Engineering in Service-oriented Systems; Security Engineering of Service-based IT Systems; Service-oriented Information Systems; Evolutionary Transition of Enterprise Applications to Service Orientation; Operating System Abstractions for Service-oriented Computing; sowie Services Specification, Composition, and Enactment. Design and Implementation of service-oriented architectures imposes a huge number of research questions from the fields of

software engineering, system analysis and modeling, adaptability, and application integration. Component orientation and web services are two approaches for design and realization of complex web-based system. Both approaches allow for dynamic application adaptation as well as integration of enterprise application. Commonly used technologies, such as J2EE and .NET, form de facto standards for the realization of complex distributed systems. Evolution of component systems has lead to web services and service-based architectures. This has been manifested in a multitude of industry standards and initiatives such as XML, WSDL UDDI, SOAP, etc. All these achievements lead to a new and promising paradigm in IT systems engineering which proposes to design complex software solutions as collaboration of contractually defined software services. Service-Oriented Systems Engineering represents a symbiosis of best practices in object-orientation, component-based development, distributed computing, and business process management. It provides integration of business and IT concerns. The annual Ph.D. Retreat of the Research School provides each member the opportunity to present his/her current state of their research and to give an outline of a prospective Ph.D. thesis. Due to the interdisciplinary structure of the research school, this technical report covers a wide range of topics. These include but are not limited to: Human Computer Interaction and Computer Vision as Service; Service-oriented Geovisualization Systems; Algorithm Engineering for Service-oriented Systems; Modeling and Verification of Self-adaptive Service-oriented Systems; Tools and Methods for Software Engineering in Service-oriented Systems; Security Engineering of Service-based IT Systems; Service-oriented Information Systems; Evolutionary Transition of Enterprise Applications to Service Orientation; Operating System Abstractions for Service-oriented Computing; and Services Specification, Composition, and Enactment.

dev10 software developer training program: *Network World* , 1994-12-19 For more than 20 years, Network World has been the premier provider of information, intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations. dev10 software developer training program: *ENR* , 1995

dev10 software developer training program: *Case Studies on Blended Learning in Higher Education* Santosh Panda, Sanjaya Mishra, Pradeep Kumar Misra, 2024-12-29 This book presents a collection of curated case studies written by esteemed international experts, focusing on planning, management, and evaluation of designing, developing, and delivering high-quality blended programmes and courses. Embracing a holistic perspective of online and blended learning and based on the mapping of diverse national and institutional education systems, it offers an insightful exploration of innovative and best practices through case studies on policy, planning and management, and quality assurance for blended learning in higher education. Each chapter presents a theoretical background, contextual analysis, and a reflective practitioner approach. The topics covered include national and international policies and guidelines for blended learning in higher

education, issues related to planning and management, learner satisfaction and engagement, costing of blended learning and return on investment, quality assurance, and program evaluation. The book explores blended learning as a scholarly practice for continuous learning and improvement and for generating new knowledge and insights. Each chapter concludes with reflective questions to help the reader apply the lessons learned. This book interests a diverse audience, including policymakers, accreditation agencies, managers of teaching and learning centers in higher education institutions, teachers in HEIs, and those involved in blended learning research. Its comprehensive coverage and practical insights make it an essential resource for those seeking to navigate the complexities of implementing effective blended learning initiatives.

dev10 software developer training program: Advances in Quantitative Ethnography Golnaz Arastoopour Irgens, Simon Knight, 2023-10-21 This book constitutes the refereed proceedings of the 5th International Conference on Advances in Quantitative Ethnography, ICQE 2023, held in Melbourne, VIC, Australia, during October 8-12, 2023. The 33 full papers included in this book were carefully reviewed and selected from 39 submissions. They were organized in topical sections as follows: understanding learners and learning; society, culture, identity, and justice; and advances in QE methodologies.

dev10 software developer training program: Generating Actionable Climate Information in Support of Climate Adaptation and Mitigation Andreas Marc Fischer, Janette Bessembinder, Fai Fung, Hans Olav Hygen , Katharine Jacobs, 2024-07-04 Climate change is under way in full extent, adversely affecting more and more facets in nature, society and economy. The observations and the projections of these changes are increasingly important to consider in long-term planning, given the need to adapt to the multi-sectoral climate impacts that can be anticipated. In most cases, it is the information on the local scale in a user-oriented way that is most relevant in this context. Over recent years, many countries and organisations have set up climate services such as factsheets, brochures, web-tools, data to enable downstream applications and to form a decision support basis for climate action planning (e.g., KNMI14 in the Netherlands, UKCP18 in the UK, CH2018 in Switzerland, 'Climate Change in Australia', NCA4 in the US, Copernicus Climate Data Store / C3S).

dev10 software developer training program: Advanced Quantitative Research Methods for Urban Planners Reid Ewing, Keunhyun Park, 2020-03-12 Advanced Quantitative Research Methods for Urban Planners provides fundamental knowledge and hands-on techniques about research, such as research topics and key journals in the planning field, advice for technical writing, and advanced quantitative methodologies. This book aims to provide the reader with a comprehensive and detailed understanding of advanced quantitative methods and to provide guidance on technical writing. Complex material is presented in the simplest and clearest way possible using real-world planning examples and making the theoretical content of each chapter as tangible as possible. Hands-on techniques for a variety of quantitative research studies are covered to provide graduate students, university faculty, and professional researchers with useful guidance and references. A companion to Basic Quantitative Research Methods for Urban Planners, Advanced Quantitative Research Methods for Urban Planners is an ideal read for researchers who want to branch out methodologically and for practicing planners who need to conduct advanced analyses with planning data.
