history of vicente fernandez: *Warbody* Joshua Howe, Alexander Lemons, 2025-03-11 A friendship between an environmental historian and a chronically ill US Marine yields a powerful exploration into the toxic effects of war on the human body. Alexander Lemons is a Marine Corps scout sniper who, after serving multiple tours during the Iraq War, returned home seriously and mysteriously ill. Joshua Howe is an environmental historian who met Lemons as a student in one of his classes. Together they have crafted a vital book that challenges us to think beyond warfare's

acute violence of bullets and bombs to the “slow violence” of toxic exposure and lasting trauma. In alternating chapters, Lemons vividly describes his time in Fallujah and elsewhere during the worst of the Iraq War, his descent into a decade-long battle with mysterious and severe sickness, and his return to health; Howe explains, with clarity and scientific insight, the many toxicities to which Lemons was exposed and their potential consequences. Together they cover the whirlwind of toxic exposures military personnel face from the things they touch and breathe in all the time, including lead from bullets, jet fuel, fire retardants, pesticides, mercury, dust, and the cocktail of toxicants emitted by the open-air “burn pits” used in military settings to burn waste products like paint, human waste, metal cans, oil, and plastics. They also consider PTSD and traumatic brain injury, which are endemic among the military and cause and exacerbate all kinds of physical and mental health problems. Finally, they explore how both mainstream and alternative medicine struggle to understand, accommodate, and address the vast array of health problems among military veterans. Warbody challenges us to rethink the violence we associate with war and the way we help veterans recover. It is a powerful book with an urgent message for the nearly twenty million Americans who are active military or veterans, as well as for their families, their loved ones, and all of us who depend on their service.

history of vicente fernandez: The Mariachi Voice Juanita Ulloa, 2024 The voice is the most important instrument in Mexican Ranchera (Mariachi) music because the bulk of its repertoire is sung. However, no book on vocal care and production, voice history, diction, technique, graded song lists, and warm-ups for Mariachi singers has been available until now. Dr. Juanita Ulloa has designed The Mariachi Voice to create a bridge between the voice and Mariachi fields, and to extend the reach of training and advocacy for Mariachi vocal training to academic programs, voice studios, and individual singers. Her Operachi style evolved out of her own training, touring, recording, and training of others as a specialist in Mexican and Latin American song. In The Mariachi Voice, Dr. Ulloa shares vocal technique and pedagogy, introducing the female Mariachi fach. She highlights important differences in training the female voice for healthy Ranchera singing while still honoring the style and introduces Mexican Spanish Lyric Diction with International Phonetic Alphabet (IPA). Professor John Nix of University of Texas, San Antonio contributes an article on vocal production and care. Readers will develop cultural sensitivity towards this almost 200-year-old tradition. The Ranchera vocal history chapter explores the crossover classical vocal training of ranchera singer-actors in charro movie musicals, many tracing back to legendary Mexico City based voice teacher José Pierson. It is a wake-up call to raising the standards and accessibility of vocal training. The Mariachi Voice is sure to enrich those who take pride in sharing these songs and their singers as important symbols of Mexico's identity worldwide--
