tyler oliveira political views: Seeing China's Belt and Road Edward Schatz, Rachel Silvey, 2024-12-02 In *Seeing China's Belt and Road*, editors Edward Schatz and Rachel Silvey assemble the ground-level fieldwork of leading scholars to examine the Belt and Road Initiative (BRI) from different downstream contexts, ranging from Central and Southeast Asia to Europe and Africa. Crucially, this book uncovers views of the BRI from Chinese authorities, local businesses, state bureaucrats, expatriated migrants, ordinary citizens, and environmental activists. Through these case studies, the book offers a timely analysis of the dynamic complexity of changes in the world order.

tyler oliveira political views: The Impact of China's Belt and Road Initiative in Southeast Asia Yos Santasombat, Kian Cheng LEE, 2025-02-24 Drawing insights from intensive empirical investigation of the Belt and Road Initiative (BRI) projects in various Southeast Asian countries, this book assesses and analyzes the continuing impact of China's BRI on Thailand and ASEAN at a critical period of Southeast Asian history. Over the past decade, the BRI, a large flagship foreign policy effort of President Xi Jinping, has had a significant economic, political, and environmental impact across the world. Since its inception, the BRI has remained shrouded in confusion and controversy. The Covid-19 pandemic also presented additional challenges for our

understanding of the BRI that warrant further exploration. This volume places special focus on special economic zones (SEZs) and high-speed train projects, and comparatively examines and critically analyzes the risks and benefits stemming from these megaprojects. Breaking away from existing academic studies on the BRI, which have been largely based on macro analysis with a top-down approach and theoretical deliberation, this book focuses on local realities with a qualitative approach to identify the potential impact of the BRI on the development of ASEAN countries. By way of a bottom-up, empirically-rich, first-hand ethnographic account of the risks and benefits of the BRI projects at the local, national, and regional levels in ASEAN, this book makes a substantial contribution to multiple disciplinary arenas, from anthropology, sociology, and history, to political science and international relations, with particular relevance to those researching China and its relationships with Southeast Asia.

tyler oliveira political views: Defying Beijing Debby Chan, 2024-06-11 The Belt and Road Initiative (BRI) aims to construct a Sino-centric transcontinental infrastructure network in Asia, Europe, Africa and beyond. Within this initiative, the China-Myanmar Economic Corridor (CMEC) is a vital strategic component. The shortcut to the Indian Ocean seeks to improve China's energy security and facilitate trade. *Defying Beijing: Societal Resistance to the Belt and Road in Myanmar* shows how Myanmar was able to capitalise on Chinese BRI ambitions to achieve its own desired outcomes during the country's political liberalisation in the 2010s. Belying the asymmetrical relationship between these two nations, the Myitsone hydropower dam was suspended, the Letpadaung copper mine's contract was renegotiated, and the Kyaukphyu deep seaport project was downsized. China offered concessions to Myanmar instead of pressuring it to honour those signed agreements. Contrasting a common proposition that US-Myanmar rapprochement disrupted the BRI projects in Myanmar, *Defying Beijing* argues that the rise of new foreign policy actors - citizens - made project continuation costlier for Naypyidaw in the course of political liberalisation in the 2010s. Naypyidaw was pressured to renegotiate terms with Beijing in the wake of social outcry in the country. *Defying Beijing* advances our understanding of Chinese-Myanmar BRI relations and demonstrates how citizens can change the course of events of BRI cooperation despite oppressive political environments and an imbalanced bargaining structure. In post-coup Myanmar, Naypyidaw's policy options were not conditioned by public opinion or protests; nonetheless, armed resistance has posed new domestic constraints in the CMEC's implementation. Clearly, bilateral economic agreements without citizens' endorsement are fraught with legitimacy problems and instabilities.

tyler oliveira political views: The Tropical Silk Road Paul Amar, Lisa Rofel, Fernando Brancoli, Maria Amelia Viteri, Consuelo Fernandez, 2022-11-29 This book captures an epochal juncture of two of the world's most transformative processes: the People's Republic of China's rapidly expanding sphere of influence across the global south and the disintegration of the Amazonian, Cerrado, and Andean biomes. The intersection of these two processes took another step in April 2020, when Chinese President Xi Jinping launched a New Health Silk Road agenda of aid and investment that would wind through South America, extending the Eurasian-African Belt and Road Initiative to a series of mine, port, energy, infrastructure, and agrobusiness megaprojects in the Latin American tropics. Through thirty short essays, this volume brings together an impressive array of contributors, from economists, anthropologists, and political scientists to Black, feminist, and Indigenous community organizers, Chinese stakeholders, environmental activists, and local journalists to offer a pathbreaking analysis of China's presence in South America. As cracks in the progressive legacy of the Pink Tide and the failures of ecocidal right-wing populisms shape new political economies and geopolitical possibilities, this book provides a grassroots-based account of a post-US centered world order, and an accompanying map of the stakes for South America that highlights emerging voices and forms of resistance.

tyler oliveira political views: The Urbanising Dynamics of Global China Hyun Bang Shin, Yimin Zhao, Sin Yee Koh, 2025-05-02 The book focuses on the urban dimension of global China, especially regarding the impacts of its urbanising dynamics on the (re)imaginings and manifestations of global urban futures. It situates China's urban question in contemporary global

change, and vice versa, by understanding the rise of global China as an urban process that weaves together compressed spaces, variegated times and trans- scalar power dynamics in the making of global capitalism. The overseas expansion of China's economic influence has long been foregrounded in media reports and policy debates, especially with the rise of the Belt and Road Initiative that has turned China into one of the key investors in the global South. The term global China has been widely adopted to depict the geopolitical dimension of this immense flow of capital. This edited volume explores the urban manifestation of global China at different scales and involving diverse actors, discussing the ways in which the urban has been reconfigured by China's global expansion and uncovering the differentiated modes of speculative and spectacular urban production at present. Observing from Ghana, India, Malaysia and China, chapters in this book collectively make theoretical, methodological and empirical contributions to recognise the dynamics of speculation, articulation and translation in global capitalism, where China plays an increasingly significant role. Three main themes have guided the book's interrogation of what global China implies. These include: (a) transplanting models and urbanism; (b) multi- scalar construction of temporality; and (c) situating the urban China model in global capitalism. These aspects mark the core of the book's endeavour to extend the critique of our changing urban conditions at present. This book was originally published as a special issue of Urban Geography.

tyler oliveira political views: A Companion to Naturalism David Papineau, David Macarthur, Mario De Caro, Flávia Carvalho Chagas, Clademir Luís Araldi, José Eduardo Porcher, Nythamar de Oliveira, Fabrício Pontin, Felipe Karasek, Adriano Naves de Brito, Sofia Albornoz Stein, Ruth Garret Millikan, Evandro Barbosa, João Hobuss, Susana Nucettelli, Thomas Sukopp, Luís Rosa, Jack Ritchie, Offering a engaging and accessible portrait of the current state of the field, *A Companion to Naturalism* shows students how to think about the relation between Philosophy and Science, and why is both essential and fascinating to do so. All the authors in this collection reconsider the core questions in Philosophical Naturalism in light of the challenges raised in Contemporary Philosophy. They explore how philosophical questions are connected to vigorous current debates - including complex questions about metaphysics, semantics, religion, intentionality, pragmatism, reductionism, ontology, metaethics, mind, science, belief and delusion, among others - showing how these issues, and philosopher's attempts to answer them, matter in the Philosophy. In this sense, this collection is also compelling and illuminating reading for philosophers, philosophy students, and anyone interested in Naturalism and their place in current discussions.

tyler oliveira political views: *China's Big Power Ambition under Xi Jinping* Suisheng Zhao, 2021-12-14 Instead of emphasizing China as a developing country, Chinese President Xi Jinping has identified China as a big power and accentuated China's big power status. This book explores the narratives and driving forces behind China's big power ambition. Three narratives rooted in Sino-centralism are examined. One is China's demands for the reform of global governance to reflect the values and interests of China as a rising power. Another is China's Belt and Road Initiative to construct a nascent China-centred world order. The third is the China model and self-image promotion in the developing countries. There are many forces that have driven or constrained China's big power ambition. This collection focuses on two sets of forces. One is China's domestic politics and economic incentives and disincentives. The other is China's geo-political and geo-economic interests. These forces have both motivated and constrained China's big power ambition. The chapters in this book were originally published in the *Journal of Contemporary China*.

tyler oliveira political views: *Routledge Handbook of Highland Asia* Jelle J.P. Wouters, Michael T. Heneise, 2022-08-09 The *Routledge Handbook of Highland Asia* is the first comprehensive and critical overview of the ethnographic and anthropological work in Highland Asia over the past half a century. Opening up a grand new space for critical engagement, the handbook presents Highland Asia as a world-region that cuts across the traditional divides inherited from colonial and Cold War area divisions - the Indian Subcontinent/South Asia, Southeast Asia, China/East Asia, and Central

Asia. Thirty-two chapters assess the history of research, identify ethnographic trends, and evaluate a range of analytical themes that developed in particular settings of Highland Asia. They cover varied landscapes and communities, from Kyrgyzstan to India, from Bhutan to Vietnam and bring local voices and narratives relating trade and tribute, ritual and resistance, pilgrimage and prophecy, modernity and marginalization, capital and cosmos to the fore. The handbook shows that for millennia, Highland Asians have connected far-flung regions through movements of peoples, goods and ideas, and at all times have been the enactors, repositories, and mediators of world-historical processes. Taken together, the contributors and chapters subvert dominant lowland narratives by privileging primarily highland vantages that reveal Highland Asia as an ecumene and prism that refracts and generates global history, social theory, and human imagination. In the currently unfolding Asian Century, this compels us to reorient and re-envision Highland Asia, in ethnography, in theory, and in the connections between this world-region, made of hills, highlands and mountains, and a planetary context. The handbook reveals both regional commonalities and diversities, generalities and specificities, and a broad orientation to key themes in the region. An indispensable reference work, this handbook fills a significant gap in the literature and will be of interest to academics, researchers and students interested in Highland Asia, Zomia Studies, Anthropology, Comparative Politics, Conceptual History and Sociology, Southeast Asian Studies, Central Asian Studies and South Asian Studies as well as Asian Studies in general.

tyler oliveira political views: *The Palgrave Handbook of Globalization with Chinese Characteristics* Paulo Afonso B. Duarte, Francisco José B. S. Leandro, Enrique Martínez Galán, 2023-01-07 This handbook offers readers various perspectives on globalization and multilateralism with Chinese characteristics. Its originality is derived from the hybrid approaches the handbook takes, where chapters provide complementary, intertwined, and multi-level analysis on the topic. Based on contributions of scholars and practitioners from a number of countries, the handbook helps readers to comprehend ongoing debates on the Belt and Road Initiative and global governance, within a shifting balance of world power, characterized by competing views between Western and Chinese norms, standards, values, and narratives. Split into three Parts, and consisting of 46 chapters, the handbook views globalization as comprehensive concept that benefits from the contributions of various disciplines such as geography, geo-economics, political science and international relations. In producing one of the most ambitious and updated outputs on the topic, the handbook as a whole seeks to discuss what globalization with Chinese characteristics looks like, and the role of the Belt and Road Initiative in this process.

Scholars from the fields of philosophy of narrative, ethnographic research, linguistics, political sciences, international relations, and area studies reflect on how to approach, understand, and utilize narratives to comprehend social structures and interactions. The volume attempts to reflect on a range of questions, including: How can narrative studies broaden and deepen the scope of research in other fields? What connections exist between narratives and identities (individual and collective)? How does analyzing narratives help us better understand the dynamics of the policy change and the perceptions of self and other? The essays range from reflections on the role of narrativity in cognitive processes, interview settings, and in constructing historical memories to the analysis of narrator and audience perspectives on the Chinese Belt and Road Initiative, evaluations of roles and legitimization strategies, as well as interpretations of documentary films. The authors show the flexibility and fruitfulness of incorporating narratives into research agendas in a wide range of disciplines and highlight the theoretical and empirical research benefits that narrative studies open
