journal of legal studies in business: *Legal Education* Caroline Strevens, Richard Grimes, Edward Phillips, 2016-04-22 The importance of simulation in education, specifically in legal subjects, is here discussed and explored within this innovative collection. Demonstrating how simulation can be constructed and developed for learning, teaching and assessment, the text argues that simulation is a pedagogically valuable and practical tool in teaching the modern law curriculum. With contributions from law teachers within the UK, Australia, Hong Kong, South Africa and the USA, the authors draw on their experiences in teaching law in the areas of clinical legal education, legal process, evidence, criminal law, family law and employment law as well as teaching law to non-law students. This book will be of relevance not only to law teachers but university teachers generally, as well as those interested in legal education and the theory of law.

journal of legal studies in business: EU Securities and Financial Markets Regulation Niamh Moloney, 2023 Over the decade or so since the global financial crisis rocked EU financial markets and led to wide-ranging reforms, EU securities and financial markets regulation has continued to evolve. The legislative framework has been refined and administrative rulemaking has expanded. Alongside, the Capital Markets Union agenda has developed, the UK has left the EU, and ESMA has emerged as a decisive influence on EU financial markets governance. All these developments, as well as the Covid-19 pandemic, have shaped the regulatory landscape and how supervision is organized. EU Securities and Financial Markets Regulation provides a comprehensive, critical, and contextual account of the intricate rulebook that governs EU financial markets and its supporting institutional arrangements. It is framed by an assessment of how the regime has evolved over the decade or so since the global financial crisis and considers, among other matters, the post-crisis reforms to key legislative measures, the massive expansion of administrative rulemaking and of soft law, the Capital Markets Union agenda, the development of supervisory convergence as the means for organizing pan-EU supervision, and ESMA's role in EU financial markets governance. Its coverage extends from capital-raising and the Prospectus Regulation to financial market intermediation and the MiFID II/MiFIR and IFD/IFR regimes, to the new regulatory regimes adopted since the global financial crisis (including for benchmarks and their administrators), to retail market regulation and the PRIIPs Regulation, and on to the EU's third country regime and the implications of the UK's departure from the EU. This is the fourth edition of the highly successful and authoritative monograph first published as EC Securities Regulation. Heavily revised from the third edition to reflect developments since the global financial crisis, it adopts the in-depth contextual and analytical approach of earlier editions and so considers the market, political, institutional, and international context of the regulatory and supervisory regime.
